ANNEX

to the

**Proposal for a Council Implementing Decision
on the approval of the assessment of the recovery and resilience plan for Romania**

{SWD(2021) 276 final}

ANNEX

1. SECTION 1: REFORMS AND INVESTMENTS UNDER THE RECOVERY AND RESILIENCE PLAN

1.1. Description of Reforms and Investments

A. COMPONENT 1: WATER MANAGEMENT

The objective of the component is to ensure sustainable water provision for a safe future of people, the environment and the economy. In particular, the component aims to: (1) increase public access, especially in rural areas, to public water and sanitation services in line with the requirements of European Union legislation and make it accessible to all social groups; (2) increase the safety of existing accumulations; (3) strengthen administrative and response capacity of National Water Administration (ANAR) in emergency situations in particular linked to water management infrastructure; (4) improve the accuracy of forecasting weather warnings and warning systems in order to reduce the number of deaths and injuries caused by extreme weather events.

The component is comprised of two reforms and seven investments.

The measures included in the component are expected to address some challenges highlighted by the country-specific recommendation to focus investment on the green and digital transition, in particular on environmental infrastructure among others (country-specific recommendation 4, 2019 and country-specific recommendation 3, 2020).

It is expected that no measure in this component does significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measures and the mitigating steps set out in the recovery and resilience plan in accordance with the DNSH Technical Guidance (2021/C58/01).

A.1. DESCRIPTION OF THE REFORMS AND INVESTMENTS FOR THE LOAN

Reform 1. Strengthening the regulatory framework for the sustainable management of the water and wastewater sector and accelerating public access to quality services under European directives

The objective of this reform is to improve the capacity of regional water infrastructure operators, and to improve the quality and efficiency of cooperation between them and local authorities/inter-community development associations (IDAs), water and channel infrastructure owners. To attain this, a number of legislative and regulatory changes shall be made:

1) Amendments to the Law No 241/2006 on water supply and sewerage shall be made to enable the following:

- Approval of the tariff strategy of the regional water and sewerage operator by the general meeting of the Intercommunal Development Associations (IDAs), based on the special mandate received from the local administrative units. Through this change, the time needed for the approval of the tariff strategy shall be reduced significantly which shall enable the extension of the water and wastewater service infrastructure.
- Oblige local public administration authorities to keep records of natural and legal persons that do not discharge waste water into the public sewerage network and send the list of such persons to the National Environmental Guard annually.
- Oblige users to connect to existing public sewerage systems if they do not have an appropriate individual collection and treatment system.

- Allow to organise, where appropriate, the provision of the water service only, on the condition that the collection of wastewater is done through individual collection and treatment systems that shall ensure the same level of environmental protection as centralised collection and treatment systems.
- Ensure the exceptional nature of adequate individual systems in the sense that these systems address situations where centralised systems are not technically and economically feasible.
- Prohibit the direct discharge of untreated wastewater from appropriate individual systems into the environment.
- Develop criteria for authorization, construction, registration/record, operation and maintenance of appropriate individual systems.

The implementation of the above mentioned reform shall be completed by 31 December 2021.

2) Entry into force of the law approving the national programme First Connection to Water and Sanitation, which shall support families and single people on low incomes (who have average monthly net cash incomes below the gross national minimum wage guaranteed per family member) to pay the costs incurred for connection to the water supply and sewerage system. The implementation of the reform shall be completed by 31 March 2022.

3) Signature of implementation agreements between the Environmental Fund Administration and the local authorities participating in the First Connection to Water and Sanitation Programme. The agreements shall be completed by 31 December 2022.

Reform. 2 Reconfiguration of the current economic mechanism of the National Water Administration (ANAR) in order to ensure the modernisation and maintenance of the national water management system and proper implementation of the Water Framework Directive and Floods Directive

The objective of the reform is to ensure the modernisation and maintenance of the national water management system and proper implementation of Directive 2000/60/EC (Water Framework Directive) and Directive 2007/60/EC (Floods Directive) and to ensure the most efficient cost management at ANAR level.

To attain this, a new economic mechanism enabling ANAR to best meet consumer needs, including by improving the connection between tasks and staff structure, shall be made operational by carrying out the necessary studies for the 11 river basins in Romania, covering: (i) the economic importance of the sustainable water management and use; (ii) trends in the evolution of the water needs and the volumes of water collected at river basin / area level; and (iii) medium and long-term macroeconomic indicators and the optimal cost recovery mechanism for the water volumes provided by ANAR to water resource users in accordance with the ecological flow requirements. The studies shall be completed by 30 June 2022.

On the basis of those studies, legislative amendments to Water Law No 107/1996 shall be adopted to regulate the new economic mechanism for water resources in Romania.

The implementation of the reform shall be completed by 30 June 2024.

Reform 1 shall be accompanied by three investments – Investments 1, 2 and 3.

Investment 1. Expansion of water and sewerage systems in agglomerations of more than 2 000 population equivalent, prioritised by the Accelerated Plan for Compliance with European Directives

The objective of this investment is to extend the coverage of water and wastewater collection systems in municipalities of more than 2 000 population equivalent, prioritised by the Plan for Accelerating Compliance with the European Directives.

As a result of the investment, a total of 1 600km of water distribution networks and at least 2 500km of sewage network shall be built and made operational in total in agglomerations of more than 2 000 population equivalents (i.e), prioritised by the Accelerated Plan for Compliance with the European Directives and in compliance with the amendments to the Law No 241/2006 adopted under Reform 1.

The implementation of the investment shall be completed by 30 June 2026.

Investment 2. Collection of waste water in agglomerations of less than 2 000 population equivalent which prevent the achievement of good status of water bodies and/or affect natural protected areas

The objective of the investment is to build individual systems or other appropriate (common) systems for waste water collection in agglomerations below 2000 population equivalent.

As a result of the investment, at least 12 900 in total individual or other appropriate systems and at least 400km in total of sewage network shall be built and made operational. The investment shall commence only after the approval of the legislative amendments on appropriate individual systems (Reform 1) and the entry into force of the legislative act approving the National Programme for the first connection to water and sewerage networks (Reform 1) and shall be compliant with the amendments to the Law No 241/2006 adopted under Reform 1.

The implementation of the investment shall be completed by 30 June 2026.

Investment 3. Supporting the connection of the low-income population to existing water and sewerage networks

The objective of the investment is to provide support to families and single people with low incomes (who have average monthly net cash incomes below the gross national minimum wage guaranteed per family member) to cover the costs of connection to the public water supply and sanitation system.

As a result of the investment, at least 88 400 additional households shall be connected to water and sewerage through the National Programme First Connection to Water and Sanitation, adopted under Reform 1. The investment shall be implemented by local authorities through the public water and sewerage operators managing the planned building systems. The investment shall finance costs incurred and justified in accordance with legal provisions by the contracting authorities without exceeding the level of EUR 2 000 per connected household.

The implementation of the investment shall be completed by 30 June 2026.

Investment 4. Adaptation to climate change by automation and digitalisation of water disposal and storage equipment of existing accumulations to ensure ecological flow and increase the security of water supply to the population and reduce the risk to floods

The investment consists of two sub-investments: (1) rehabilitation of existing defence lines in accordance with the Floods Directive and the National Strategy for Flood Risk Management; and (2) rehabilitation of existing accumulations that are at risk of collapsing.

The objective of the first sub-investment is to renovate existing flood defence lines. As a result of this sub-investment, at least 510 km in total of flood defence lines shall be rehabilitated in line with the Floods Directive and the National Strategy for Flood Risk Management. Rehabilitation works shall prioritise areas on the basis of prevention and protection plans and flood mitigation, and shall consist of fillings from local material extracted from the dyke-riverbank areas, followed by grass coverings.

The implementation of the sub-investment shall be completed by 31 March 2026.

The objective of the second sub-investment is to repair and refurbish damaged dams and flood prevention polders on existing flood defence lines in order to restore and maintain their capacity to prevent flooding. As regards the dams, subject to the outcome of the feasibility studies that will be carried out for 30 dams, the sub-investment shall be implemented through the adoption, by 30 June 2023, of the project designs for the rehabilitation of 20 existing dams, for which there are no feasible alternatives to reduce flood risks. On the basis of these project designs, 20 existing dams, for which revised feasibility studies concluded that there are no feasible alternatives to reduce flood risks, shall be rehabilitated. The rehabilitation shall be done in accordance with the requirements set out in the feasibility studies and project designs, and fully respect the results and conditions set by the comprehensive and cumulative EIA that shall have been completed in accordance with Directive 2011/92/EU (EIA Directive), as well as relevant assessments in the context of Directive 2000/60/EC (Water Framework Directive) and the Appropriate Assessment under Directive 92/43/EEC (Habitats Directive), including the implementation of required mitigation measures. Good ecological status/potential of the relevant water bodies in accordance with the requirements of the Water Framework Directive shall be achieved and evidenced by latest relevant supporting data, and any deterioration shall be avoided. As regards the flood prevention polders, as a result of this investment, 20 flood prevention polders on existing flood defence lines shall be rehabilitated or newly-installed.

The implementation of the sub-investment shall be completed by 31 March 2026.

Investment 5. Appropriate endowment of river basin administrations for flood monitoring, prevention and emergency response

The objective of the investment is to equip ANAR/basin administrations with the necessary machinery and equipment for intervention to mitigate impacts of extreme weather events.

As a result of the investment, 11 River Basin Administrations shall be equipped with machinery for rough terrain access and intervention, amphibious access and transport of mobile sand bags/dikes in hard-to-reach areas; drones equipped with LIDAR/Flir/photogrammetry sensors; geo-electro resistive/geo radar technologies of dyke bodies, and hardware and software infrastructure for data analysis and data storage collected by the above-mentioned equipment, in order to support and improve flood prevention and response to emergency situations.

It is expected that this measure does not do significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measure and the mitigating steps set out in the recovery and resilience plan in accordance with the DNSH Technical Guidance (2021/C58/01). In particular, vehicles to be purchased shall have specific emissions of CO₂, as defined in Article 3(1), point (h), of Regulation (EU) 2019/631, that are lower than 50gCO₂/km.

The implementation of the investment shall be completed by 30 September 2023.

Investment 6. Implementation of the water cadastre

The objective of the investment is to ensure rapid delimitation of minor watercourses, using techniques for interpreting and processing semi-automatic satellite information available at global and European level for approximately 70% of the length of the cadastral water courses, the determination by semi-automatic methods of hydro-morphological active areas (erosion/sedimentation) to support the implementation of Water Framework Directive, and of critical points of the longitudinal infrastructures of water courses (dams, shore-side equipment) in order to prioritise the implementation of the Floods Directive.

The water cadastre shall be developed and operationalised by (i) procuring Digital Terrain Model (DTM)/Digital Surface Model (DSM) at national level, based on satellite information which shall be made available to all State authorities; (ii) software development for determination of river bed modification (erosion sedimentation process), gravel extraction monitoring and land slide potential in the areas of dam-lake ensemble; (iii) semiautomatic digitisation and delineation of minor river beds based on DTM/DSM orthophoto and satellite imagery.

The implementation of the investment shall be completed 31 December 2025.

Investment 7. Extension of the national observation network of the National Integrated Meteorological System (SIMIN)

The objective of this investment is to enhance the capacity to forecast severe weather phenomena (nowcasting) and hence to reduce or prevent their adverse impacts. This shall be attained through the extension of the national network of observations under the National Integrated Meteorological System (SIMIN) with automatic and autonomous surface meteorological stations and agro-meteorological stations.

As a result of this investment, 300 automatic and autonomous surface meteorological stations and 100 agro-meteorological stations shall be acquired and made operational by 31 December 2025. In addition, information and communication technology for the integration of the additional meteorological stations in the National Integrated Meteorological System (SIMIN) shall be made operational by 30 June 2026.

The implementation of the investment shall be completed by 30 June 2026.

A.2. Milestones, targets, indicators, and timetable for monitoring and implementation for the loan

B. COMPONENT 2: FORESTS AND BIODIVERSITY PROTECTION

The objective of the component is to harmonise national forest management practices with those on preserving biodiversity and protecting the environment and ensuring a transition to a climate-neutral Europe by creating new areas covered by forests and restoring degraded habitats.

The component is comprised of two reforms and five investments.

The measures included in the component are expected to address some challenges highlighted by the country-specific recommendation to focus investment on the green and digital transition, in particular on environmental infrastructure among others (country-specific recommendation 4, 2019 and country-specific recommendation 3, 2020).

It is expected that no measure in this component does significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measures and the mitigating steps set out in the recovery and resilience plan in accordance with the DNSH Technical Guidance (2021/C58/01).

B.1. Description of the reforms and investments for non-repayable financial support

Reform 1. Reform of forest management and governance systems through the development of a new National Forest Strategy and subsequent legislation

The objective of the reform is to ensure a clear and robust strategic and regulatory framework for the implementation of sustainable forest policies that support climate change mitigation and adaptation.

The reform shall consist of the following actions:

- (1) Completion of independent studies on weaknesses in governance, both institutional and regulatory, and implementation of the provisions of the current forestry legislation (by 30 June 2022);
- (2) Adoption of the National Forest Strategy 2020-2030 on the basis of the recommendations of the assessment performed under (1) above (by 30 September 2022);
- (3) Adoption and entry into force of amended Ministerial Ordinances laying down the binding rules for afforestation and reforestation foreseen in the National Forest Strategy 2020-2030 adopted under (2) (by 30 September 2023);
- (4) Adoption and entry into force of legislative acts amending and supplementing the existing legislation on forests aimed at streamlining the legal framework, combatting illegal logging and improving forest management (by 30 June 2023).

The reform shall be supported with two investments – Investment 1 and 2.

The implementation of the reform shall be completed by 30 September 2023.

Investment 1. Afforestation and reforestation national campaign, including urban forests

The objective of the investment is to create new forests and areas with forest vegetation in areas vulnerable to climate change through land identification and assessment, financing of afforestation, plantation care, increase of the forest vegetation area along communication routes and within urban agglomerations (urban forests including mini-forests) around municipalities and between fields with agricultural crops, as well as other protective forest certain categories.

As a result of this investment, a total of 56 700ha of new areas shall be afforested or reforested and a total of 3 150 000 m² of new areas of urban forests shall be created, in compliance with the legal requirements laid down in the National Forest Strategy, adopted under Reform 1.

The implementation of the investment shall be completed by 30 June 2026.

Investment 2. Development of modern production capacities of forest reproduction material

The objective of the investment is to develop sufficient reproductive production capacities (tree species and ecotypes) that are suitable for the future climatic conditions of Romania.

As a result of this investment, at least 90 new and renovated tree nurseries shall be made operational, in compliance with the legal requirements laid down in the National Forest Strategy adopted under Reform 1.

The implementation of the investment shall be completed by 30 September 2024.

B.2. Milestones, targets, indicators, and timetable for monitoring and implementation for non-repayable financial support

	reproduction material									material shall target tree species and ecotypes that are suitable for Romania's future projected climatic conditions.

B.3. Description of the reforms and investments for the loan

Reform 2. Reform of the management system of protected natural areas for the coherent and effective implementation of the European Biodiversity Strategy

The objective of this reform is to operationalise the current framework for designating nature protected areas, in particular through the establishment of a mechanism to link legislation specific to the various sectors with an impact on biodiversity, namely education, agriculture, forestry, hunting, tourism, spatial organisation, transport and energy.

This shall be attained through the adoption and entry into force of two legislative acts:

(1) legislative act setting up the inter-institutional committee to analyse the legal framework applicable to sectors with an impact on biodiversity and to draw up and promote proposals to amend or supplement the legal framework in light of up-to-date information on the distribution and dynamics of the conservation status of species and habitats (by 30 June 2022);

(2) legislative act modifying the legal framework applicable to sectors with an impact on biodiversity, with the aim of ensuring that the existing legal framework in the various relevant sectors does not affect/restrict the implementation of the conservation measures in the management plans of the nature protected areas (by 30 June 2025). The legislative act shall be based on the proposals of the committee established under (1).

The implementation of the reform shall be completed by 30 June 2025.

Investment 3. Update of approved management plans and identification of potential areas for strict protection in natural terrestrial and marine habitats in order to implement the EU Biodiversity Strategy for 2030

The investment consists of two sub-investments.

The objective of the first sub-investment (Investment 3.1) is to update approved management plans. The objective of the second sub-investment (Investment 3.2) is to identify potential areas for strict protection in line with the EU Biodiversity Strategy for 2030.

As regards the update of existing management plans, as a result of the investment, at least 250 management plans of nature protected areas shall be reviewed and updated in accordance with EU legislation by 30 June 2026.

The implementation of this sub-investment shall be completed by 30 June 2026.

As regards the strictly protected areas, two legislative acts shall be adopted and enter into force: (1) legislative act for the designation of strictly protected areas identified in Natura 2000 protected areas with existing management plans or including primary and old-growth forests (by 31 December 2023); and (2) legislative act for the designation of strictly protected areas identified in Natura 2000 protected areas without existing management plans and in other areas (by 31 December 2025).

The implementation of this sub-investment shall be completed by 31 December 2025.

Investment 4. Integrated investments for the ecological reconstruction of habitats and the conservation of species related to meadows, aquatic and water-dependent areas

This investment consists of five sub-investments.

The objective of the first sub-investment (Investment 4.1) is to restore connectivity of watercourses through the removal of obstacles in watercourses and as result contributing to the restoration of lateral connectivity of water-dependent aquatic habitats and species, in line

with the applicable management plans of the protected natural areas. As a result of this sub-investment, the connectivity of 1 700ha of riparian habitats shall be restored

The implementation of this sub-investment shall be completed by 30 June 2026.

The second sub-investment (Investment 4.2) aims at rebuilding grassland habitats in the protected natural areas. As a result of this sub-investment, at least 2 800 ha of grassland habitats shall be ecologically restored.

The implementation of this sub-investment shall be completed by 30 June 2026.

The third sub-investment (Investment 4.3) aims at reducing eutrophication and maintaining biological diversity of Danube Delta lakes. The actions to be covered under this sub-investment include regulation of water level in two lakes, designing and achieving the optimum profile of lakes' boundaries, decolourisation, bank consolidation, maintenance works, felling for regeneration of vegetation and trees in the perimeter, removal of timber and beaches that obscure water circulation and induce sedimentation, monitoring of species and habitats in the area, and small-scale run-off works for optimal water circulation. As a result of this sub-investment, at least 100ha of lake areas shall have benefitted from the removal of aquatic plants, on the basis of the updated feasibility study (June 2021).

The implementation of this investment shall be completed by 30 June 2026.

The fourth sub-investment's (Investment 4.4) objective is to develop a wild sturgeon monitoring system along the Lower Danube (1 500km), in conjunction with AI, in order to fight its poaching. As a result of this sub-investment, a network for monitoring, communication and transmission of wild sturgeon data shall be made operational. It is expected that this sub-investment does not do significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measure and the mitigating steps set out in the recovery and resilience plan in accordance with the DNSH Technical Guidance (2021/C58/01). In particular, vehicles to be purchased shall have specific emissions of CO₂, as defined in Article 3(1), point (h), of Regulation (EU) 2019/631, that are lower than 50gCO₂/km. Water transport vessels to be purchased shall correspond to the best-available technology from an environmental point of view.

The implementation of this sub-investment shall be completed by 30 September 2024.

Finally, the objective of the fifth sub-investment (Investment 4.5) is to modernise public access and visitors' infrastructure of the Danube Delta in order to reduce the pressure on habitats and species. As a result of this sub-investment, 10 visiting centres shall be constructed, aimed at alleviating the pressure of tourism on habitats by channelling and monitoring tourist flows to a network of 10 visiting centres associated with 40 observation points appropriately equipped for the needs of all categories of visitors. The construction of the visiting centres shall use environmentally friendly technologies, ecosystem-based approaches, and materials in a traditional way to the community architecture of the Danube Delta.

The implementation of this sub-investment shall be completed by 30 June 2026.

Investment 5. Integrated flood risk mitigation systems in forest river basins

The objective of the investment is to reduce flood risk in order to protect people, infrastructure and socio-economic objectives in risk areas, as well as to protect the environment and biodiversity through relevant environmental measures, in particular those relating to ensuring fish migration and ensuring ecological flow.

The investment shall be carried out in two steps:

(1) adoption of the project design for the modernisation works for flood protection, which shall include: (i) restoration of at least 6 damaged alluvium retention structures to install longitudinal measures (fish ladders and ecological flow); (ii) construction of at least 30 new alluvial structures, including fish ladders and ecological flow, with a maximum height of 5 m; (iii) restoration of at least 4ha of land through reforestation, weeding, or building of twig fences; and (iv) restoration of at least 30km of torrent bed. This implementation of this step shall be completed by 31 March 2023.

(2) completion of modernisation works for flood protection on the basis of project design adopted under (1) above. The implementation of this step shall be completed by 30 June 2026.

Any measures identified in the framework of the assessment under Directive 2000/60/EC (Water Framework Directive) as necessary to ensure compliance with the Do No Significant Harm Technical Guidance (2021/C58/01) shall be integrated into the project design and strictly complied with at all stages of construction, modernisation, operation and decommissioning. Deterioration of the ecological status of the affected water bodies shall be avoided and the measure shall not prevent the improvement of the ecological status or potential of the affected water bodies.

The implementation of the investment shall be completed by 30 June 2026.

B.4. Milestones, targets, indicators, and timetable for monitoring and implementation for the loan

C. COMPONENT 3: WASTE MANAGEMENT

The objective of the component is to accelerate the expansion and modernisation of waste management systems in Romania with a focus on separate collection, prevention, reduction, re-use and recovery to comply with the applicable EU legislation and transition to the circular economy.

The component is comprised of one reform and three investments.

The measures included in the component are expected to address some of the challenges highlighted by the country-specific recommendation to focus investment on the green and digital transition, in particular on environmental infrastructure among others (country-specific recommendations 2019 and 2020).

It is expected that no measure in this component does significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measures and the mitigating steps set out in the recovery and resilience plan in accordance with the DNSH Technical Guidance (2021/C58/01).

C.1. Description of the reforms and investments for the loan

Reform 1. Improving waste management governance to accelerate the transition to the circular economy

The objective of this reform is to create a strategic and legal framework for the transition to the circular economy by adopting the National Strategy for Circular Economy and an Action Plan, and amending certain legal acts related to waste management.

The implementation of this reform shall consist of the following steps:

- (1) Adoption of the National Circular Economy Strategy to set the framework for the transformation of the Romanian economy towards a circular operation, covering the whole life cycle of products (by 31 September 2022);
- (2) Entry into force of the legislative acts necessary for an operationalisation of a unitary waste management in accordance with the National Waste Management Plan, in particular legislations related to the treatment of waste, the sanitation services of municipalities and the fixing of tariffs of the sanitation services and the extended packaging producer responsibility (by 31 September 2022);
- (3) Adoption of the Action Plan for the National Circular Economy Strategy defining the key implementing steps of the Strategy (referred under (1) above), the responsible authorities and a binding timeline of the actions (by 31 September 2023). All the actions assigned to the public authorities under the Strategy and the Action Plan shall be completed by 30 March 2026.

As a result of the reform, control and monitoring and the environmental quality parameters of the Romanian waste management system shall be improved and the level of separate waste collection shall be increased. A contribution of 4,5 percentage points to the 50% national recycling and preparation for reuse target by 2025 shall be attained by 30 June 2026.

The implementation of the reform shall be completed by 30 June 2026.

Reform 1 shall be accompanied by three investments – Investments 1, 2 and 3.

Investment 1. Development, modernisation and completion of integrated municipal waste management systems at county level or at city/municipality level

The objective of this investment is to develop and modernise the integrated waste management systems and infrastructure for the management of public waste at county or city/municipality level.

The investment shall contribute to reaching the new targets for the preparation, re-use and recycling of municipal waste under the Directive (EU) 2018/851 amending Directive 2008/98/EC on waste. Investments shall be based on the National Waste Management Plan, County Waste Management Plans and Bucharest Municipality Waste Management Plan, and contribute to the recycling targets of the circular economy package.

The implementation of this investment shall include:

- (a) establishment of voluntary waste collection centres, in order to ensure separate collection of household waste for a number of waste streams (I.1.a), as a result of which 565 voluntary collection centres shall be operational by 30 June 2026.
- (b) establishment of digitalised eco-islands for separate collection of waste at local level, predominantly in apartment block areas (I.1.b), as a result of which 13 752 digitised eco-islands for separate collection of waste shall be operational by 30 June 2026.
- (c) integrated centres for urban agglomerations for separate waste collection (I.1.c), as a result of which integrated waste collection centres shall be operational in 15 urban agglomerations by 30 June 2026.
- (d) construction of waste recycling facilities to meet the recycling targets of the circular economy package (I.1.d), as a result of which 26 waste recycling facilities shall be put in operation by 30 June 2026 to meet the recycling targets of the National Circular Economy Strategy.

The above investments (a-d) shall be in line with the provisions of the National Waste Management Plan, the County Waste Management Plans and the Bucharest Municipality Waste Management Plan, as applicable.

It is expected that this measure does not do significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measure and the mitigating steps set out in the recovery and resilience plan in accordance with the DNSH Technical Guidance (2021/C58/01). In particular, the vehicles purchased under this measure shall be the best-available-technology from an environmental point of view.

The implementation of the investment shall be completed by 30 June 2026.

Investment 2. Development of infrastructure for manure and other compostable agricultural waste management

The objective of the investment is to develop manure collection and recovery systems.

The investment shall primarily consist of the establishment of integrated communal systems for manure recovery, composting stations and compost management equipment for large farm communities, biogas systems and the purchase of equipment for the management of agricultural compost. The proposed investments aim to modernise infrastructure, reduce ammonia and methane emissions and reduce nitrate pollution.

As a result of the investment, 254 integrated systems for the collection of compostable agricultural waste shall be established and made operational by 30 June 2026.

It is expected that this measure does not do significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measure and the mitigating steps set out in the recovery and resilience plan in accordance with the DNSH Technical Guidance (2021/C58/01). In particular, the vehicles purchased under this measure shall be the best-available-technology from an environmental point of view.

The investment shall be in line with the National Waste Management Plan.

The implementation of the investment shall be completed by 30 June 2026.

Investment 3. Development of public monitoring, control and institutional capacities for waste management and pollution prevention

The objective of this investment is to equip the respective public authorities for waste management monitoring, control and reporting activities.

The investment shall be implemented through two strands of action:

- (1) Equipping 43 National Environmental Guard County Commissioners with digital equipment (ICT system, truck scanning systems, dashcam and body-worn video cameras, unmanned aerial vehicles) for waste management monitoring and control activities (by 31 December 2024). As a result, 400 control missions shall be conducted by the National Environmental Guard Commissioners using the new digital equipment by 31 December 2025.
- (2) Purchase and operationalisation of 513 air quality, radioactivity and noise monitoring equipment for the National Environmental Protection Agency to ensure collection, transmission, storage and enable reporting of data on pollutant concentrations in the environment (by 30 June 2025).

It is expected that this measure does not do significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measure and the mitigating steps set out in the recovery and resilience plan in accordance with the DNSH Technical Guidance (2021/C58/01). In particular, the vehicles purchased under this measure shall be the best-available-technology from an environmental point of view.

The implementation of the investment shall be completed by 31 December 2025.

C.2. Milestones, targets, indicators, and timetable for monitoring and implementation for the loan

Seq. Num.	Related Measure (Reform or Investment)	Milestone /Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
					Unit of measure	Base line	Goal	Quarter	Year	
43	Reform 1 Improving waste management governance to accelerate the transition to the circular economy	Milestone	The adoption of the National Circular Economy Strategy	Adoption of the National Circular Economy Strategy by Government Decision				Q3	2022	Adoption of the National Circular Economy Strategy, which shall be based on the recommendations of the ongoing Technical Support Instrument project. The strategy shall set out rules for the entire life cycle of products and define the following key elements: - regulatory, financial and information management methods and tools to support circular initiatives; - identification of sectors to be covered; - revision of environmental and economic incentives on waste in order to make recycling more convenient than landfilling and incineration; - guidelines for using the financial and management methods/tools in the respective sectors; - governance framework for collaboration between stakeholders (authorities, academia, the private sector, the non-profit sector and

58	Investment 3.b Air quality, radioactivity and noise monitoring equipment for the National Environmental Protection Agency	Target	operationalisation of air quality, radioactivity and noise monitoring equipment		Number	0	513	Q2	2025	Air quality, radioactivity and noise monitoring equipment shall be procured and made operational. The equipment shall ensure collection, transmission, storage and enable reporting of data on pollutant concentrations in the environment. The purchase of this equipment shall only take place after the adoption of the National Air Control Programme (part of the Sustainable Transport component of the national recovery and resilience plan and estimated for adoption in June 2022) based on the needs foreseen in the programme.

D. COMPONENT 4: SUSTAINABLE TRANSPORT

This component of the recovery and resilience plan addresses several challenges related to sustainable transport to promote smart, safe and inclusive mobility in Romania. It should be seen in connection with the component 10 “Local Fund” which includes complementary measures for sustainability mobility in urban areas.

The objective of this component is to enhance the sustainability of Romanian transport sector by supporting its green and digital transition. The reforms supporting the investments include regulatory changes to incentivise zero-emission road transport, improve the governance of state-owned enterprises in transport sectors, improve road safety, promote clean public transport, promote modal shift to railways and inland waterways.

The reforms and investments shall contribute to addressing the country-specific recommendations conveyed to Romania in 2019 and 2020, on the need to: (i) “front-load mature public investment projects and promote private investment to foster the economic recovery” and “focus investment on the green and digital transition, in particular on sustainable transport” (country-specific recommendation 3, 2020) while “taking into account regional disparities” (country-specific recommendation 4, 2019); (ii) “improve preparation and prioritisation of large projects and accelerate their implementation (country-specific recommendation 4, 2019).

It is expected that no measure in this component does significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measures and the mitigating steps set out in the recovery and resilience plan in accordance with the DNSH Technical Guidance (2021/C58/01). Investments in road infrastructure are focused on TEN-T core network, contribute to economic and social cohesion and are accompanied by significant reforms to decarbonise the road transport, develop alternative fuels infrastructure, improve road safety and promote clean public transport and modal shift.

D.1. Description of the reforms and investments for non-repayable financial support

Reform 1. Sustainable transport, decarbonisation and road safety

The reform aims to support the transition towards sustainable and smart mobility by developing and improving the strategic, legal and operational framework of the transport system in Romania. The proposed reform is linked to measures for sustainable urban mobility included in the component “Local Fund” so as to ensure complementarity and synergies with measures taken at local level.

The reform includes:

1.1 Road decarbonisation in line with “polluter pays” principle

A legislative package shall implement a new taxation system in line with the polluter pays principle and other principles of environmental taxation. The package shall include (i) distance-based charging for heavy goods vehicles (lorries and other types of lorries) and (ii) , incentive schemes for fleet renewal (in particular small cars/coaches/buses) through scrapping schemes, in combination with taxation measures for the ownership of the most polluting passenger vehicles. The new charging system shall be implemented in a non-discriminatory manner.

The Ministry of Transport and Infrastructure shall carry out an analysis to define more specifically the level of charging, in particular for heavy traffic, with the specific incentives for electric/hybrid vehicles, including light vehicles, the timing for the gradual introduction of such charges, the categories of vehicles to be included in the toll system, the level of pollution of passenger vehicles, the categories of roads and the coverage level of the integrated national road network in Romania. The additional revenue generated should be used for the maintenance of the road network and for new investments in sustainable transport.

The reform also aims at exceeding by at least 3 percentage points the minimum procurement targets of clean public vehicles set in the EU Clean Vehicles Directive.

The legislative package shall include measures to stimulate the use of zero-emission vehicles and fleet renewal programmes by individuals, private companies and public institutions, contributing to an increase of at least 100% in the number of zero-emission vehicles registered in Romania compared to the initial value in 2020, and the scrapping of 250 000 polluting vehicles (EURO 3 or below) by 30 June 2026.

An important element contributing to the sustainability of transport, in particular regarding air pollution reduction in urban areas and at country level, is the National Air Pollution Control Programme (NAPCP), which should have been submitted to the Commission by April 2019 pursuant to the Directive (EU) 2016/2284, and which the Romanian authorities indicated would be approved by 30 June 2022¹.

The legislative package approved by the Romanian Parliament shall enter into force by 30 June 2024 and the full operationalisation of the charging system by 30 June 2026.

1.2 Alternative fuels infrastructure

The objective of this reform is to develop the alternative fuels infrastructure for road vehicles, in particular additional electric recharging points shall be installed to reach at least 30 000 recharging points by 30 June 2026.

The investment supported by the RRF consists of financing at least 15 283 electric recharging points, of which 14 200 points shall be high power recharging points (allowing for a transfer of electricity to an electric vehicle with a power greater than 22kW) and 1 083 points shall be normal power recharging points (allowing for a transfer of electricity to an electric vehicle with a power of less than or equal to 22kW, excluding devices with a power of less than or equal to 3,7kW).

As regards public accessibility, the 13 200 electric recharging points included in the Local Fund component shall be accessible to the public, in accordance with point 7 of Article 2 of Directive 2014/94/EU, and 2 083 points (83 points in the Local Fund component and 2 000 points in the Renovation Wave component) shall be semi-public/private recharging points.

The implementation of the reform shall be completed by 30 June 2026.

1.3 Road safety

The reform consists of a National Road Safety Strategy which shall include the following new measures:

1. Safety inspection: the technical assessment to determine road safety shall be optimised; implementation and development of the work of technical expertise on motor vehicles; setting

¹ Romania has not yet met this legal obligation and an infringement is ongoing. Acknowledging the date of submission of the NAPCP in the framework of the Plan does not mean endorsement by the Commission. This is indeed without prejudice to the ongoing infringement on the non-submission of the NAPCP.

up research and expert laboratories covering methodologies for monitoring, inspection and testing of vehicles throughout their lifetime;

2. Development of databases on road safety features at testing stations and vehicle repair units; development of the methodology for data collection and the primary data collection base for the analysis of key road safety performance indicators;

3. Introduction of more stringent speed limits on dangerous sections, and increase of enforcement of penalties for offences;

4. Strategy on the elimination of black spots (hotspots) on the network of national roads and motorways. The identified 267 safety black spots (hotspots) shall be eliminated by 2030, of which 129 supported by the Plan by 30 June 2026.

This reform shall be implemented via secondary legislation and related entry into force of enforcement measures. These measures are complementary to measures for road safety in urban areas included in the “Local Fund” component.

The implementation of the reform shall be completed by 31 December 2022.

1.4 Intelligent Transport Systems (ITS) strategy and legislative package

The objective of this reform is to develop the Intelligent Transport System to enhance the efficiency and safety of transport thanks to the digitalization of transport information.

The reform shall be implemented through the creation of a strategic document for Intelligent Transport Systems (ITS) which shall be approved by the Romanian Government. The ITS strategy shall be developed in conjunction with intermodal transport policies to serve the needs for efficient operation in multimodal nodes.

The implementation of the reform shall be completed by 30 June 2022.

1.5 Railways infrastructure development and rail traffic management

The objective of this reform is to strengthen the efficiency and competitiveness of the railways in Romania.

The strategy includes the modernisation and development objectives necessary to meet current and future mobility needs of people and goods, as well as identified requirements to increase the competitiveness of rail transport. At the same time, actions are planned to modernise the operation of the railway infrastructure in order to increase the performance of train traffic and to make its operation more efficient in order to limit the costs of rail transport.

The reform includes the ‘Strategy for the development of railway infrastructure 2021-2025’, approved at the end of 2020. This includes all maintenance, repairs and renewals necessary to rehabilitate the existing infrastructure and maintain it with the performance parameters necessary to support competitive rail transport at national level.

The measure shall include the Investment Plan 2020-2030, which shall prioritise rail investments on TEN-T and European Railway Traffic Management System (ERTMS) implementation, with a mechanism with clear indicators and criteria for prioritising rail infrastructure investments, as well as the institutional arrangements necessary to implement this mechanism and prepare investment projects.

The measure also includes a strategy and action plan for the deployment of ERTMS over 2025-2030, including: clear measures for the deployment and certification of ERTMS for the TEN-T Core network in the medium and long term (horizon 2030); responsible actors; budget estimates; administrative capacity measures at national level for responsible bodies to fully

manage the certification process for all sectors considered during their construction in order to ensure full operationalisation.

The implementation of the reform shall be completed by 31 December 2025.

1.6 Shipping strategy and integration with other modes of transport

The objective of this reform is to further develop the waterborne (inland waterways and ports) transport in Romania, in line with the EU Strategy on Sustainable and Smart Mobility.

The measure includes the adoption of the Shipping strategy and the planning of intervention measures for the development of the sector, integrated with other modes of transport, as well as the development and approval of the action plan for the implementation of the strategy.

An analysis of the current situation of Romanian waterways (both inland and maritime) and the current situation of Romanian ports in terms of infrastructure shall be carried out, focusing on how to improve the environmental performance of ships and ports, taking into account EU-wide requirements such as Directive 2014/94/EU on the deployment of alternative fuels infrastructure. The strategy should consider measures to green all port operations (emissions, noise, pollution). In order to promote the navigability of the Danube in a sustainable way, an approach combining sustainable infrastructure, alternative fuels and digitalisation shall be developed, while taking into account the environmental sensitivity of the Danube. Proposals shall be made to amend the legal and institutional framework on how to manage waterborne infrastructure with the objectives of: integrating waterborne transport with other modes of transport, reducing the environmental impact of ports (maritime and inland) and shipping, drawing up plans to develop intermodal ports and increasing freight transport on the Danube by 15% by 2026 in a sustainable manner.

The implementation of the reform shall be completed by 30 June 2023.

Investment 1. Modernisation and renewal of railways infrastructure

The objective of this investment is to “modernise” the railways lines (including rail replacement, sleeper, substrate, electrification, consolidation/construction of bridges/bridges, ERTMS level 2) in line with TEN-T standards, and to “renew” (replacement of rail, traverse, broken stone, thus bringing the line to constructive speed) and electrify specific railways sections. In addition, eleven “quick wins” investments are foreseen to remove railways speed restrictions, increase train speed and increase railway safety. “Quick wins” projects shall be implemented to ensure the viability of rail transport along the TEN-T corridors until their upgrading. In total, the investment shall deliver 315km of upgraded railway lines with a capacity increase of 30% and ERTMS 2 installed; 110km electrified railway lines; 2 426km (2 163km single track “quick wins” projects + 263km renewal of lines) of renewed railways with 15% increased speed (reaching an average speed of minimum 100km/h).

The investment also includes a portfolio of 17 electronic centralisation projects to be implemented through the national recovery and resilience plan, which have a balanced spatial distribution in Romania and represent genuine railway sections supplying the TEN-T corridors. The 17 electronic centralisation projects shall solve capacity problems for 111 railway stations over a total length of more than 973km. As a consequence, it is estimated on increase of traffic volumes by 10-15%. In addition, the proposed electronic centralisation projects shall remove road bottlenecks from level crossings by significantly reducing waiting times.

It is expected that this measure does not do significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measure and the mitigating steps set out in the recovery and resilience plan

in accordance with the DNSH Technical Guidance (2021/C58/01). In particular, the projects shall fully respect the results and conditions set by the Environmental Impact Assessment to be completed in accordance with Directive 2011/92/EU, as well as relevant assessments in the context of Directive 2000/60/EC and Council Directive 92/43/EEC, including the implementation of required mitigation measures. This shall ensure that the investment does not significantly or irreversibly impact affected water bodies and does not cause significant negative impacts on protected habitats and species.

The implementation of the investments shall be completed by 30 June 2026, with 50% of the works completed by 31 December 2024.

Investment 2. Railways rolling stock

The objective of this investment in new zero-emission and upgraded railways rolling stock is to increase the quality of public passenger transport services by rail and thus increasing the use of this type of sustainable transport with respect to road transport via modal shift.

New railways rolling stock shall be made available free of charge to rail passenger transport operators under public service contracts awarded in full compliance with Regulation (EC) No 1370/2007.

The implementation of the investment shall be completed by 30 June 2026.

D.2. Milestones, targets, indicators, and timetable for monitoring and implementation for non-repayable financial support

Seq. Num.	Related Measure (Reform or Investment)	Milestone/ Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target

D.3. Description of the reforms and investments for the loan

Reform 2. Performance-based quality management in transport - Improving institutional capacity and corporate governance

The objective of this reform is to develop the quality of transport investments and services by improving the corporate governance and the performance of the State-Owned Enterprises operating in the transport sector, notably for those in charge of roads, railways and metro.

A new entity C.N.I.R. S.A. (National Company for Road Infrastructure) has been created by legislation entered into force in April 2021 to manage the investments in road sector, with the responsibility to ensure the implementation of the projects from the technical and economic documentation phase, tendering procedures, effective construction to reception. It is expected that this shall allow to focus a specific entity (C.N.I.R.) on the efficient management and prioritization of the new road investments, while the other entity (C.N.A.I.R.) shall focus on the management and maintenance of the existing road network. There shall be a transitional period of 3 years during which C.N.A.I.R. (National Company for Road Infrastructure Administration) and C.N.I.R. shall run investment projects in parallel, until the full operationalisation of C.N.I.R.

The selection and appointment of the members of the board of directors of the state-owned enterprises in the transport sector shall be improved with transparent and competitive procedures, and remuneration shall be in line with Key Performance Indicators (KPIs).

Based on an independent assessment of financial and operational performance in line with OECD (Organisation for Economic Cooperation and Development) standards, recommendations for improving the performance of C.N.A.I.R., C.N.I.R., C.F.R. (Compania Națională de Căi Ferate), C.F.R. Călători and Metrorex shall be implemented. In order to carry out the independent evaluation, the Ministry of Transport and Infrastructure shall contract/select through competitive public procurement an International Financing Institution or an international auditing company, recognised for the competence and expertise in state-owned enterprises performance. The recommendations from this independent assessment shall be implemented by 30 June 2023.

This reform shall ensure a balanced representation of women in all reform processes and in the organisational structures specific to its implementation. It shall also aim to improve the representation of women in decision-making positions of companies undergoing this reform.

The implementation of the reform shall be completed by 30 June 2023.

Investment 3. Development of sustainable road infrastructure on TEN-T network, road charging, traffic management and road safety

The objective of this investment is to improve the quality and efficiency of road infrastructure on specific sections of the TEN-T network, and to foster economic and social cohesion in particular in less developed and remote regions.

The new motorways shall be built for a total of 429km, as follows:

- A7 — Ploiești-Pașcani (319km);
- A8 — Târgu-Mureș-Miercurea Nirajului and Leghin- Târgu Neamț (Moțca) (59km);
- A1 — Marginea-Holdea (9km);
- A3 — Nădășelu-Poarta Sălajului (42km).

All motorway sectors shall be built in accordance with TEN-T standards, shall comply with and include in the design the Environmental Impact Assessment requirements, opinions and

conditions of the appropriate assessment (part of the Habitats Directive), and include new technical regulations to limit pollution, improve safety and promote traffic efficiency.

The construction of new highways shall entail the following features: mandatory technical standards in line with TEN-T requirements, construction of electric recharging stations, construction of secure parking areas, implementation of digitalisation solutions that serve to make traffic more efficient and safer, installation of forest curtains and works to improve road safety.

It is expected that this measure does not do significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measure and the mitigating steps set out in the recovery and resilience plan in accordance with the “Do no significant harm” Technical Guidance (2021/C58/01). All motorway sections shall be built in line with TEN-T standards, comply with the requirements of the Environmental Impact Assessment, include the Appropriate Assessment (part of Habitats Directive) in the design, and include new technical features to limit pollution and digitise transport (forest curtains, sound-absorbing panels, electric recharging stations, Intelligent Transport System, road safety). “Do not significant harm” compliance shall be ensured through the following accompanying measures:

- the coupling of the road investment with the installation of at least 30 000 electric charging points, as foreseen in Reform 1 of this component, Investment 1 and 2 of component 10 (“Local Fund”) and Investment 1 of component 5 (“Renovation Wave”);
- Reform 1 of this component, which introduces: i) distance-based charging for heavy goods vehicles (lorries and other types of lorries); ii) local taxation measures for the ownership of the most polluting passenger vehicles; and (iii) the increase by 29 500 of zero-emission electric vehicles registered in Romania between 2020 and 2025;
- Reform 1 of this component, which provides financial and fiscal incentives to increase the number of zero- and low-emission vehicles and to scrap at least 250 000 polluting vehicles (EURO 3 or below);
- Reform 1 of this component, which covers a strategy for the development of railway infrastructure and a shipping strategy and integration with other modes of transport, which support the modal shift from road towards rail and/or inland waterways;
- Reform 4 of component 10 “Local Fund”, which include measures to stimulate the renewal of the public transport fleet with clean vehicles, increase road safety and secure minimum national quality standards in urban and rural areas.

The implementation of the investment shall be completed by 30 June 2026.

Investment 4. Development of the underground transport network in the municipalities of Bucharest and Cluj-Napoca

The objective of this investment is to extend the underground transport network in the municipality of Bucharest by 5,2 kilometres, and to build 7,5 kilometres of underground transport network in Cluj-Napoca. The projects shall contribute to increasing the use of clean public transport, thereby reducing air pollution, emissions and congestion in these urban areas. The investment shall include facilities for persons with reduced mobility and shall be accessible to visually impaired persons.

The implementation of the investment shall be completed by 30 June 2026.

D.4. Milestones, targets, indicators, and timetable for monitoring and implementation for the loan

Seq. Num.	Related Measure (Reform or Investment)	Milestone/ Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
					Unit of measure	Base line	Goal	Quarter	Year	
78	R2. Performance-based quality management in transport - Improving institutional capacity and corporate governance	Milestone	Entry into force of the Law no. 50/2021 for the approval of the Emergency Ordinance no. 55/2016 on the reorganization of the National Company of Highways and National Roads in Romania - S.A. (C.N.A.I.R.) and the establishment of the National Road Investment Company - S.A. (C.N.I.R.)	Provision in the law indicating the entry into force of the Law no 50/2021				Q2	2021	<p>The entry into force of the legislation on the reform of the C.N.A.I.R. and the creation of a new Road Investment Project Management Company (C.N.I.R.). The law was approved by the Parliament and entered into force in April 2021. Along with the legislation (primary and secondary), the entire regulatory package (instructions, board decisions, management contracts signed with the management teams) shall include:</p> <ul style="list-style-type: none"> - Clear performance indicators, aligned with the Boards' mandates and KPIs, sanctions and incentives in case of non-compliance, to assess the financial performance (revenue, profitability, involvement of State's budget) and the performance of the service provided (e.g. via user satisfaction survey) for both companies; - Corporate governance standards in line with the O.E.C.D. framework

E. COMPONENT 5: RENOVATION WAVE

In its National Long-Term Renovation Strategy Romania estimates the need to invest EUR 12,8 billion in building renovations to achieve a reduction of 0,83 Mtoe in the final energy consumption in 2030 compared to the baseline scenario.

The objective of the component is to increase the speed and the quality of the energy renovations both in the public and in the private sector, while addressing the challenge of heritage protection. The reforms and investments in this component aim to achieve reductions of primary energy consumption and final energy consumption in line with the objectives for 2030 set out in the National Long-Term Renovation Strategy.

These investments and reforms shall address Romania's country-specific recommendations of the past two years to "focus investment-related economic policy on [...] low carbon and energy efficiency" (country-specific recommendation 4, 2019) and to "focus on investments for the green [...] transition, in particular on clean and efficient production and use of energy" (country-specific recommendation 3, 2020).

It is expected that no measure in this component does significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measures and the mitigating steps set out in the recovery and resilience plan in accordance with the DNSH Technical Guidance (2021/C58/01).

E.1. Description of the reforms and investments for the loan

Reform 1. Simplified and updated regulatory framework to support the implementation of investments in the transition to green and resilient buildings

The reform shall simplify the legislative and regulatory framework concerning building renovation activities, to accelerate the green transition. The reform shall cover the following sub-reforms:

- R1.a. Codification of legislation supporting the implementation of investments in the transition to green buildings. The Spatial planning, Urban Planning and Construction Code shall link, simplify, and codify in a single legislative act at least 10 legislative acts in the fields of spatial planning, urbanism and construction. The adoption and entry into force of the Code is included in Reform 5 of Component 10 Local Fund by 31 December 2022. The objective of this reform element is to reduce by at least 50 % the time required for the issuance of building permits by the relevant entities, compared to 2020, from 270 days to 135 days for the entire process of obtaining building permits. The Code shall also integrate the key principles of the European Green Deal, such as promoting resource efficiency, nature-based solutions, biodiversity corridors, and circular economy. It shall also promote the digitalisation of the authorisation processes. The implementation of the sub-reform shall be completed by 31 June 2025.
- R1.b. Optimisation of the legislative and regulatory framework to support the implementation of investments in the transition to green buildings. As regards the legislative framework, the Government Emergency Order No 18/2009 on the multiannual national programme for improving the energy performance of residential buildings shall be amended to increase the level of ambition of energy renovations to at least 30% primary energy savings up to 60% primary energy savings for residential buildings. As regards the new technical regulatory framework, it shall include the following guidelines adopted and operational: Nearly Zero Energy Building (NZEB) guidelines, guidelines to facilitate the implementation of the Building Information Modelling (BIM), and a methodology for non-invasive approach to energy and resource efficiency on historical buildings. The new regulatory framework aims to provide guidance on the technical

implementation of NZEB requirements, to support the central public administration authorities responsible for the monitoring of the implementation of the NZEB requirements; and to establish standards to achieve energy and resource efficiency savings for historical buildings without affecting their architectural and historical value. The implementation of the sub-reform shall be completed by 31 December 2022.

Reform 2. Strategic, legislative and procedural framework to support seismic resilience of the buildings stock

The reform shall cover the following sub-reforms:

- R2.a. The adoption of a National Seismic Risk Reduction Strategy. The Strategy shall include an action plan with specific objectives to reduce the seismic risk in the short, medium and long term (2030, 2040 and 2050) for the different types of vulnerable buildings, including raising public awareness and strengthening the institutional capacity of seismic management. The reform shall ensure an integrated and consistent approach between energy and seismic renovations planning, and shall reduce from several years to several months the time needed to effectively complete the prioritisation of the building stock interventions. This reform element shall be implemented through the adoption of the Strategy by the Government and shall be completed by 31 December 2022.
- R2.b. Optimising the legislative framework for seismic risk reduction of existing buildings. The objective of the sub-reform is to improve the existing programme for retrofitting the existing building stock, which in the past did not have an integrated approach to seismic and energy renovations. The sub-reform shall change the programme into a multiannual programme, it shall introduce in the list of eligible expenses the works necessary to increase energy performance, it shall extend it to public buildings and not only private buildings, and also introduce the seismic risk class RSII among the eligible criteria. This reform element shall be implemented through the entry into force of the new law on seismic risk reduction of buildings and its implementation shall be completed by 31 December 2022.

Investment 1. Establishment of a renovation wave fund to finance works to improve the energy efficiency of the existing building stock

The objective of the investment is to increase the energy renovation rate of multi-family buildings and public buildings in Romania. Since Romania is one of the European countries most exposed to seismic risk, energy renovation shall, where required, be carried out in parallel with the seismic renovation to ensure a cost-efficient approach and a long-lasting effect of the investment. The works shall also respect the aesthetics and architectural quality of the building, by taking into account the possible cultural protection requirements of renovation in the case of buildings belonging to cultural heritage. The investment shall also improve the accessibility of buildings by creating facilities and adapting buildings to the needs of persons with disabilities as well as to the ageing population.

The investment shall be carried out along two axes:

- Axis 1 — Investments in residential multifamily buildings for green and resilient transition

A national support scheme for energy efficiency renovation and integrated renovation (seismic consolidation and energy efficiency) of multifamily residential buildings shall be established by 31 March 2022. The objective of the investment is to achieve a total CO₂ savings of at least 0,15 million tons and total primary energy savings at least 0,15Mtep. The scheme shall stipulate that all renovations are, on average, expected to achieve a minimum of 30 % of primary energy demand savings. In case of major renovation of buildings having

more than 10 parking spaces, the cabling infrastructure for each parking space shall ensure the possibility to install charging points for electric vehicles and one charging point for every 5 parking spaces shall be installed.

The Ministry of Development, Public works and Administration shall be responsible for the publication of calls for proposals for local public authorities, while local authorities shall be responsible for the award of contracts. One call for proposals shall cover both the energy efficiency renovation and seismic consolidation of residential buildings and shall be dedicated to the areas with the highest seismic risk. The specification of the call shall require priority to be given to communities at risk of poverty and social exclusion. A separate call for proposals shall cover moderate energy efficiency renovations only and shall be dedicated to communities at risk of poverty and social exclusion. A third call for proposals shall cover moderate (90%) and deep (10%) energy renovations, and shall be allocated to all Local Administrative Units, including the six sectors of Bucharest, according to the number of buildings and their population of the county. If any funds remained uncontracted after this first round, the remaining funding shall be made available at the same conditions to all Local Administrative Units on a first come first served basis.

Multi-family residential buildings classified in the seismic risk class I or II (RSI and RsII) shall be excluded from the financing of energy-efficiency-only interventions.

The implementation of the investments under this axis shall be completed by 30 June 2026.

- Axis 2 — Investments in public buildings for green and resilient transition

A national support scheme for energy efficiency renovation and integrated renovation (seismic consolidation and energy efficiency) of public buildings shall be established by 31 March 2022. The objective of the investment is to achieve a total CO₂ savings of at least 0,075 million tons and total primary energy savings at least 0,0215Mtep. The scheme shall stipulate that all renovations are, on average, expected to achieve a minimum of 30% of primary energy demand savings. In case of major renovation of buildings having more than 10 parking spaces, it shall be ensured that at least one recharging point for electric vehicles or built-in infrastructure is installed.

The Ministry of Development, Public Works and Administration shall monitor the implementation and the works shall be carried out either through the National Investment Company or directly by the relevant central, county councils, county seat municipalities and other municipalities, including the six sectors of Bucharest. The Ministry shall be responsible for the publication of calls for proposals for public authorities. As much as possible, the calls shall be aggregated into centralised large procurement packages and standard tender documentation with performance indicators and specific requirements and technical and economic evaluation procedures shall be developed.

A call for integrated projects (seismic consolidation and energy efficiency) shall be organised for the local administrative units situated in areas at the highest seismic risk. A separate call for projects shall cover moderate (80%) and deep (20%) energy renovations. If any funds remained uncontracted after this first round, the remaining funding shall be made available at the same conditions to all Local Administrative Units on a first come first served basis.

Public buildings classified in the RSI and RsII seismic risk classes shall be excluded from the financing of energy-efficiency-only interventions.

The implementation of the investments under this axis shall be completed by 30 June 2026.

Investment 2. Implementation of the National Building Register

The objective of the investment is to create a national building stock database, indicating key information such as the building typology, its energy consumption and seismic risk. The database shall contribute to the development of policy analyses and programme formulation and evaluation, to identifying target buildings for different programmes, identifying poor/high performance, prioritising investments, and tracking overall progress.

The investment shall set up a National Buildings Register, which is an IT system on the existing national public and private building stock. The register shall be geo-referenced, linked and interoperable with urban data banks at local level and other national registers systems. In the first pilot phase, the register shall include a section with information on all building being renovated under the recovery and resilience plan. This shall allow the monitoring of energy consumption of those buildings.

Building energy passport shall be part of the logbooks and contain all information on energy-related interventions in digital format. Logbooks shall be part of the National Building Register as an integrated system.

The National Buildings Register shall be available online with the pilot section by 31 December 2024.

Investment 3. Strengthening the professional capacity of professionals and workers in renovation by developing trainings on energy efficiency in the construction sector

The objective of the investment is to complement the investments in building renovation by strengthening the skills and capacity of the professionals and workforce in the construction sector, which is currently insufficient to deliver the required ambitious energy renovations.

The training programmes shall consist in short courses in lifelong learning programmes to improve the skills of professionals and workforce with green jobs in the context of energy renovation of buildings, to be delivered in different regions uniformly spread across the Romanian territory. Partnerships between the training centres, universities and relevant institutions shall be developed. The training sessions shall be structured in modules and shall contain both theoretical and practical courses. The investment shall cover the participation of people with disabilities in specialist and training courses/programmes.

The objective of the investment is to develop 10 certification schemes in the area of energy performance of buildings for specialists and qualifications for construction workers, covering a total of at least 8 000 people.

The implementation of the investment shall be completed by 31 December 2023.

Investment 4. Circular economy and increased energy efficiency of historic buildings

The objective of this investment is to tackle the challenges of the energy renovation of historic buildings and resource efficiency such as historic monuments and buildings located in protected areas, through an interdisciplinary and integrated approach implementing the principles of sustainability and the circular economy, in line with the “National Strategy for the Protection of Historical Monuments”. The investment shall promote the collection, repair and reuse of material from renovation works on historic buildings, thus contributing to both heritage conservation and climate and energy and resource efficiency objectives, in line with the EU Renovation wave strategy.

The investment shall i) develop and test new materials and technological solutions for energy and resource efficiency interventions on historic buildings; ii) develop professional skills for energy and resource efficiency intervention on historic buildings; iii) create a pilot centre for

the collection and re-use of historical construction materials from demolition works on historic buildings; iv) ensure the regular maintenance of historic buildings.

A pilot centre within the National Heritage Institute for the collection and re-use of historical building materials shall be operational by 31 December 2024 and 2 certification schemes for energy and resource efficiency interventions on historic buildings shall be developed, covering a total of at least 200 people by 31 December 2025.

E.2. Milestones, targets, indicators, and timetable for monitoring and implementation for the loan

Seq Num.	Related Measure (Reform or Investment)	Milestone / Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target

F. COMPONENT 6: ENERGY

The energy sector is the largest source (66 %) of greenhouse gas (GHG) emissions in Romania. In its National Energy and Climate Plan (NECP) Romania estimates approximately EUR 22,6 billion of investment needs in the energy sector over 2021-2030 to achieve the NECP 2030 policy objectives.

The objective of the component is to address the main challenges of the Romanian energy sector in terms of decarbonisation and air pollution. In particular, it aims to accelerate the decarbonisation of the energy sector by phasing-out lignite and coal fired-power plants by 2032 and by facilitating the deployment of renewables and alternative energy sources, such as green hydrogen. It also aims to increase the flexibility of the electricity grid, digitalise the energy sector, and reduce the energy intensity of industry. The component also intends to improve the corporate governance of state-owned enterprises in the energy sector.

These investments and reforms shall address Romania's country-specific recommendations of the past two years to "focus investment-related economic policy on [...] low carbon and energy efficiency" (country-specific recommendation 4, 2019) and to "focus on investments for the green [...] transition, in particular on clean and efficient production and use of energy and environmental infrastructure, including in the coal regions" (country-specific recommendation 3, 2020).

It is expected that no measure in this component does significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measures and the mitigating steps set out in the recovery and resilience plan in accordance with the DNSH Technical Guidance (2021/C58/01).

F.1. Description of the reforms and investments for non-repayable financial support

Reform 1. Electricity market reform, replacement of coal in the energy mix and support for a legislative and regulatory framework for private investment in renewable electricity production

The objective of the reform is the decarbonisation of the energy sector, with a focus on power generation. The reform covers two main measures: the coal phase-out and the increase of renewables electricity generation capacity.

The first reform element aims to phase-out coal and lignite-fired power plants by 2032. The Decarbonisation law and related secondary legislation setting out the calendar for the decommissioning of the total installed coal and lignite capacity shall enter into force by 30 June 2022. A cumulative 3 780MW of coal and lignite-fired installed electricity production capacity shall be decommissioned by 31 December 2025.

The second reform element aims to facilitate and accelerate the deployment of renewables in the Romanian energy mix. In addition to transposing Union legislation, the new Energy law shall: i) introduce Contracts for Difference (CfD) as the main support mechanism for investments in renewables power production; ii) allow direct negotiation of Power Purchase Agreements (PPAs) by all energy producers; iii) simplify the licensing and authorisation procedures for renewables investments, setting out shorter and mandatory administrative response times and implementing accountability procedures for unnecessary delays; iv) introduce a specific support framework for offshore renewables investments in currently under-exploited regions; and v) implement Demand Side Response in the balancing market to reduce consumption at peak hours and increase the participation of industrial consumers in the energy market.

The new Energy Law shall enter into force by 30 June 2023. As a result of those actions, an additional capacity of at least 3 000MW of renewable energy (wind and solar) shall be put into operation and connected to the grid by 30 June 2026.

Reform 2. Improving corporate governance of state-owned companies in the energy sector

The reform focuses on improving the corporate governance of state-owned enterprises, concentrating on the energy sector. In particular, the reform shall improve the transparency and competitiveness of the selection and appointment of members of the management and/or supervisory boards of state-owned companies in the energy sector. Those boards shall be appointed with a 4-year mandate and the system of remuneration shall be based on quantitative and qualitative objectives related to financial and service performance.

The implementation of the reform shall be completed by 31 December 2022. The reform shall also complete the listing of at least 15 % shares of Hidroelectrica by 30 June 2023.

Reform 3. Green budgeting

Romania currently makes no use of green budgetary practices. The objective of this reform is to allow the monitoring of green budgetary expenditure and the assessment of the environmental and climate impact of fiscal policy. Under this reform, the Ministry of Finance shall develop and apply a methodology for assessing the impact of individual budget lines on environmental objectives, in line with the EU taxonomy for sustainable activities and the DNSH Technical Guidance (2021/C58/01). The reform shall increase the capacity of local public authorities to implement green budgetary practices.

The methodology shall be adopted, published and implemented by 30 September 2023.

Investment 1. New capacities for electricity generation from renewable sources

The objective of the investment is the installation of new renewable power production capacity through a technologically neutral competitive public tender between different technologies (wind and solar). The projects shall comply with the relevant annexes of the Commission Delegated Regulation (EU) (C(2021) 2800/3) under the Taxonomy Regulation (EU) (2020/852).

The investment shall consist in grants for the construction of the selected installations, with the objective of installing 950MW of renewables power production capacity, or the maximum volume compatible with the tender being held in competitive conditions.

The implementation of the investment shall be completed by 30 June 2024.

F.2. Milestones, targets, indicators, and timetable for monitoring and implementation for non-repayable financial support

Seq. Num.	Related Measure (Reform or Investment)	Milestone / Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target

			sources (wind and solar)							compliance with the ‘do no significant harm’ Technical Guidance (2021/C58/01). The measure shall be open for both SMEs and large investors.
125	Investment 1. New capacities for electricity generation from renewable sources	Target	Additional capacity installed from renewable sources (wind and solar)		Megawatts (MW)	0	950	Q2	2024	950 MW capacity of renewables (wind and solar) commissioned and connected to the grid, in compliance with the conditions in milestone 124, or the maximum volume compatible with the tender being held in competitive conditions.

F.3. Description of the reforms and investments for the loan

Reform 4. Developing a favourable legislative and regulatory framework for future technologies, in particular hydrogen and storage solutions

The objective of the reform is to amend the existing legislative and regulatory framework to introduce measures to support and facilitate the deployment of renewable hydrogen, with a focus on the transport and energy (gas and electricity) sectors. In particular, the reform shall develop a National Hydrogen Strategy and a Strategy Action Plan, setting the timetable for the implementation of the measures in the Strategy. The reform shall remove any legislative and administrative obstacles for the development of the renewable hydrogen technology and contribute to the achievement of the future national and European targets for the production, storage, transport and use of renewable hydrogen by 2030.

By way of regulation, hydrogen-ready appliances (such as boilers) and equipment shall be mandatory as of 1 January 2026 for all new installations.

In line with Article 7 (2) of the Recovery and Resilience Regulation, Romania has requested technical support through the instrument on technical assistance for the development of the National Hydrogen Strategy, including the definition of a set of policies to guide, coordinate and mobilise public and private investment in the areas of production, storage, transport and consumption/use of hydrogen (renewable gases), including the revision of the legislative framework necessary to stimulate this area. The amendments to the legislative and regulatory framework based on the National Hydrogen Strategy and relevant Action Plan shall be completed by 31 March 2023.

Reform 5. Reducing the energy intensity of the economy by developing a sustainable mechanism to boost energy efficiency in industry

The objective of the reform is to facilitate investments in energy efficiency in industry and increase the resilience of the industrial sector.

The reform shall: i) remove obstacles to energy performance contracting; ii) introduce market surveillance for energy efficiency to ensure product compliance with eco-design standards, iii) improve SMEs awareness of energy efficiency measures, programmes and benefits; iv) create a monitoring system for the implementation of the recommendations from energy audits in the ETS sectors; v) introduce new standards for green financial instruments.

The implementation of the reform shall be completed by 31 December 2022.

Reform 6. Increasing competitiveness and decarbonisation of the heating — cooling sector

The objective of the reform is to contribute to the decarbonisation of the heating and cooling sector.

The reform shall: i) clarify the framework of responsibilities between central and local authorities for the management of the heating and cooling sector and extend the application of the Corporate Governance Act to district heating suppliers; ii) ensure the sustainability and traceability of biomass to prevent any negative impact of bioenergy use on biodiversity and forests and diversify the energy mix in heating and cooling outside forest biomass; iii) allow apartment blocks and their associations of tenants to produce and sell excess solar and possibly wind energy in more flexible forms, by creating net metering schemes, simplifying connection procedures and introducing incentives.

The implementation of the reform shall be completed by 31 December 2023.

Investment 2: Distribution infrastructure of renewable gases (using natural gas in combination with green hydrogen as a transitional measure), as well as green hydrogen production capacities and/or its use for electricity storage

The objective of this investment is to contribute to the deployment of green hydrogen in line with the EU Strategy for hydrogen.

The investment has two sub-investments: the construction of a gas distribution network enabling the transport of green hydrogen in the Oltenia region and the installation of electrolyzers for the production of green hydrogen.

The objective of the first sub-investment is to build at least 1 870km of network for the distribution of green hydrogen in the Oltenia region.

It is expected that this measure does not do significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measure and the mitigating steps set out in the recovery and resilience plan in accordance with the DNSH Technical Guidance (2021/C58/01). In particular, the distribution network shall carry at least 20 % of renewable hydrogen (by volume) when commissioned by 30 June 2026 and 100% renewable hydrogen and/or other renewable gases in 2030. To obtain the award of the contract, the operator shall demonstrate that the technical features of the infrastructure enable the transport of renewables gases, including green hydrogen. The operator shall also indicate the source of supply of required volumes of green hydrogen to be blended with natural gas to reach the minimum blending of 20% at the time of commissioning. Moreover, digital systems and components integrating ICT, control systems and sensor technologies shall be an integral part of the measure to enable the interactive and intelligent monitoring, metering, quality control and management of hydrogen production, transmission, distribution and consumption within the network. To ensure the safe use of the network with the blending of at least 20% hydrogen, legislative changes foreseen in Reform 2 shall ensure that only hydrogen-ready appliances and equipment shall be connected to this network.

The objective of the second sub-investment is the installation of green hydrogen production capacities of at least 100 MW in electrolyzers, producing at least 10 000 tonnes of hydrogen from renewable sources by 31 December 2025.

Investment 3: Development of flexible and highly-efficient gas-fired electricity and heat generation (CHP), district heating, to achieve deep decarbonisation

The objective of the investment is to contribute to addressing Romania's challenges in the transition away from coal and lignite energy sources. In particular, the investment shall ensure the provision of heat to consumers in the context of the phasing out of coal-fired power and heat production.

The investment shall lead to the installation of at least 300 MW electricity production capacity of future-proof, flexible and high-efficient gas-fired Combined Heat and Power enabled for the use of renewable and low-carbon gases.

It is expected that this measure does not do significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measure and the mitigating steps set out in the recovery and resilience plan in accordance with the DNSH Technical Guidance (2021/C58/01). This is ensured through the following accompanying measures:

- Reform 2 in component 6, combined with Investment 2 in component 6 include credible plans to increase usage of renewable and low-carbon gases through the adoption and

implementation of a National Hydrogen Strategy and Action Plan and the installation of renewable hydrogen production capacities; and

- Reform 1 in component 6 results in the closure of coal and lignite power and heat generation facilities, which is significantly more carbon-intensive than the high-efficient gas-fired Combined Heat and Power under this investment. The closure of a cumulative amount of 3 780MW of coal/lignite-fired capacity shall occur by 31 December 2025 and the capacity is significantly higher than the 300 MW gas-fired Combined Heat and Power to be installed under this investment and the 1 300MW of gas-fired capacity that is planned to be installed as a replacement; and
- Reform 1 in component 6 results in at least 3 000MW of additional renewables capacity being installed by 2026, which shows that Romania has a credible trajectory for increasing the share of renewables towards their 2030 renewables target set out in the National Energy and Climate Plan. As Romania intends to increase that target, a second round of auction for the award of Contracts for Difference for renewables shall be launched by 30 June 2025 to demonstrate a credible trajectory for increasing the share of renewables towards the increased target; and
- Reform 1 in component 6 includes concrete reforms and investments to increase the share of renewables, such as the implementation of the Contracts for Difference (CfD), the establishment of renewables Power Purchase Agreements (PPAs), the simplification of the licensing and permitting procedures for renewables investments, short and binding administrative response times and accountability procedures for unnecessary delays, reduction of the necessary documentation and procedures, and introduction of a new dedicated framework for offshore renewables plants.

In addition, the National Air Pollution Control Programme (NAPCP), which should have been submitted to the Commission by April 2019 as an EU legal requirement based on the Directive (EU) 2016/2284, shall be approved by 30 June 2022 (see footnote 1 above).

The implementation of the investment shall be completed by 30 June 2026.

Investment 4. Industrial chain of production and/or assembly and/or recycling of batteries, cells and photovoltaic panels (including auxiliary equipment), as well as new electricity storage capacities

The objective of the investment is to increase the flexibility of the electricity grid and to contribute to the integration of additional renewables generation capacities.

The investment has three sub-investments:

- The first sub-investment in the battery value chain (manufacturing, assembly, and recycling) shall achieve a total battery manufacturing and assembly yearly capacity of at least 2GW by 31 December 2025, following a call for projects with selection criteria ensuring compliance with the “do no significant harm” Technical Guidance (2021/C58/01). These criteria shall in particular exclude activities related to waste landfills, incinerators² and mechanical biological treatment plants³ from support under this measure, as well as activities related to the mining of raw materials.

² This exclusion does not apply to actions under this measure in plants exclusively dedicated to treating non-recyclable hazardous waste, and to existing plants, where the actions under this measure are for the purpose of increasing energy efficiency, capturing exhaust gases for storage or use or recovering materials from incineration ashes, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

- The second sub-investment in the value chain of photovoltaic cells and panels (manufacturing, assembly, and recycling) shall achieve a total yearly capacity of at least 200MW of photovoltaic cells and panels by 31 December 2025, following a call for projects with selection criteria ensuring compliance with the “do no significant harm” Technical Guidance (2021/C58/01). These criteria shall in particular exclude activities related to waste landfills, incinerators⁴ and mechanical biological treatment plants⁵ from support under this measure, as well as activities related to the mining of raw materials.
- The objective of the third sub-investment is to install a total electricity storage capacity of at least 240MW (or 480MWh) by 31 December 2025, following a call for projects with selection criteria ensuring compliance with the “do no significant harm” Technical Guidance (2021/C58/01).

The implementation of the investment shall be completed by 31 December 2025.

Investment 5. Ensuring energy efficiency in the industrial sector.

The objective of the investment is to increase the energy efficiency of the industry, such as reducing energy consumption, developing systems to digitise energy consumption metering, and increasing energy and heat self-consumption.

The investment shall achieve at least a 30 % reduction in direct and indirect GHG emissions compared to ex-ante emissions for at least 50 projects, to be monitored through an IT platform for centralising and analysing national energy consumption.

In order to ensure that the measure complies with the ‘Do no significant harm’ Technical Guidance (2021/C58/01), the eligibility criteria contained in terms of reference for upcoming calls for projects shall exclude the following list of activities: (i) activities related to fossil fuels, including downstream use⁶; (ii) activities under the EU Emission Trading System (ETS) achieving projected greenhouse gas emissions that are not lower than the relevant benchmarks⁷; (iii) activities related to waste landfills, incinerators⁸ and mechanical biological

³ This exclusion does not apply to actions under this measure in existing mechanical biological treatment plants, where the actions under this measure are for the purpose of increasing energy efficiency or retrofitting to recycling operations of separated waste to compost bio-waste and anaerobic digestion of bio-waste, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

⁴ This exclusion does not apply to actions under this measure in plants exclusively dedicated to treating non-recyclable hazardous waste, and to existing plants, where the actions under this measure are for the purpose of increasing energy efficiency, capturing exhaust gases for storage or use or recovering materials from incineration ashes, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

⁵ This exclusion does not apply to actions under this measure in existing mechanical biological treatment plants, where the actions under this measure are for the purpose of increasing energy efficiency or retrofitting to recycling operations of separated waste to compost bio-waste and anaerobic digestion of bio-waste, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

⁶ Except projects under this measure in power and/or heat generation, as well as related transmission and distribution infrastructure, using natural gas, that are compliant with the conditions set out in Annex III of the ‘Do no significant harm’ Technical Guidance (2021/C58/01).

⁷ Where the activity supported achieves projected greenhouse gas emissions that are not significantly lower than the relevant benchmarks an explanation of the reasons why this is not possible should be provided. Benchmarks established for free allocation for activities falling within the scope of the Emissions Trading System, as set out in the Commission Implementing Regulation (EU) 2021/447.

treatment plants⁹; and (iv) activities where the long-term disposal of waste may cause harm to the environment. The terms of reference shall additionally require that only activities that comply with relevant EU and national environmental legislation may be selected.

The implementation of the investment shall be completed by 31 December 2025.

⁸ This exclusion does not apply to actions under this measure in plants exclusively dedicated to treating non-recyclable hazardous waste, and to existing plants, where the actions under this measure are for the purpose of increasing energy efficiency, capturing exhaust gases for storage or use or recovering materials from incineration ashes, provided such actions under this measure do not result in an increase of the plants' waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

⁹ This exclusion does not apply to actions under this measure in existing mechanical biological treatment plants, where the actions under this measure are for the purpose of increasing energy efficiency or retrofitting to recycling operations of separated waste to compost bio-waste and anaerobic digestion of bio-waste, provided such actions under this measure do not result in an increase of the plants' waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

F.4. Milestones, targets, indicators, and timetable for monitoring and implementation for the loan

Seq. Num.	Related Measure (Reform or Investment)	Milestone / Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
					Unit of measure	Base line	Goal	Quarter	Year	
126	Reform 4. Developing a favourable legislative and regulatory framework for future technologies, in particular hydrogen and storage solutions	Milestone	Entry into force of the amendments to the legislative framework, implementing the National Hydrogen Strategy	Provision in the law indicating the entry into force of the amendments to the legislative framework				Q1	2023	Entry into force of the amendments to the regulatory framework based on the National Hydrogen Strategy and relevant Action Plan. The amendments shall remove any legislative and administrative obstacles to the development of the renewable hydrogen technology and implement measures needed for the development of the whole renewables hydrogen value chain, including the mandatory use of hydrogen-ready appliances and equipment by end-users by 1 January 2026.
127	Reform 5. Reducing the energy intensity of the economy by developing a sustainable mechanism to boost energy efficiency in	Milestone	Entry into force of the legislative framework introducing measures to facilitate investment in energy efficiency in the	Provision in the law indicating the entry into force of the legislative act				Q4	2022	Entry into force of the legislative framework introducing measures to facilitate investment in energy efficiency in the industry. The reform shall: i) remove obstacles to energy performance contracting; ii) introduce market surveillance

										centralising and analysing national energy consumption, in line with the conditions for compliance with the Do No Significant Harm Technical Guidance (2021/C58/01), as set out in milestone 140.

G. COMPONENT 7: DIGITAL TRANSFORMATION

This component of the recovery and resilience plan addresses digitalisation challenges related to the public administration such as fragmentation, interoperability as a major obstacle in the development of the end-user centred digital services, bureaucratic barriers to obtaining building permits necessary for network constructions, low basic and advanced digital skills, exposure to cyber risks. Against this background, the objective of this component is to tackle all these challenges and to achieve a coherent and integrated digital infrastructure for the benefit of citizens and businesses, while providing the necessary tools (such as connectivity, skills development or cybersecurity) for the transition to a digitalised economy and society. In particular, the component includes reforms necessary to set up the governmental cloud and to ensure interoperability, improving connectivity, increasing the protection and the cybersecurity of public and private entities and increasing the digital competences for the public sector. The investments underpinning the reforms range from the development of the governmental cloud to digitalisation of health, judiciary, environment, employment and social protection, public procurement, non-governmental organisations, connectivity for white areas, ensuring cybersecurity for different structures and increasing the skills both in cybersecurity and for civil servants and the population at large. One key investment refers to the deployment of the electronic identity card for the Romanian citizens.

The component is structured in 4 reforms and 19 investments.

These investments and reforms shall contribute to address Romania's country-specific recommendations of the past two years to "Improve skills, including digital" (country-specific recommendation 3, 2019) and to "strengthen skills and digital learning" and "focus investment on the green and digital transition, [...], digital service infrastructure" (country-specific recommendations 2 and 3, 2020).

It is expected that no measure in this component does significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measures and the mitigating steps set out in the recovery and resilience plan in accordance with the DNSH Technical Guidance (2021/C58/01).

G.1. Description of the reforms and investments for non-repayable financial support

Reform 1. Development of a unitary framework for defining the architecture of a government cloud system

The objective of this reform is to modernise the public administration by adopting advanced technologies and focusing on the citizens and businesses' needs, while ensuring the prerequisites for data-driven policy development and increasing the interoperability of existing digital technologies. Furthermore, the reform shall support the development of an integrated architecture of public digital services.

The implementation of this reform shall consist in two lines of action. First, the entry into force of the Information Systems Interoperability Law is expected to detail the uniform set of standards and rules that public entities shall apply for the development of applications in a secure and sustainable environment, while aligning with the European Interoperability Framework. Second, the entry into force of the Government Cloud Act is expected to set out the responsibilities and tasks regarding the design, implementation, development and management of the cloud infrastructure, technologies and services. Cybersecurity shall be provided for both for the external

and internal protection of the cloud, applying the most advanced and economically efficient cyber-security available solutions.

A temporary task force formed by specialists is expected to be put in place for the monitoring and implementation of all digital-related measures in the Romanian recovery and resilience plan.

The implementation of the reform shall be completed by 30 June 2022.

Reform 2. Transition to EU 2025 connectivity targets and stimulate private investment for the deployment of very high capacity networks

The objective of this reform is to accelerate the national roll-out of 5G networks, in accordance with security regulations, and provide broadband coverage for white areas (small rural municipalities, isolated localities, disadvantaged inhabited areas), tackling the rural – urban digital divide, reducing the administrative burden and streamlining procedures and fees, creating the prerequisites for equal access to digital services and internet access.

The reform shall include several actions:

- The implementation of Romania's roadmap applying of the Connectivity Toolbox¹⁰. Romania is expected to implement 12 out of the 39 recommendations included in the toolbox at EU level.
- The entry into force of the 5G network security law which shall foresee that communication providers shall only be able to use technologies, equipment and software in 5G networks from manufacturers authorised in advance by decision of the Prime Minister, on the basis of the opinion of the Supreme Council of National Defence. Each manufacturer of 5G equipment and software shall have to apply for this authorisation, which shall be submitted to the Ministry responsible for Communications.
- The (auction for) granting the so called "5G licenses" (i.e. in the 700 MHz, 1500 MHz and 3,4 – 3,8 GHz bands). Long term licences are envisaged as per the European Electronic Communications Code criteria to efficiently stimulate 5G, promote competition and end-users' rights.

The implementation of the reform shall be completed by 30 September 2023.

Reform 3. Ensuring cybersecurity of public and private entities owning critical value infrastructure

The objective of this reform is to continue the process of strengthening the resilience of the public and private entities owning critical infrastructure against cyber risks.

The implementation of this reform shall establish the legal and institutional framework for the organisation and conduct of activities in the areas of cybersecurity and cyber defence, cooperation mechanisms and responsibilities of institutions in these areas by finalisation and entry into force of the Defence and Cybersecurity Law. Furthermore, the Cyberint National Centre coordinates the preparation of the National Cybersecurity Strategy 2021-2026, which includes provisions regarding regular assessments and updates of the cybersecurity regulatory and institutional framework aiming to strengthen the public-private-academic partnership to increase the cyber resilience of society as a whole, to develop the capacity to respond to cyber-

¹⁰ https://ec.europa.eu/newsroom/dae/document.cfm?doc_id=75185

attacks and the resilience of systems, networks and services and to consolidate the role of Romania in the cybersecurity architecture at international level.

The implementation of the reform shall be completed by 31 December 2022.

Reform 4. Increasing digital competence for public service and digital education throughout the life for citizens

The objective of this reform is to support the digitalisation of the economy and the transition to industry 4.0 and to align the labour market to the latest developments in this sector.

The reform shall be implemented through the entry into force of the amendment of the Classifications of Occupations Code including the definition of new digital occupations, equivalent to other EU countries. An analysis shall be performed as well as consultations with universities and other relevant stakeholders.

The implementation of the reform shall be completed by 30 September 2022.

Investment 1. Deployment of the Government Cloud Infrastructure

The objective of this investment is to deploy the government cloud infrastructure, using secure and energy-efficient technologies to ensure the safe, interoperable and standard character of the public data.

The implementation of this investment shall include: i) the construction of Tier IV data centres by design for the two main data centres and Tier III by design for secondary ones, ii) provision of specific communication and information technology infrastructure, iii) development and expansion of the support infrastructure (electricity, physical security measures), iv) deployment of scalable and high-availability IT&C infrastructure in each data centre. The data centres shall be compliant with the “European Code of Conduct on Data Centre Energy Efficiency”.¹¹

This implementation of this investment shall be supported by an assessment performed by an external consultant which is expected to provide the strategic and technological options and the legislative and regulatory package to determine the achievement of the Government Cloud, the possibilities for the construction, delivery, installation and operation of civilian and technological infrastructures in accordance with the deadlines laid down in the Plan, mapping of public digital applications/services currently offered by state authorities of, design of processes and procedures implemented in production and/or at implementation stages and the cloud development/migration plan of the mapped applications.

At least 30 public institutions shall be connected and use the Government Cloud.

The implementation of the investment shall be completed by 31 December 2025.

¹¹ Available at <https://e3p.jrc.ec.europa.eu/publications/2021-best-practice-guidelines-eu-code-conduct-data-centre-energy-efficiency>

Investment 2. Cloud development and migration

The objective of this investment is to upgrade the technologies used in public institutions so that they become cloud ready, while also developing new cloud-native applications for cloud migration.

The implementation of this investment is expected to lead to a minimum of cloud-ready/virtualised applications to migrate in the cloud, based on the analysis that shall be developed by the external consultant to support the government in the deployment of the government cloud. It is expected that at least 30 government cloud-native digital service applications are migrated in Platform-as-a-Service (PaaS) or Infrastructure-as-a-Service (IaaS).

The implementation of the investment shall be completed by 30 June 2026.

Investment 3. Development of eHealth and telemedicine system

The objective of this investment is to reduce working time for healthcare providers, the National Health Insurance House and Health Insurance House employees, while ensuring cybersecurity of the Health Insurance IT Platform (PIA). The capacity of central, regional and local health institutions shall be further strengthened to digitally manage health data and the uptake of telemedicine solutions shall be sped up.

The investment also aims to foster the integration of health institutions through digital infrastructure, easing the access to data for the Ministry of Health and other stakeholders (such as public health directorates), reducing fragmentation and increasing the quality of health data.

The investment equally aims at increasing the access of rural areas and small urban areas and vulnerable groups to specialised consultations, while reducing the waiting time by using telemedicine. Increasing the access to information and education to prevent unplanned pregnancies and family planning are also targeted by telemedicine.

Several steps shall be followed in the implementation phase of this investment. First, a needs assessment for the current PIA, mapping the available infrastructure and existing gaps shall be conducted. Second, PIA shall be transformed through a software solution from a modular and fragmented system to a system that is interoperable, user-friendly and has optimised data flows, electronic monitoring of objectives, activities and performance indicators of the healthcare providers and with new functionalities (such as digitalisation of medical related documents). The role of PIA shall be extended beyond the National Health Insurance House through the development of additional modules for all the institutions involved in health policies at national level for modular disease registries and interface for telemedicine and patient monitoring. Communication between patient and doctor and between doctors is expected to be supported, focusing in particular on vulnerable groups or regions. The investment shall be underpinned by training and acquisition of equipment. Furthermore, new computer modules and applications shall be developed as well as new digital registration and administration systems, based on interoperable and centralised data. A telemedicine system shall be designed to provide real time and asynchronous access to specialised consultations for patients in rural and small urban areas.

The implementation of the investment shall be completed by 30 September 2025.

Investment 4. Digitalisation of the judiciary

The objective of this investment is to support the preparation and transition of the Romanian judicial system to a centralised electronic case management system. Romania is already developing using other EU funds the ECRIS system (electronic case management system) and the recovery and resilience plan shall complement the efforts in this regard.

The investment consists of the following actions:

- the technical transition from local to shared central servers – it shall optimise the management and usage of technical resources (central servers, data centres, virtualisation servers).
- upgrade and finalisation of the technical infrastructure for teleworking and digitalisation of documents with the aim of increasing the resilience of the judicial system.
- improvement of cybersecurity capabilities (by providing equipment and training) both at central and local level (in particular to courts, but also to prosecutors' offices).
- implementation of a new system allowing secure videoconferencing for the participation of judges in online activities at the level of the High Court of Cassation and Justice.
- support the finalisation of ECRIS V system, which is the central element of the digital transformation of the judiciary in Romania. The development of the system, a part of procurement of related software and supporting hardware and the training of users is financed by the Operational Programme Administrative Capacity. Under the recovery and resilience plan, complementary measures shall be financed (such as: procurement of a part of the supporting equipment as part of the virtualisation project which shall facilitate the transition from ECRIS IV to ECRIS V, the setting up of the data centre for the judiciary which shall also host ECRIS V, procurement of PCs and other equipment for the end-users).

This investment underpins the strategy for the development of the judiciary 2022-2025 which includes specific measures to ensure digital interaction of the litigant and any interested entity with the judiciary, electronic signature and electronic seal, availability of improved data communication for e-file (which is an option for litigants to electronically access the judicial files), elaboration of a cross-judicial sector strategy for the digitisation of the physical archive (milestone 421).

The implementation of the investment shall be completed by 30 June 2026.

Investment 5. Digitalisation in the field of the environment

The objective of this investment is to implement an integrated IT system to support sustainable development, improve infrastructure and environmental quality, protect nature and preserve biodiversity.

The investment consists in two main actions:

- the development of the necessary infrastructure for the supervision, control and assurance of forest integrity and the transport of wood. This system shall be implemented in two phases (installation and configuration of the IT system and implementation of security solutions for confidentiality, training, operationalisation of a platform for investigations and alerts). The system shall be integrated with SUMAL 2.0 (the Romanian Wood Traceability System currently under development) and shall monitor legal obligations related to wood harvesting, timely forest regeneration, forest health, forest habitat conservation status, climate change

impacts and adaptation to climate change of different forest ecosystems. The system's data centres shall comply with the "European Code of Conduct on Data Centre Energy Efficiency".

- the digitalisation of 32 environmental public services (such as transmission of data and information necessary for the calculation and reporting of emission inventories, Natura 2000 reporting, nature Conservation - service on derogations and by-catches of strictly protected species, the management of the national register of zoo gardens, public aquariums and rehabilitation centres, ecosystem management service, the management plans of protected natural areas, the management of the register of authorisations issued by the county environmental agencies for the activities of harvesting / capturing and / or commercialization of the species of wild flora and fauna carried out by individuals and legal entities, the management of notification and authorization procedures in the field of GMMs (genetically modified micro-organisms) and GMOs (genetically modified organisms), public service notifications SEVESO - service for accident / incident notifications sent by economic operators, as well as classification notifications within the meaning of Directive 2012/18/ EU (SEVESO III), with interoperability with IGSU, EMAS registration service - manages organizations that adhere to a community eco-management and audit scheme, EPRTR application for reporting purposes of the economic operators, Service for Industrial Emissions, Service for issuing permits, agreements, authorizations and integrated environmental permits integrated with the document management system, Soil-Underground public service (management of data on potentially contaminated, contaminated and remedy sites), laboratory analysis public service in the field of waste, noise, radioactivity, waste generation and management reporting services, reporting services on the generation and management of waste packaging, end-of-life vehicle reporting service, service on the approval / rejection of cross border waste shipments, service for the registration of producers of batteries and accumulators, service for the registration of manufacturers of electrical and electronic equipment and for reporting data on the generation and management of electrical and electronic equipment waste, chemical reporting service in accordance with art. 36 of Regulation 1907/2006 - REACH and art. 46 and 49 of Regulation 1272/2008 – CLP, safety reports for high level sites, major accident prevention policy for low level sites, emergency plan, domino effect between installations, according to the implementation of the EU SEVESO III Directive, service to request the ecological label for legal entities, service for presenting the cases of environmental damage registered in Romania, monitoring emissions from medium combustion plants, public greenhouse gas emission permit service, registration service for economic operators that are not subject to environmental authorization in order to meet the requirements established by EU Directive 2008/98, service for issuing approvals and evaluation reports (for biocidal products, plant protection products and fertilisers), data reporting service for selective waste collection in public institutions.

The implementation of the investment shall be completed by 30 June 2026.

Investment 6. Digitalisation in employment and social protection

The objective of this investment is to increase the level of digitalisation for several services in the field of labour and social protection, underpinned by equipment purchases and training for the personnel.

The investment consists in several actions:

- digitalisation of the services offered by ANOFM (National Employment Agency) (such as online submission of documents for registration of beneficiaries and award of benefits, possibility to register and attend online trainings and the assessment of professional competences, online advisory sessions) and upgrade of the IT infrastructure.
- digitalisation of the Territorial Labour Inspectorate (ITM) targeting the control activity in the field of labour relations and occupational safety and health (IT system, electronic signatures, simplification of the notification procedure). Furthermore, REGES-ONLINE project is expected to aims to digitise the Territorial Labour Inspectorates relationship with employers, facilitating the transmission of data about employees and their individual employment contracts.
- digitalisation of social assistance benefits managed by the National Agency for Payments and Social Inspection - ANPIS (including functional IT Systems that for serving Minimum Inclusion Income beneficiaries). For ANPIS is envisaged the development of tools for document and information management, real-time communication channels with citizens, digitalisation and processing tools, while ensuring the security of the data. In addition, in synergy with the reform included in component 13 (social reforms) of the Recovery and Resilience Plan, it is expected the operationalisation of the digital platform for the implementation of the Minimum Inclusion Income.
- digital skills trainings for employees of ANOFM, ANPIS and ITM.

The implementation of the investment shall be completed by 30 June 2026.

Investment 7. Implementation of eForms electronic forms in the field of public procurement

The objective of this investment is to operationalise the standard electronic forms to be used for the publication of public procurement notices, which shall streamline the public procurement practices at national and European level, in line with Implementing Regulation (EU) 2019/1780 establishing standard forms for the publication of notices in the field of public procurement and repealing Implementing Regulation (EU) 2015/1986.

The investment shall include an analysis of the legal requirements at EU level and a comparison to the previous forms and shall proceed with the schemes, code lists, business and validation rules and labels, assess the system integration requested, shall adapt e-forms, define and implement the eForms data model, the electronic forms and notifications. Furthermore, the eForms shall be integrated with other tools and services (such as the Business Intelligence system of the National Public Procurement System) and trainings shall be provided for users.

The implementation of the investment shall be completed by 30 June 2023.

Investment 8. Qualified electronic identity card and digital signature

The objective of this investment is to support the transition and adoption of the electronic identity card (e-ID card) by the Romanian citizens. The investment is key for facilitating the digital interaction between the public/private entities and citizens.

The investment is expected to deliver 8,5 million electronic identity cards during the national recovery and resilience plan implementation. The e-ID card shall store two digital certificates: i) one which shall make possible the authentication for using public administration online services and ii) an optional one for the qualified electronic signature issued by qualified certification service providers.

The implementation of the investment shall be completed by 30 June 2026.

Investment 9. Digitalisation of the non-governmental organisations sector

The objective of this investment is to support the digital transformation of the non-governmental organisations (NGOs) and to increase the level of digital literacy among the employees.

The investment consists of a call for projects and shall award 200 grants (of maximum EUR 70 000 for a period of implementation of maximum 30 months) to NGOs for investments in digital infrastructure, digital skills of staff and volunteers, development of Customer Relationship Management platforms, and purchase of equipment. In addition, under this investment a Resource centre for the digital transformation of NGOs shall be established. The centre shall support the development of IT services and open-source software solutions and technical assistance in the implementation of digital transformation strategies, centralising existing digital resources in an open digital bookshop enabling easier access, assistance, e-learning and training, communities of practice, and customised support in digital transformation processes.

The implementation of the investment shall be completed by 30 June 2025.

Investment 10. Digital transformation in civil service management

The objective of this investment is to improve the civil service by reducing bureaucracy and increasing the quality of the public services through a well-trained and professional civil service. This investment is linked to component 14 (Good governance).

The investment consists of operationalising two interoperable platforms:

- e-ANFP – development and extension of the civil service management platform (central, territorial, local level) for all career processes (recruitment, assessment, promotion, exit from the public system, based on a standardised competency framework and job descriptions) and interconnection with collaborating institutions.
- SIMRU (Integrated Human Resources Management System) – development of the internal management platform for public authorities for human resources processes (personnel data management, organisational management, time management, objective setting, and reporting).

The implementation of the investment shall be completed by 31 December 2025.

Investment 11. Implementation of a scheme to support the use of communication services through different types of instruments for beneficiaries, with a focus on white areas

The objective of this investment is to provide coverage of very high-speed internet access to areas where the market cannot deliver these services on its own (villages, including disadvantaged areas). The minimum speed shall be at least 100 Mbps upgradeable and the networks shall be FTTB/H and/or 5G.

The investment consists of two priority streams: i) the absolute priority which targets totally white rural municipalities not served with fixed networks, but where there is latent demand or socio-economic drivers and ii) the underlying priority which aims for fixed networks where speeds need to be improved and the market fails to cover these needs. The investment shall finance passive infrastructure and active network elements, backhaul and access segment, the setting up of new networks or upgrading existing ones.

The implementation of the investment shall be completed by 31 December 2025.

Investment 12. Ensuring cybersecurity protection for both public and private IT & C infrastructures with critical value for national security, using smart technologies

The objective of this investment is to strengthen the capacity of the Cyberint national centre and to ensure the security of the infrastructures of a minimum 101 institutions and entities with critical ICT infrastructures at national level (ministries, agencies, energy suppliers/distributors, health, transport, water supply).

The investment consists of several lines of action:

- Providing cybersecurity solutions, equipment and training for entities selected based on the degree of vulnerability to cyber-attacks, potential impact of a cyber-attack on the services provided, the likelihood to be targets to major cyber-attacks, national/regional coverage, and the number of recipients of services provided by the entities.
- Development of the capacities of the Cyberint national centre by operationalising a platform for security and channeling of data for transfer between networks of different confidence levels and increasing the investigative capacity of the centre.

The implementation of the investment shall be completed by 31 December 2025.

Investment 13. Development of security systems for the protection of the government spectrum

The objective of this investment is to secure the wireless communications in central and local public institutions and authorities. In particular, the investment aims to implement wireless vulnerability prevention mechanisms in communication systems, develop wireless vulnerability detection solutions in communication systems, and create a unified wireless vulnerability management system in communication systems.

The investment shall be implemented by the creation of a new network of sensors distributed at the national level, placed on dedicated reception sites to detect and alert automatically in case of disturbances in the radio governmental spectrum.

The implementation of the investment shall be completed by 31 March 2026.

Investment 14. Increase of the resilience and cybersecurity of Internet Service Provider infrastructure services provided to public authorities in Romania

The objective of this investment is to increase the resilience of the Internet Service Provider (ISP) infrastructure for the public authorities, while ensuring their cybersecurity.

The investment consists in update and expansion of the gigabit internet access network for the public administration, upgrade of the cybersecurity capabilities, securing the ISP services (DNS, web, e-mail, hosting). Every county of Romania shall be connected to a national Internet distribution network.

The implementation of the investment shall be completed by 31 December 2024.

Investment 15. Creation of new cybersecurity skills for society and the economy

The objective of this investment is to support the development of cybersecurity skills both for students, as well as for public and private players.

The investment consists of two main actions:

- the implementation of cybersecurity trainings for 5 000 teachers (at pre-university and university levels) who shall pass their newly acquired knowledge to students all around Romania. This part of the investment shall raise the awareness of cybersecurity and shall contribute to a longlasting effect for the economy and society.
- a toolkit to increase the cybersecurity maturity for 1 000 players shall be developed based on an initial assessment which shall focus on operational, technology and skills of the target group.

The implementation of the investment shall be completed by 30 June 2026.

Investment 16. Advanced digital skills training programme for civil servants

The objective of this investment is to increase the advanced digital skills of the civil servants, aiming to support the digitalisation of the public services by improving the availability of qualified workforce for internal IT&C operations.

The investment consists in trainings for advanced digital skills (database management, system management, business analysis, data analysis, programming) for 32 500 civil servants (out of which 2 500 seniors). A training needs analysis shall be conducted beforehand.

The implementation of the investment shall be completed by 30 June 2026.

Investment 17. Funding schemes for libraries to become digital skills hubs

The objective of this investment is to enhance the basic digital skills of communities with limited access to digital training and of marginalised groups. The investments consist of the reconversion of 105 libraries into hubs for the development of digital skills, underpinned by additional funds for 1 030 libraries to change/upgrade their IT equipment. Under this investment, it is expected that basic skills such as digital literacy, communication, media literacy, digital content creator, digital security, and digital entrepreneurial education shall be developed for 100 000 citizens from disadvantaged communities.

The implementation of the investment shall be completed by 30 June 2026.

G.2. Milestones, targets, indicators, and timetable for monitoring and implementation for non-repayable financial support

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target

The basic digital skills shall include digital literacy, communication, media literacy, digital content creator, digital security, digital entrepreneurial education.

G.3. Description of the reforms and investments for the loan

Investment 18. Digital transformation and Robotic Process Automation in public administration

The objective of this investment is to support the digital transformation, increase productivity and resilience, reduce errors and time to process (citizens) requests the public administration by adopting Robotic Process Automation solutions (automation of laborious, repetitive and rules-based tasks).

The investment consists in the deployment of advanced technologies, redefining business process reengineering and improving the decision-making processes for the public sector. At first, a consultant shall analyse the existing workflows in the public institutions and to propose suitable RPA technology solutions. The next step shall be the launch of the call for the institutions wishing to benefit from RPA solutions.

The implementation of the investment shall be completed by 31 December 2025.

Investment 19. Schemes to upskill/reskill employees in firms

The objective of this investment is to support the digital transformation of small and medium sized enterprises by increasing the digital skills of their employees.

The investment shall be implemented in several phases. At first, a curriculum for upskilling workforce shall be developed. The focus shall be on emerging technologies (such as internet of things, big data, machine learning, artificial intelligence, robotic process automation, blockchain). In the second phase, a consultant shall support the administration in setting out the structure of the training and then the classes shall take place for the employees of the SMEs that have applied to be part of the programme.

The implementation of the investment shall be completed by 31 December 2025.

H. COMPONENT 8: TAX AND PENSIONS REFORMS

This component includes a set of reforms and investments to address the key challenges in the tax administration, tax system, government budgetary framework, pension system and government support to businesses:

- i. Reform of the tax administration and review of the tax framework to strengthen the tax system and to increase the revenue collected by the tax administration by at least 3pps of GDP (2,5pps from the tax administration reform and 0,5pps from the tax framework review) and to reduce the VAT gap by at least 5pps, both as compared to 2019.
- ii. Reform of the public pension system through a new legislative framework to ensure fiscal sustainability in an environment of ageing population, to correct inequities, to ensure the sustainability and predictability of the system and respect the contributory principle in relation to the beneficiaries of pension entitlements. It also aims at the modernisation of the pension system through digital applications and services. The public pension reform aims at addressing relevant country-specific recommendations (country specific recommendation 2.2 and 2.3, 2019), and in particular ensuring fiscal sustainability, equalisation of retirement age and financial stability of pension pillar II.
- iii. The enhancement of the efficiency of public spending, by increasing the transparency of the budget process, improving the monitoring and reporting system of the budgetary programmes, prioritising large investment projects, carrying out spending reviews in all public sectors, strengthening the role of the fiscal council. The digitalisation of the budgetary procedures is expected to support these goals.
- iv. Enhancing institutional capacity to forecast pension expenditure through the use of complex economic modelling tools. The main aim of the reform is to develop the capacity to estimate the impact of structural reforms of the pension system in the medium to long term, by significantly improving the accuracy of the projections and thereby assessing the implication for the sustainability of the pension system.
- v. Increasing competitiveness, innovation capacity, productivity and internationalisation of business (especially SMEs) by providing alternative sources of funding through the establishment and operationalisation of a National Development Bank.

It is expected that no measure in this component does significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measures and the mitigating steps set out in the recovery and resilience plan in accordance with the DNSH Technical Guidance (2021/C58/01).

H.1. Description of the reforms and investments for non-repayable financial support

Reform 1. Reform of the National Agency for Fiscal Administration (ANAF) through digitalisation

This reform addresses the urgent need for modernisation and digitalisation of ANAF so as to make the tax collection more efficient with the objective to increase the revenue-to-GDP ratio (by 2,5 percentage points by Q4 2025 as compared to 2019) and to decrease the VAT gap (by 5 percentage points by Q2 2026 as compared to 2019). The reform aims at creating the procedural and supporting framework for the implementation and use of integrated risk management at tax administration level by all functions of the administration to set up a system to identify, plan, assess and adapt activities in the tax administration process according to identified (continuously updated) tax risks.

Specifically, the reform comprises the following elements:

- entry into force of the legal framework for the compulsory enrolment of corporate taxpayers in SPV (Virtual Private Space). This act shall amend the Fiscal Procedure Code and shall introduce the obligation for legal persons to enrol in the SPV.
- entry into force of the legal framework defining the risk criteria for the classification of taxpayers through an Order of the ANAF President. This is the first step towards fully operationalising and developing an integrated tax risk management system, including through the operationalisation of the centralised risk analysis and of a centralised electronic risk register. The definition of risk criteria shall be done according to the main categories of risks of tax non-compliance, i.e.: risks related to tax registration, submission of declarations, level of declaration, and payment and take into account international standards. The new risk criteria shall feed into a system of risk-based tax administration, in which tax administration measures and controls shall be adapted to the tax risk of each class of taxpayers.
- entry into force of the amended legal framework in the field of activity of tax inspection bodies, aiming at strengthening the capacity and effectiveness of tax control structures to prevent national and cross-border tax fraud and tax evasion by early and targeted identification of major tax risks. Part of the changes in the legal framework were implemented in 2020. This establishes the powers of the tax authorities (tax inspection bodies, anti-fraud control bodies, and bodies responsible for verifying the personal tax situation) to carry out documentary checks. ANAF is going to carry out analysis of the institutional and legal framework of the activities of the control structures. Taking into account the conclusions and the results of this analysis, the revision of the legal framework of the tax inspection bodies shall be finalised. This reform shall also strengthen the cooperation with labour inspectorates, as well as with other institutions in the field of social and labour protection, to prevent and limit the phenomenon of grey/black work tax evasion.

This reform shall also lead to having at least 600 000 cash registers connected to ANAF system, an increase in the share of desk audits as compared to the onsite ones, and to an increased number of tax inspections.

The implementation of the reform shall be completed by 31 December 2025 and is underpinned by three investments.

Reform 2. Modernisation of the customs system and implementation of electronic customs

The reform shall improve the functioning of the Customs Administration through promoting amendments to the existing legal framework, changing competences and internal procedures and by investing in equipment necessary for the control activity on the national territory and at the external border of the EU.

The objective of this reform is to improve the administrative and operational capacity of the Customs administration and to steer the customs clearance activity towards a fully electronic environment. The exchange of information between economic operators and customs authorities, as well as between customs authorities in the Member States, shall be carried out exclusively through electronic data processing and dissemination techniques.

In particular, the following actions shall be carried out:

- operationalisation of the customs administration,
- development of customs IT systems in line with the requirements of the Union Customs Code;

- focusing customs clearance on the electronic environment and reducing bureaucratic barriers;
- simplification of customs formalities.

The implementation of the reform shall be completed by 31 December 2023 and is underpinned by one investment.

Reform 3. Improving the budgetary programming mechanism

This reform shall be implemented through the entry into force of the amended regulatory framework which shall:

- ensure multi-annual budgetary planning,
- make the prioritisation of public investment more efficient,
- introduce systematic spending reviews aligned with the budgetary cycle and with a clear implementation plan of the findings in the subsequent budgets, and subject to independent ex-post evaluations.

One objective of this reform is to improve the budgetary programming mechanism and to modernise the IT system for the development and management of the national budget, by making extensive use of data and information that best reflect budgetary expenditure, at policy and programme level (analysis of budgetary procedures, streamlining of time to generate reports and the format in which reports are generated), with an effect on:

- increasing transparency in the budget process by publishing analyses and reports that simplify the spending process for specific programmes;
- improving the system for monitoring and reporting budgetary programmes.

The implementation of the reform shall be completed by 31 March 2025 and is underpinned by one investment.

Reform 4. Review of the tax framework

A review of the tax system should allow Romania to improve competitiveness, while supporting fiscal sustainability and environmental goals. It should also bring a fairer, more efficient, simpler and more transparent tax system capable of better supporting the economy and facilitating taxpayers' compliance.

The comprehensive review of the tax system in the plan shall identify distortions and areas where relevant tax legislation should be adjusted, in particular for corporate income tax, income tax and social security contributions as well as property taxation, so as to inform decisions for a gradual withdrawal of excessive tax incentives. The review of the tax framework shall also aim at expanding green taxation, including as flanking measure for the sustainable transport and energy components.

In carrying out this reform, Romanian tax legislation shall be subject to a thorough analysis, with support of technical assistance provided by an independent institution, in particular in the areas of taxes and social contributions due on income earned by natural persons, corporate tax (including special schemes which may benefit from the exceptions), property taxes (which are local taxes) and green taxes. This systematic analysis shall be followed by the implementation of the recommendations stemming from it to ensure that the tax system better promote sustainable economic growth.

Specifically regarding property taxes, the reform shall address the potential arbitrage between the two tax systems applicable respectively to natural and legal persons earning income from

immovable property, and to automatically determine the taxable value of properties subject to local tax, discontinuing the practice of using a taxable base which is not linked to the market value.

The specific objectives of this reform are to:

- improve the structure of tax revenues;
- increase the tax revenue to GDP ratio by 0,5 percentage points by 2025 as compared to 2019;
- eliminate distortions and loopholes in the tax system that allow taxpayers to minimise taxes (undermining the fairness of the system), in particular income tax and social contributions;
- simplify tax rules to facilitate compliance and administration, and elimination of preferential exemptions and treatments;
- achieve a more efficient tax system and a fairer distribution of the tax burden;
- amend property taxation, including in particular by encouraging the free imposition of allowances by local authorities within centrally defined ranges and estimating the tax base as close as possible to the market value of the property.

The implementation of the reform shall be completed by 31 March 2025 and is underpinned by one investment.

Reform 5. Establishment and operationalisation of the National Development Bank

The objective of the reform is to operationalise the National Development Bank (BND) in order to directly address financial market failures, by providing financing to projects of eligible beneficiaries with a high risk profile but with high potential to create added value and jobs and for which the private sector has little appetite to secure financing. The reform follows on a project financed under the Structural Reform Support Programme.

The National Development Bank shall be established as a 100% state-owned credit institution operating under the supervision of the National Bank of Romania and in accordance with applicable local and EU legislation. The National Development Bank shall have a share capital of RON 3 billion (ca. EUR 600 million).

The operationalisation of the BND shall also include the acquisition of an IT system, purchases of software licences and hardware as well as IT services.

In order to ensure that the measure complies with the ‘Do no significant harm’ Technical Guidance (2021/C58/01), the investment and lending strategy of the National Development Bank shall:

- require the application of the Commission’s technical guidance on sustainability proofing for the InvestEU Fund; and
- exclude the following list of activities and assets from eligibility by way of an exclusion list: (i) activities and assets related to fossil fuels, including downstream use;¹⁴ (ii) activities and assets under the EU Emission Trading System (ETS) achieving projected greenhouse gas emissions that are not lower than the relevant benchmarks;¹⁵ (iii) activities

¹⁴ Except projects in power and/or heat generation, as well as related transmission and distribution infrastructure, using natural gas, that are compliant with the conditions set out in Annex III of the ‘Do no significant harm’ Technical Guidance (2021/C58/01).

¹⁵ Where the activity supported achieves projected greenhouse gas emissions that are not significantly lower than the relevant benchmarks an explanation of the reasons why this is not possible should be provided. Benchmarks

and assets related to waste landfills, incinerators¹⁶ and mechanical biological treatment plants¹⁷; and (iv) activities and assets where the long-term disposal of waste may cause harm to the environment; and

- require the verification of legal compliance with the relevant EU and national environmental legislation by the National Development Bank for all transactions, including those exempted from sustainability proofing; and
- require beneficiaries of equity support and general purpose corporate finance that derive more than 50% of their revenues during the preceding financial year from activities and/or assets in the exclusion list to adopt and publish green transition plans.

This reform is underpinned by an investment and its implementation shall be completed by 30 June 2026.

Reform 6. Reform of the public pension system

The reform involves the adoption of a new law on the public pension system, with the input of technical assistance, which is going to replace the Law 127/2019. One aim of the new legislation shall be to maintain total gross public pension expenditure (including all existing public pension schemes) stable in the long term (2022-2070) at 9,4% of GDP, including a brake mechanism in case the expenditure cap is exceeded.

The new legislation shall:

- introduce a new calculation formula for new pensions and pensions in payment. The parameters of the formula shall be carefully chosen in line with the target for pension expenditure as percentage of GDP. Moreover, they shall not allow for ad hoc increases on pension levels;
- introduce a new pension indexation rule in line with the pension expenditure as percentage of GDP target and mechanisms against ad hoc indexation;
- significantly reduce possibilities for early retirement, introduce incentives to expand the working life and to voluntarily increase standard retirement age up to 70 years in line with the increases of life expectancy, and equalize the statutory retirement age for men and women at 65 years by 2035;
- introduce incentives for postponing retirement;
- revise special pensions to bring them in line with the contributory principle;
- strengthen the contributory principle of the system;
- increase the adequacy of minimum and lower pensions, in particular for those below the poverty threshold;

established for free allocation for activities falling within the scope of the Emissions Trading System, as set out in the Commission Implementing Regulation (EU) 2021/447.

¹⁶ This exclusion does not apply to actions in plants exclusively dedicated to treating non-recyclable hazardous waste, and to existing plants, where the actions are for the purpose of increasing energy efficiency, capturing exhaust gases for storage or use or recovering materials from incineration ashes, provided such actions do not result in an increase of the plants' waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

¹⁷ This exclusion does not apply to actions in existing mechanical biological treatment plants, where the actions are for the purpose of increasing energy efficiency or retrofitting to recycling operations of separated waste to compost bio-waste and anaerobic digestion of bio-waste, provided such actions do not result in an increase of the plants' waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

- ensure financial viability of the Pillar II of the pension system by increasing contributions to this pension pillar.

The government shall seek for technical assistance to prepare the draft law, which shall also be subject to consultation with social partners. As part of the preparation of the law, there shall be an ex-ante assessment of the impact of the new pension system in particular on fiscal sustainability, which shall feed in the reform process. Amendments to the draft law, which increase the cost of the reform and result to deviation from the fiscal target shall be accompanied by compensating measures to maintain the expenditure to GDP ratio stable. The recalculation of pensions shall be in line with the new legal framework and shall not increase total gross public pension expenditure beyond the benchmark of 9,4% of GDP.

An analysis of special pensions shall also be carried out with a view to identifying concrete solutions aimed at streamlining special pensions, and at correcting the inequities between beneficiaries of these pension categories and beneficiaries of the public pension system from the point of view of the contributory aspect, also taking into account the case-law of the Constitutional Court.

Technical assistance is envisaged (through a public tender) to produce ex-ante analysis of the pension reform, to elaborate the legislation of the reform, and to produce an ex-post analysis and impact assessment.

The implementation of the reform shall be completed by 30 March 2023.

Investment 1. Facilitating taxpayers' compliance through the development of digital services

The objectives of this investment are:

- reducing face-to-face interaction with taxpayers due to the expansion of digital services and the provision of services to taxpayers at the premises of the tax units as a matter of priority in the self-service system; ensuring the digital inclusion of taxpayers;
- the development of current remote (electronic or telephone) services through new functionalities and/or the creation of new services;
- simplification of the forms, their electronic transposition and the introduction of pre-filled forms/abolition of reporting obligations, where possible;
- improving communication with taxpayers and introducing an advisory mechanism on the services offered to taxpayers, which shall allow for the involvement of certain categories of taxpayers from the moment of the creation of the new services, so that the needs, expectations, possibilities and skills of taxpayers are known from the conception and design phase.

The investment shall consist of the following actions:

- centralisation of the system managing the corporate taxpayers
- redesign and optimisation of the information system — VIES_RO (Value Added Tax Information Exchange System);
- implementation of the One Stop Shop (OSS_RO) IT system in accordance with intra-Community, national and specific customs requirements;
- the development of call centres;
- the development of current remote (electronic or telephone) services through new functionalities and/or the creation of new services;
- implementation of facilities for interaction with taxpayers at the premises of the tax units;
- implementation of a suite of solutions for knowledge of taxpayers/clients;

- set up of an online auction platform for valuing real estate and mobile assets of significant value.

The contracting of technical assistance services is envisaged for the preparation and completion of the procurement documentation to be carried out within the framework of the projects and for their implementation.

The implementation of the investment shall be completed by 31 December 2024.

Investment 2. Improving tax and tax administration processes, including through the implementation of integrated risk management

The objectives of this investment are:

- fully operationalising and developing the integrated tax risk management system, including through the operationalisation of the centralised risk analysis and register;
- identifying and reducing tax non-compliance and tax gaps through the smart use of data and information to identify areas of high fiscal risk (including in the area of undeclared/under-declared work);
- introducing voluntary compliance programmes;
- adopting a risk-based approach, including the treatment of tax optimisation schemes, in the administration of large taxpayers;
- strengthening the institutional capacity of tax control structures to prevent national and cross-border tax fraud and tax evasion by early and targeted identification of major tax risks;
- re-organising human resources in the context of the progressive digitalisation of business processes.

The investment is expected to have an impact on increasing the level of tax compliance, ensuring a competitive market environment by reducing tax avoidance and evasion and on the achievement of the planned budget revenue by increasing the efficiency of the collection.

The investment consists in the following actions:

- deployment of a platform for the exploitation of data and information;
- implementation of the e-invoicing system;
- implementation of the electronic fiscal marking system;
- improvement and expansion of the platform used for international information exchange;
- centralisation of the State Treasury Information System (TREZOR).

The implementation of the investment shall be completed by 31 December 2025.

Investment 3. Ensuring the capacity to respond to current and future information challenges, including in the context of the pandemic, through the digital transformation of Ministry of Finance / National Agency for Fiscal Administration

The objectives of this investment are:

- implementation of a financial hub to collect, manage and make available to all stakeholders reliable, validated and current information of a financial nature or in relation to public money;

- ensuring the interoperability of IT systems both at the Ministry of Finance (MF) and National Agency for Fiscal Administration (ANAF) level and with those of other institutions;
- application standardisation and uniform data management;
- cybersecurity management and data resilience, including sharing data in real time in a secure manner and with accurate/up-to-date data;
- modernisation and adaptation of the National Centre for Financial Information (NCFI) to new requirements, internal digital transformation, including dematerialisation of internal workflows at MF/ANAF level, ensuring flexibility in hours and jobs, increasing skills levels, including digital skills of employees;
- modernisation of the whole Ministry of Finance/ANAF IT system through a technological upgrade, which shall be implemented by shifting hardware and software infrastructure to new technologies, increasing the number of IT equipment used in the administration, linked to automated processes, and developing the necessary supporting infrastructure to support continuous technological development at the level of the Ministry of Finance data centres.

The investment consists in the following actions:

- upgrading hardware software and communication infrastructure of the IT system;
- reinforcing cybersecurity of the Ministry of Finance IT system;
- implementation/upgrading of the underlying physical infrastructure (electro-power, air-conditioning, alarm and fire extinguishing, physical security, administration and monitoring) in the main existing data centre
- internal digital transformation, including modernisation of the National Centre for Financial Information (NCFI), amongst which the digitalisation of the monitoring of public-private partnership/concession projects and of the management of related tax risks and the State's public and private heritage information system — Patrim.

The implementation of the investment shall be completed by 31 December 2025.

Investment 4. Implementation of electronic customs

To modernise the customs system and implement electronic customs, the government shall invest:

- on the operationalisation of the Customs Authority.
- to equip border customs offices with scanners.
- on software hardware infrastructure to increase processing and storage capacity for applications established by DG TAXUD.
- on the upgrade and licensing for virtualised infrastructure and implementation of a virtualisation platform with administration and automation included.
- on the Security Solution for the IT infrastructure of the Integrated Customs Information System, including support services, licences and subscriptions
- on licences for databases necessary for the operation of the components of the Integrated Customs Information System
- on solutions for the centralised management of users, workstations and update services for the operating systems for the Integrated Customs Information System

- on the implementation of the IT system on the customs declaration with reduced dataset for low-value consignments, following the entry into force on 1 July 2021 of the new legislative provisions implementing the “VAT e-commerce package”, with the aim of facilitating cross-border trade and combating VAT fraud.
- on the ICS2 system — Phases 1, 2 and 3
- on the implementation of NCTS_RO Phase 5 and AES_RO
- on the alignment of the EMCS_RO system to EMCS Phase 4
- on the Modernisation of the National Import System in the framework of the Union Customs Code
- on the EU Single Window for Customs — CERTEX
- on the Uniform User Management and Digital Signature UUM & DS
- on the system for monitoring customs supervision and control
- on the Application for Authorisation and Management of Activities in the Free Zone
- on the Application for the Management of National Decisions (Authorisations)

The implementation of the investment shall be completed by 31 December 2025.

Investment 5. Improving the budgetary programming mechanism

The objective of this investment is to evaluate, update and modernise the IT system (BUGET_NG) for the development and management of the national budget, by making extensive use of data and information that best reflect budgetary expenditure. The investment shall reduce the time to generate reports and shall optimise the format in which reports are generated. This shall also increase transparency in the budget process by publishing analyses and reports that simplify the spending process for specific programmes. The investment shall also improve the system for monitoring and reporting budgetary programmes.

The implementation of the investment shall be completed by 31 December 2023.

Investment 6. Economic modelling instrument (Pension Reform Options Simulation Toolkit) to improve institutional capacity to forecast pension expenditures

The objective of this investment is to develop the capacity to estimate the impact of structural reforms of the pension system in the medium to long term, by significantly improving the projections made and analysing the sustainability of the pension system. In particular, this investment aims to optimise the functioning of the model, the development and enhancement of the capacity to use it and to analyse results achieved and to prepare information provided to the European Commission. The implementation of this measure requires the Ministry of Finance to expand its team using the model from 1 to 8 experts (already existing staff) and technical assistance for updating/developing the model, train the staff on the use of the tool and on improving the transmission of information to the European Commission and to Eurostat.

The investment shall include technical assistance from the World Bank to:

- update/develop the Pension Reform Options Simulation Toolkit model according to the characteristics of the Romanian pension system.
- customize the model so as to generate results compatible with the Aging Report and the Accrued-to-Date Liability (ADL) calculation regularly requested by the European Commission.
- Receive training sessions / workshops

- Realise/interpret the ex-ante impact of the pension system reforms
- Produce analytical reports, including proposals to improve the sustainability of the pension system.

The implementation of the investment shall be completed by 31 December 2023.

Investment 7. Technical support for the revision of the taxation framework

The revision of the property tax principles has, amongst its objectives, the automatic valuation of properties subject to local tax for taxation purposes. This measure shall be implemented with the support of a consultancy service (technical assistance needed for the elaboration of the terms of reference of the consultancy who shall develop the IT tool) by creating an IT system to automate the valuation of immovable property for the purpose of determining the tax base using information available in the systems of other institutions (e.g. the Land and Land Registry Agency, local authorities) as well as public information (e.g. property announcements, catalogues used by valuation professionals, statistical data).

The implementation of the investment shall be completed by 31 December 2023.

Investment 8. Operationalisation of the National Development Bank

The achievement of the objectives of the related reform requires investments in purchase of software (licences) and hardware (laptops), IT services for staff initially estimated at around 165 people, training of the staff of the National Development Bank to carry out the operations and of the Ministry of Finance staff involved in the assessment of the activity and performance of the bank.

The training of National Development Bank staff shall aim at enhancing the knowledge, professional skills and building technical competencies of personnel for the implementation of 3 new financial products from the following categories: debt, guarantee and equity. The consultant shall propose the structure/design of products, draft agreements/ contracts with beneficiaries, identify target beneficiaries, distribution channels, procedure, policies, communication plan and guidelines for new products. The ministry staff shall be trained in order to develop the required skills to analyse, monitor and assess the performance of the development bank.

The implementation of the investment shall be completed by 31 December 2024

Investment 9. Supporting the process of assessing pension files

The objective of this investment is to support the digitisation of the around 5 million pension files currently in different archives and formats in a single database. The digital files shall be used to assess the existing pension files and to consider the recalculation of some pensions based on the new legislation. The new database shall also be used for the provision of digital services to citizens, businesses and state institutions and for the assessment of relevant policies.

The investment shall be supported by the procurement of IT and non-IT equipment and the hiring of temporary personnel for a maximum period of 18 months to work on the data collection and processing.

The implementation of the investment shall be completed by 31 December 2023.

Investment 10. Operational efficiency and advanced e-services through digitalisation of the pension system

The objective of the investment is to establish and upgrade electronic systems and platforms of the National House for Public Pensions (CNPP), which is the national public pension agency. These systems shall allow the internal digitalisation of the authority and the provision

of personalised public services to external actors (citizens, institutions, government) based on digital identity and remote access. The system shall also support government decision making through the implementation of complex systems and solutions for historical data analysis and ensure interoperability and cybersecurity. This investment shall also allow the upgrade of the digital skills of the CNPP staff.

The investment shall be implemented by conducting public procurement procedures for contracting the rewriting and re-licensing services of Horizon, Diafix and Domino systems, in order to support the legislative reforms, the provision of Client hardware infrastructure (PCs, multifunctional network), the Communication and Security Components at Territorial Pension Funds (CTP) and central level, the development of “CNPP Virtual Private Spaces for every citizen” services.

To ensure interoperability, the investment shall include the development of modern and secure mechanisms for the interconnection of IT systems through registry technologies, interoperability hub, service-based architecture for data exchange.

The implementation of the investment shall be completed by 31 December 2024.

H.2. Milestones, targets, indicators, and timetable for monitoring and implementation for non-repayable financial support

Seq. Num.	Related Measure (Reform or Investment)	Milestone / Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
					Unit of measure	Base line	Goal	Quarter	Year	
191	Reform 1. Reform of the National Agency for Fiscal Administration (ANAF) through digitalisation	Milestone	Entry into force of the legal framework for the compulsory enrolment of legal person taxpayers in SPV (Virtual Private Space)	Provision in the law indicating the entry into force of the compulsory enrolment of legal person taxpayers in SPV				Q1	2022	Entry into force of the legal framework for making registration in the Virtual Private Space (SPV) compulsory for all legal persons taxpayers. This act shall amend the Fiscal Procedure Code and shall introduce the obligation for legal person to enrol in the SPV.
192	Reform 1. Reform of the National Agency for Fiscal Administration (ANAF) through digitalisation	Target	Additional legal person taxpayers enrolled in SPV		Number	509 79	1 009 679	Q4	2022	At least 500 000 legal person taxpayers additionally enrolled in SPV compared to the 509 679 at the beginning of April 2021. With these additional 500 000 taxpayers, the SPV shall cover 90% of the total number of large taxpayers (according to the new definition that shall be available as soon as the modification of the respective legal framework shall be approved), accounting for at

I. COMPONENT 9: BUSINESS SUPPORT, RESEARCH, DEVELOPMENT AND INNOVATION

This component includes a set of reforms and investments to strengthen the business environment in Romania, including the research, development and innovation sector.

The objective of this component is to support businesses in Romania, especially small and medium-sized enterprises as well as public organisations performing research, development and innovation. The reforms supporting the investments include regulatory changes to reduce the administrative burden for firms by simplifying legislation/start-up/exit procedures as well as obtaining licenses. Reforms also address unclear governance, the fragmentation and effectiveness of the research development and innovations system and promote its cooperation with the private sector. Investments relate to the creation of a digital platform for providing simplified public services for business including for obtaining licences, access to finance to small and medium size enterprises and companies through financial instruments and grants. Complementary investments shall relate to funding research competence centres and research projects lead by internationally reputed researchers.

The reforms and investments shall contribute to addressing the country-specific recommendation conveyed to Romania in 2019 and 2020, on the need to improve the quality and predictability of decision-making process (country-specific recommendation 5, 2019); and to front-load mature public investment projects that promote the economy's competitiveness, such as supporting research and development activities and the integration of local providers into EU strategic value chains (country-specific recommendation 3, 2020).

It is expected that no measure in this component does significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measures and the mitigating steps set out in the recovery and resilience plan in accordance with the DNSH Technical Guidance (2021/C58/01).

I.1. Description of the reforms and investments for loans

Reform 1. Legislative transparency, de-bureaucratisation and procedural simplification for business

The objective of this reform is to reduce the administrative burden for businesses environment by simplifying and increasing the transparency of regulatory procedures for firms.

The reform shall be implemented through the entry into force of three different groups of legislative initiatives/amendments: first, entry into force of legislative amendments to streamline, simplify and fully digitise business related regulatory requirements, in particular to set up a company, exit from the market/closure of a business as well as for regulatory requirements for reporting of labour market obligations for companies; second, entry into force of legislative changes related to the *SME test* (the ex-ante evaluation of the economic, social and environmental impact of legislative proposals on Small and Medium Enterprises); third, entry into force of the law implementing the single industrial licensing regime that shall effectively enforce, inter alia, the tacit approval (silence is consent) for specific types of licences following their registration on the electronic platform, the adoption of the “once-only” principle, enabling firms to be required to supply the same information or documents to public institutions only once, and the adoption of the necessary legislative amendments for the full implementation of an Electronic Point of Single Contact, including a definition of its main features.

The implementation of the reform shall be completed by 31 December 2025. The legislative amendments to streamline, simplify and fully digitise business related procedures as well as

the “Single Industrial Licence” shall enter into force by 30 September 2022 and 31 December 2022, respectively.

Investment 1 – Digital platforms on legislative transparency, de-bureaucratization and procedural simplification for business.

The objective of this investment is to provide full digital access and the possibility to perform operations related to specific regulatory requirements for business.

The investment shall consist in setting-up and make fully operational a public digital platform providing public services for businesses related to setting up/leaving the market for firms, authorization of foreign representations in Romania and obtaining industry-related licenses.

The implementation of the investment shall be completed by 31 December 2023.

Investment 2 – Financial instruments for the private sector

Sub-investment 2.1: Portfolio Guarantee for Resilience

The objective of this sub-investment is to address financial hurdles faced by Romanian enterprises in accessing finance, namely: increased cost of finance, lack of collateral and impaired credit channels. In particular, the sub-investment shall target the liquidity/solvency challenges of Romanian enterprises, which arise from the significant and temporary reduction of their revenues, due to the COVID-19 crisis. In this context, the instrument shall be designed to improve access to finance and revitalise blocked lending channels during and in the aftermath of the COVID-19 crisis by supporting investments or working capital needs of enterprises. The sub-investment shall take the form of a portfolio guarantee, to be implemented as a contribution to InvestEU by the European Investment Fund (“EIF”).

To ensure that the sub-investment complies with the ‘Do no significant harm’ Technical Guidance (2021/C58/01), the contribution agreement between the European Commission and the Romanian Government shall require the application of the Commission’s technical guidance on sustainability proofing for the InvestEU Fund. The guarantee agreement between the European Commission and the EIF shall in addition exclude the following list of activities and assets from eligibility: (i) activities and assets related to fossil fuels, including downstream use¹⁸ and (ii) activities and assets under the EU Emission Trading System (ETS) achieving projected greenhouse gas emissions that are not lower than the relevant benchmarks.¹⁹

The implementation of the sub-investment shall be completed by 30 June 2024, when the InvestEU Investment Committee approves finance or investment operations amounting to 100% of the total amount of finance or investment targeted.

Sub-investment 2.2: Climate Action Portfolio Guarantee

The objective of this sub-investment is to deliver finance and investments to SMEs (up to 249 employees), companies with up to 500 employees, and individuals through working capital, credit lines, investment loans, or leasing, aimed at investments and finance for energy efficiency improvements in enterprises and the residential and buildings sector. The purpose

¹⁸ Except projects in power and/or heat generation, as well as related transmission and distribution infrastructure, using natural gas, that are compliant with the conditions set out in Annex III of the ‘Do no significant harm’ Technical Guidance (2021/C58/01).

¹⁹ Where the activity supported achieves projected greenhouse gas emissions that are not significantly lower than the relevant benchmarks an explanation of the reasons why this is not possible should be provided. Benchmarks established for free allocation for activities falling within the scope of the Emissions Trading System, as set out in the Commission Implementing Regulation (EU) 2021/447.

of the instrument shall be to address Romania's current challenges in supporting investments in the energy efficiency and renewable energy sectors. The sub-investment shall take the form of a portfolio guarantee, to be implemented as a contribution to InvestEU by the European Investment Fund ("EIF"). The specific goals and energy efficiency ambitions of the instrument, as well as structure and eligibility criteria shall be fully aligned and correspond to the ones of the InvestEU EU-Compartment instrument, currently under development.

In order to ensure that the sub-investment complies with the 'Do no significant harm' Technical Guidance (2021/C58/01), the contribution agreement between the European Commission and the Romanian Government shall require the application of the Commission's technical guidance on sustainability proofing for the InvestEU Fund. The guarantee agreement between the European Commission and the EIF shall in addition exclude the following list of activities and assets from eligibility: (i) activities and assets related to fossil fuels, including downstream use²⁰ and (ii) activities and assets under the EU Emission Trading System (ETS) achieving projected greenhouse gas emissions that are not lower than the relevant benchmarks.²¹

The implementation of the sub-investment shall be completed by 30 June 2024, when the InvestEU Investment Committee approves finance or investment operations amounting to 100% of the total amount of finance or investment targeted.

Sub-investment 2.3 for SMEs and mid-caps: Recovery Venture Capital Fund

The objective of this sub-investment is to provide equity support for SMEs, mid-caps, including start-ups, companies in early and advanced growth stages, and infrastructure projects focused on renewable energy, and energy efficiency. The support shall be delivered through venture capital funds and infrastructure funds, as part of a Risk Capital Fund, managed by the European Investment Fund ("EIF").

In order to ensure that the sub-investment complies with the 'Do no significant harm' Technical Guidance (2021/C58/01), the financing agreement between the Romanian Government and the EIF, and the subsequent investment policy of the financial instrument shall

- require the application of the Commission's technical guidance on sustainability proofing for the InvestEU Fund; and
- exclude the following list of activities and assets from eligibility: (i) activities and assets related to fossil fuels, including downstream use²²; (ii) activities and assets under the EU Emission Trading System (ETS) achieving projected greenhouse gas emissions that are not lower than the relevant benchmarks²³; (iii) activities and assets related to waste

²⁰ Except projects in power and/or heat generation, as well as related transmission and distribution infrastructure, using natural gas, that are compliant with the conditions set out in Annex III of the 'Do no significant harm' Technical Guidance (2021/C58/01).

²¹ Where the activity supported achieves projected greenhouse gas emissions that are not significantly lower than the relevant benchmarks an explanation of the reasons why this is not possible should be provided. Benchmarks established for free allocation for activities falling within the scope of the Emissions Trading System, as set out in the Commission Implementing Regulation (EU) 2021/447.

²² Except projects under this measure in power and/or heat generation, as well as related transmission and distribution infrastructure, using natural gas, that are compliant with the conditions set out in Annex III of the 'Do no significant harm' Technical Guidance (2021/C58/01).

²³ Where the activity supported achieves projected greenhouse gas emissions that are not significantly lower than the relevant benchmarks an explanation of the reasons why this is not possible should be provided. Benchmarks established for free allocation for activities falling within the scope of the Emissions Trading System, as set out in the Commission Implementing Regulation (EU) 2021/447.

landfills, incinerators²⁴ and mechanical biological treatment plants²⁵; and (iv) activities and assets where the long-term disposal of waste may cause harm to the environment; and

- require companies that derived more than 50% of their revenues during the preceding financial year from activities and/or assets that are covered by the exclusion list to adopt and publish green transition plans; and
- require the verification of legal compliance with the relevant EU and national environmental legislation of the beneficiary by the EIF for all transactions, including those exempted from sustainability proofing.

The implementation of the sub-investment shall be completed by 30 June 2026.

Sub-measure 2.4: Fund of funds for digitalisation, climate action and other areas of interest

The objective of the sub-investment is to provide support to large companies (with more than 500 employees and/or an annual turnover exceeding EUR 50m and an annual balance sheet total exceeding EUR 43m), public entities and Special Purpose Vehicles, through investments contributing to the low-carbon economy, as well as investments in digitalisation and fixed assets through a Fund of Funds. This shall encourage a greater amount of investment contributing to climate and digital objectives by the target companies and encourage the growth and expansion of the companies, in turn creating new employment opportunities and supporting the wider economic recovery. The support shall take the form of a Fund of Funds, the management of which shall be entrusted to the European Investment Bank (“EIB”).

In order to ensure that the sub-investment complies with the ‘Do no significant harm’ Technical Guidance (2021/C58/01), the financing agreement between the Romanian Government and the EIB, and the subsequent investment policy of the financial instrument shall

- require the application of the Commission’s technical guidance on sustainability proofing for the InvestEU Fund; and
- exclude the following list of activities and assets from eligibility: (i) activities and assets related to fossil fuels, including downstream use²⁶; (ii) activities and assets under the EU Emission Trading System (ETS) achieving projected greenhouse gas emissions that are not lower than the relevant benchmarks²⁷; (iii) activities and assets related to waste

²⁴ This exclusion does not apply to actions under this measure in plants exclusively dedicated to treating non-recyclable hazardous waste, and to existing plants, where the actions under this measure are for the purpose of increasing energy efficiency, capturing exhaust gases for storage or use or recovering materials from incineration ashes, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

²⁵ This exclusion does not apply to actions under this measure in existing mechanical biological treatment plants, where the actions under this measure are for the purpose of increasing energy efficiency or retrofitting to recycling operations of separated waste to compost bio-waste and anaerobic digestion of bio-waste, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

²⁶ Except projects under this measure in power and/or heat generation, as well as related transmission and distribution infrastructure, using natural gas, that are compliant with the conditions set out in Annex III of the ‘Do no significant harm’ Technical Guidance (2021/C58/01).

²⁷ Where the activity supported achieves projected greenhouse gas emissions that are not significantly lower than the relevant benchmarks an explanation of the reasons why this is not possible should be provided. Benchmarks established for free allocation for activities falling within the scope of the Emissions Trading System, as set out in the Commission Implementing Regulation (EU) 2021/447.

- landfills, incinerators²⁸ and mechanical biological treatment plants²⁹; and (iv) activities and assets where the long-term disposal of waste may cause harm to the environment; and
- require the verification of legal compliance with the relevant EU and national environmental legislation of the beneficiary by the EIB for all transactions, including those exempted from sustainability proofing.

The implementation of the sub-investment shall be completed by 30 June 2026.

Sub-investment 2.5: Energy efficiency investment in the residential and buildings sector

The financial instrument shall take the form of a portfolio guarantee, implemented by the European Bank for Reconstruction and Development (EBRD).

The objective of this sub-investment is to deliver finance and investments for energy efficiency and renewable energy in the residential and buildings sector. The sub-investment shall take the form of a portfolio guarantee, to be implemented as a contribution to InvestEU by the European Bank for Reconstruction and Development (“EBRD”).

In order to ensure that the sub-investment complies with the ‘Do no significant harm’ Technical Guidance (2021/C58/01), the contribution agreement between the European Commission and the Romanian Government shall require the application of the Commission’s technical guidance on sustainability proofing for the InvestEU Fund. The guarantee agreement between the European Commission and the EBRD shall in addition exclude the following list of activities and assets from eligibility: (i) activities and assets related to fossil fuels, including downstream use³⁰ and (ii) activities and assets under the EU Emission Trading System (ETS) achieving projected greenhouse gas emissions that are not lower than the relevant benchmarks.³¹

The implementation of the sub-investment shall be completed by 30 June 2024, when the InvestEU Investment Committee approves finance or investment operations amounting to 100% of the total amount of finance or investment targeted.

Investment 3. Private sector aid schemes

Sub-investment 1 - Aid scheme for the digitalisation of SMEs

The objective of this sub-investment is to support the small and medium sized enterprises (SMEs) digitalisation which could then contribute to increased competitiveness, enabling these companies’ innovation, facilitating new working patterns. This sub-investment shall

²⁸ This exclusion does not apply to actions under this measure in plants exclusively dedicated to treating non-recyclable hazardous waste, and to existing plants, where the actions under this measure are for the purpose of increasing energy efficiency, capturing exhaust gases for storage or use or recovering materials from incineration ashes, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

²⁹ This exclusion does not apply to actions under this measure in existing mechanical biological treatment plants, where the actions under this measure are for the purpose of increasing energy efficiency or retrofitting to recycling operations of separated waste to compost bio-waste and anaerobic digestion of bio-waste, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

³⁰ Except projects in power and/or heat generation, as well as related transmission and distribution infrastructure, using natural gas, that are compliant with the conditions set out in Annex III of the ‘Do no significant harm’ Technical Guidance (2021/C58/01).

³¹ Where the activity supported achieves projected greenhouse gas emissions that are not significantly lower than the relevant benchmarks an explanation of the reasons why this is not possible should be provided. Benchmarks established for free allocation for activities falling within the scope of the Emissions Trading System, as set out in the Commission Implementing Regulation (EU) 2021/447.

tackle one of the key challenges of the SMEs: the pressure to adapt their business models to the digital realities.

The sub-investment consists of two instruments: i) a grant scheme to support entrepreneurs in development of advanced digital technologies (such as artificial intelligence, data and cloud computing, blockchain, high performance computing and quantum, internet of things, cybersecurity) and ii) a grant scheme of up to EUR 100 000 per enterprise to support SMEs adopting digital technologies (such as purchases of ICT hardware, development and/or adaptation of software applications/licences, including Robotic Process Automation software automation solutions, acquisition of blockchain technologies, procurement of artificial intelligence systems, machine learning, augmented reality, virtual reality, purchase of a presentation website, purchase of cloud and internet of things services, training of staff using IT equipment, advice/analysis to identify technical solutions that SMEs need). All the investments shall comply with the selection criteria of the following intervention fields presented in Annex VII to the Regulation (EU) 2021/241: 021quater (EUR 130 million), 021quinquies (allocation of EUR 20 million), 010 (allocation of EUR 315 million), 012 (allocation of EUR 35 million). For the implementation, the Ministry of Investments and European Projects shall launch the guidelines for the calls for projects and shall delegate the monitoring of the projects to an administrator on the basis of a delegated act. The Ministry shall ensure that an effective management and control system is implemented at administrator level and shall be able to take corrective action whenever necessary, including by performing sample checks at SME level, while the administrator shall monitor and report regularly on the progress of the project implementation in accordance with all the respective conditions.

In order to ensure compliance with the Do No Significant Harm Technical Guidance (2021/C58/01), applicants shall present any potential risks to the environment arising from their activities and their methods for mitigating those risks. Compliance with the Do No Significant Harm Technical Guidance (2021/C58/01) shall be certified by an independent auditor at the end of the investment period.

The implementation of the sub-investment shall be completed by 30 June 2024.

Sub-investment 2 - De minimis scheme to assist Romanian firms in listing on the stock exchange

The objective of this sub-investment is to support companies in increasing access to financing through specific instruments, namely the issuance of new shares.

The sub-investment shall consist of funding a *de minimis* scheme for companies with registered offices in Romania and willing to conduct a stock issuance, pre-qualified for listing, according to the conditions of the Bucharest Stock Exchange, on a first come, first served basis. Taking into account the current structure of economic operators active in Romania, as well as the most dynamic segments of the economy, companies in the Small and Medium Enterprises category as well as those active in sectors with high growth and substantial financing needs, such as IT and energy, are expected to be the main beneficiaries of this investment.

In order to ensure that the sub-investment complies with the ‘Do no significant harm’ Technical Guidance (2021/C58/01), companies that derived more than 50% of their revenues during the preceding financial year from activities and/or assets that are covered by the exclusion list shall be required to adopt and publish green transition plans. The following list of activities and assets shall be excluded: (i) activities and assets related to fossil fuels,

including downstream use³²; (ii) activities and assets under the EU Emission Trading System (ETS) achieving projected greenhouse gas emissions that are not lower than the relevant benchmarks³³; (iii) activities and assets related to waste landfills, incinerators³⁴ and mechanical biological treatment plants³⁵; and (iv) activities and assets where the long-term disposal of waste may cause harm to the environment.

The implementation of the sub-investment shall be completed by 30 June 2025.

Investment 4. Cross-border and multi-country projects — Low Power Processors and Semiconductor Chips

The objective of this investment is to support the development of microelectronics field in Romania, addressing one of the existent challenges at EU level and supporting the digital transition.

The investment consists in actions to: i) structure and develop skills for the design, manufacture and application of microelectronic components and systems in a coherent national ecosystem; ii) secure intellectual property and accelerating the application of advanced technologies in key areas of the national economy such as the car industry, health or precision farming, space, defence, aero-nautical; iii) coordinate with capabilities and needs at European level including through the participation or association of at least ten members of the national ecosystem in a multi-country project, planned to be implemented mainly as an Important Project of Common European interest (IPCEI). In this context, at least 3 Romanian entities in consortia are expected to respond to calls for projects by the Joint Undertaking of Key Digital Technologies (KDT JU).

The implementation of the investment shall be completed by 30 September 2023.

Reform 2. Streamline governance of research, development and innovation

The objective of this reform is to clarify and streamline the governance of the research, development and innovation system in Romania.

The reform shall be implemented by means of operationalising the Policy Support Facility Reform Unit within the Ministry of Research and Innovation and Digitalisation, with the mandate to implement and monitor the Policy Support Facility recommendations translated into reforms of national research, development and innovation ecosystem. The unit shall be operational between 2021-2026 and shall work to redesign in a coordinated manner with the

³² Except projects under this measure in power and/or heat generation, as well as related transmission and distribution infrastructure, using natural gas, that are compliant with the conditions set out in Annex III of the 'Do no significant harm' Technical Guidance (2021/C58/01).

³³ Where the activity supported achieves projected greenhouse gas emissions that are not significantly lower than the relevant benchmarks an explanation of the reasons why this is not possible should be provided. Benchmarks established for free allocation for activities falling within the scope of the Emissions Trading System, as set out in the Commission Implementing Regulation (EU) 2021/447.

³⁴ This exclusion does not apply to actions under this measure in plants exclusively dedicated to treating non-recyclable hazardous waste, and to existing plants, where the actions under this measure are for the purpose of increasing energy efficiency, capturing exhaust gases for storage or use or recovering materials from incineration ashes, provided such actions under this measure do not result in an increase of the plants' waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

³⁵ This exclusion does not apply to actions under this measure in existing mechanical biological treatment plants, where the actions under this measure are for the purpose of increasing energy efficiency or retrofitting to recycling operations of separated waste to compost bio-waste and anaerobic digestion of bio-waste, provided such actions under this measure do not result in an increase of the plants' waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

relevant public authorities, the architecture and functions of the research, development and innovation system in Romania, to enhance the quality of investments. This reform shall pave the way to the entry into force of a permanent system that ensures the harmonised design and implementation, monitoring and evaluation of research, development and innovation policy across ministries and agencies beyond the RRF timeline. The reform shall also establish a single body that ensures inter-ministerial coordination at the Governmental level also based on coordination with private sector organisations.

The implementation of the reform shall be completed by 30 June 2026. The Policy Support Facility Reform Unit shall have a clear mandate and be made operational by 31 December 2021.

Reform 3. Reform of research career

The objective of this reform is to increase the attractiveness of the research career and the performance of researchers.

The reform shall be implemented by enacting legislative modifications that detail Key Performance Indicators and measures of conduct in scientific research according to which researchers get access to funding and scholarships. These specifications shall be equally aligned with European best practices, including for promotion in the research career based on merit-based principles, recruitment on transparent, open and competitive procedures, as well as good practices in ethics and integrity in scientific research. The new legislation shall also include a framework for financial and non-financial incentives to encourage the implementation of the European Charter for Researchers and Code for the Recruitment of Researchers by Romanian research institutions.

The implementation of the reform shall be completed by 31 December 2025.

Reform 4. Enhanced cooperation between business and research

The objective of the reform is to increase the cooperation between businesses and research, development and innovation public research organisations and to create a favourable environment for public and private investments in the sector.

The reform shall be implemented by enacting legislative amendments to simplify and digitalise the contracting, financing, monitor and evaluation of research projects. They shall moreover ensure open access to deliverables of significant and not sensitive publicly funded projects, as well as their evaluation by internationally recognized researchers before approval by the Public Contracting Authority and throughout the lifespan of projects. The amendments shall moreover ensure the availability of stable and predictable sources of funding for research at the local and national level, as well as their centralisation into a single electronic point of contact. The Ministry of Research, Innovation and Digitalisation shall implement legislative amendments jointly with relevant public authorities, including with the representatives of the Ministry of Education and its subordinated agencies, Ministry of Finance, Ministry of Economy and shall take into account the recommendations of the 2021-2022 Horizon Europe Policy Support Facility.

The implementation of the reform shall be completed by 30 June 2026.

Reform 5. Support to integrate the research, development and innovation organisations in Romania in the European Research Area

The objective of this reform is to increase the performance and consolidation of the public research, development and innovation organisations in Romanian and their integration into the European Research Area.

The reform shall be implemented by entry into force of legislation that encourages, facilitates and regulate the voluntary and functional integration and merger of research institutions. The legislative framework shall take into account the recommendations of the 2021-2022 Horizon Europe Policy Support Facility, and shall specify at the minimum: a periodic external evaluation of the performance of all research, development and innovation organisations in Romania, and their capacity to add value to the international scientific community and create social and economic impact. The periodic evaluation shall identify synergies and potential mergers among research institutes, and access to financial and non-financial support for research organisations shall depend on the results of these periodic evaluations.

The implementation of the reform shall be completed by 31 December 2024.

Investment 5. Establishment and operationalisation of Centres of Competence

The objective of the investment is to tackle the thematic fragmentation of research, development and innovation organizations by supporting the implementation of Horizon Europe missions at national level.

The investment pursues the establishment of five “Centres of Competence” to carry on research activities in line with Romanian and European strategic research priorities. The Centres shall be established based on a competitive call as consortia of public and private research institutes, which shall include the participation of small and medium enterprises and partners within consortia shall jointly implement the Strategic Research and Innovation agenda of the correspondent mission from Horizon Europe, enhancing academia-business collaboration in societally relevant research fields. Projects shall contribute to the delivery of solutions improving the lives of citizens, meeting the local needs and increasing the impact of research results at the community level. The 5 “Centres of Competence” shall also use resources to upgrade shared research equipment and infrastructures and disseminate research results.

The implementation of the investment shall be completed by 31 December 2025.

Investment 6. Development of Horizon Europe mentoring programmes

The objective of this investment is to increase the success rates of applications for Horizon Europe programme.

The investment shall grant 500 vouchers to researchers who have applied for the Horizon Europe programme and have passed the eligibility phase. The vouchers aim at supporting applicants in writing the project proposal, staff exchange in organizations which are on the top in terms of gaining Horizon projects or with experience in writing successful H2020 proposals, participating in brokerage events and accessing the Extreme Light Infrastructure - Nuclear Physics.

In order to ensure that the measure complies with the ‘Do no significant harm’ Technical Guidance (2021/C58/01), projects and research relating the following list of activities and assets shall be excluded from eligibility: (i) activities and assets related to fossil fuels, including downstream use³⁶; (ii) activities and assets under the EU Emission Trading System (ETS) achieving projected greenhouse gas emissions that are not lower than the relevant benchmarks³⁷; (iii) activities and assets related to waste landfills, incinerators³⁸ and

³⁶ Except projects related to power and/or heat generation, as well as related transmission and distribution infrastructure, using natural gas, that are compliant with the conditions set out in Annex III of the ‘Do no significant harm’ Technical Guidance (2021/C58/01).

³⁷ Where the activity supported achieves projected greenhouse gas emissions that are not significantly lower than the relevant benchmarks an explanation of the reasons why this is not possible should be provided. Benchmarks

mechanical biological treatment plants³⁹; and (iv) activities and assets where the long-term disposal of waste may cause harm to the environment.

The implementation of the investment shall be completed by 30 June 2026.

Investment 7. Strengthening excellence and supporting Romania's participation in partnerships and missions in Horizon Europe

The objective of this investment is to increase the success rates of applications for Horizon Europe programme. The investment shall grant complementary funding to research, development and innovation projects that are already contracted in the context of green or digital European research development and innovation Partnerships. The measures envisaged are: i) co-funding research projects recommended for funding under European Partnerships for the transition period (2022-2023) – Horizon Europe (based on the work programme conditions from Horizon Europe). Up to 20 projects shall be financed with a maximum budget of EUR 300 000 for each Romanian partner; ii) complementary projects with the purpose to increase the impact of H2020 projects that are already funded (ongoing or recently finalised). Up to 15 projects shall be financed with a maximum budget of EUR 1 000 000; iii) capacity building projects. Up to 20 projects shall be financed with a maximum budget of EUR 500 000.

In order to ensure that the measure complies with the 'Do no significant harm' Technical Guidance (2021/C58/01), research relating the following list of activities and assets shall be excluded from eligibility: (i) activities and assets related to fossil fuels, including downstream use⁴⁰; (ii) activities and assets under the EU Emission Trading System (ETS) achieving projected greenhouse gas emissions that are not lower than the relevant benchmarks⁴¹; (iii) activities and assets related to waste landfills, incinerators⁴² and mechanical biological treatment plants⁴³; and (iv) activities and assets where the long-term disposal of waste may cause harm to the environment.

established for free allocation for activities falling within the scope of the Emissions Trading System, as set out in the Commission Implementing Regulation (EU) 2021/447.

³⁸ This exclusion does not apply to actions under this measure related to plants exclusively dedicated to treating non-recyclable hazardous waste, and to existing plants, where the actions under this measure are for the purpose of increasing energy efficiency, capturing exhaust gases for storage or use or recovering materials from incineration ashes, provided such actions under this measure do not result in an increase of the plants' waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

³⁹ This exclusion does not apply to actions under this measure in existing mechanical biological treatment plants, where the actions under this measure are for the purpose of increasing energy efficiency or retrofitting to recycling operations of separated waste to compost bio-waste and anaerobic digestion of bio-waste, provided such actions under this measure do not result in an increase of the plants' waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

⁴⁰ Except projects related to power and/or heat generation, as well as related transmission and distribution infrastructure, using natural gas, that are compliant with the conditions set out in Annex III of the 'Do no significant harm' Technical Guidance (2021/C58/01).

⁴¹ Where the activity supported achieves projected greenhouse gas emissions that are not significantly lower than the relevant benchmarks an explanation of the reasons why this is not possible should be provided. Benchmarks established for free allocation for activities falling within the scope of the Emissions Trading System, as set out in the Commission Implementing Regulation (EU) 2021/447.

⁴² This exclusion does not apply to actions under this measure related to plants exclusively dedicated to treating non-recyclable hazardous waste, and to existing plants, where the actions under this measure are for the purpose of increasing energy efficiency, capturing exhaust gases for storage or use or recovering materials from incineration ashes, provided such actions under this measure do not result in an increase of the plants' waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

⁴³ This exclusion does not apply to actions under this measure in existing mechanical biological treatment plants, where the actions under this measure are for the purpose of increasing energy efficiency or retrofitting to

The implementation of the investment shall be completed by 31 December 2023.

Investment 8. Development of a programme to attract highly specialised human resources from abroad in research, development and innovation activities

The objective of this investment is to increase the research capacity of the research development and innovation organisation.

The investment shall grant funding to 100 research projects led by top international researchers selected based on a number of quality criteria. Candidates shall be selected on a competitive basis and shall be affiliated to host research institutions in Romania and shall contribute to increase the research capacity of the host organisation. They shall be PhD graduates who have been conducting research outside of Romania in the previous 3 years. They shall be able to independently attract funding for their research teams, and to coordinate the project grant and funds and take decisions on the allocation of resources. In doing so, the activities of international researchers shall benefit the performance of the host research institutes.

In order to ensure that the measure complies with the ‘Do no significant harm’ Technical Guidance (2021/C58/01), research projects relating the following list of activities and assets shall be excluded from eligibility: (i) activities and assets related to fossil fuels, including downstream use⁴⁴; (ii) activities and assets under the EU Emission Trading System (ETS) achieving projected greenhouse gas emissions that are not lower than the relevant benchmarks⁴⁵; (iii) activities and assets related to waste landfills, incinerators⁴⁶ and mechanical biological treatment plants⁴⁷; and (iv) activities and assets where the long-term disposal of waste may cause harm to the environment.

The implementation of the investment shall be completed by 31 December 2023.

Investment 9 - Support for the holders of certificates of excellence received in the Marie Skłodowska Curie Individual Fellowship Award

The objective of this investment is to increase the attractiveness research career and of support confirmed researches in carry out their research project.

The investment is to rewarding 50 excellent researchers who are awarded with the Marie Skłodowska Curie Individual Fellowship Seal of Excellence by 31 December 2023.

recycling operations of separated waste to compost bio-waste and anaerobic digestion of bio-waste, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

⁴⁴ Except projects related to power and/or heat generation, as well as related transmission and distribution infrastructure, using natural gas, that are compliant with the conditions set out in Annex III of the ‘Do no significant harm’ Technical Guidance (2021/C58/01).

⁴⁵ Where the activity supported achieves projected greenhouse gas emissions that are not significantly lower than the relevant benchmarks an explanation of the reasons why this is not possible should be provided. Benchmarks established for free allocation for activities falling within the scope of the Emissions Trading System, as set out in the Commission Implementing Regulation (EU) 2021/447.

⁴⁶ This exclusion does not apply to actions under this measure related to plants exclusively dedicated to treating non-recyclable hazardous waste, and to existing plants, where the actions under this measure are for the purpose of increasing energy efficiency, capturing exhaust gases for storage or use or recovering materials from incineration ashes, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

⁴⁷ This exclusion does not apply to actions under this measure in existing mechanical biological treatment plants, where the actions under this measure are for the purpose of increasing energy efficiency or retrofitting to recycling operations of separated waste to compost bio-waste and anaerobic digestion of bio-waste, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

In order to ensure that the measure complies with the ‘Do no significant harm’ Technical Guidance (2021/C58/01), research projects relating the following list of activities and assets shall be excluded from eligibility: (i) activities and assets related to fossil fuels, including downstream use ; (ii) activities and assets under the EU Emission Trading System (ETS) achieving projected greenhouse gas emissions that are not lower than the relevant benchmarks ; (iii) activities and assets related to waste landfills, incinerators and mechanical biological treatment plants ; and (iv) activities and assets where the long-term disposal of waste may cause harm to the environment.

The implementation of the investment shall be completed by 31 December 2023.

Investments 10 - Establishment and financial support of a national network of eight regional career guidance centres as part of the European Research Area Talent Platform

The objective of this investment is to promote the research career and attract pupils, students for performing research activities and develop citizen interest for research.

The investment is to set-up and make operational 8 research career orientation centres that shall provide career guidance to researchers, promote the research profession and create direct synergies with the investment 4.4. The 8 centres shall also work as network and become one single entry point for the research career and link research career orientation activities with an educational programme focused on science with and for society, while also promoting Romanian research results, and raising awareness about science benefits in the society.

The implementation of the investment shall be completed by 30 June 2026.

I.2. Milestones, targets, indicators, and timetable for monitoring and implementation for the loan

Seq. Num.	Related Measure (Reform or Investment)	Milestone/ Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target

J. COMPONENT 10: LOCAL FUND

This component of the recovery and resilience plan addresses challenges related to territorial and social disparities in urban and rural areas, as well as urban mobility.

The objective of this component is to support an urban and rural transformation through the use of green and digital solutions. The reforms supporting the investments include regulatory changes to support the functional urban and rural areas approach, through the implementation of metropolitan areas and of administrative consortia to increase access to local public social services, education, healthcare, housing and improved territorial planning. The component also includes reforms for sustainable urban mobility and should be seen in connection with the “Sustainable Transport” component. The investments supported by these reforms relate to the construction of housing facilities for vulnerable youngsters, health and education professionals, the renewal of public transport fleets, infrastructure for green and more secure transport, modernisation of local public buildings, and preparation/updating of spatial planning and urban planning documents in a digital format.

The reforms and investments shall contribute to addressing the country-specific recommendations (country-specific recommendations) conveyed to Romania in 2019 and 2020, on the need to: (i) “focus investment on the green and digital transition, in particular on sustainable transport, digital service infrastructure” (country-specific recommendation 3, 2020) while “taking into account regional disparities” (country-specific recommendation 4, 2019); (ii) “provide adequate income substitution solutions and expand social protection measures and access to essential services for all” (country-specific recommendation 2, 2020) and “increase the coverage and quality of social services (country-specific recommendation 3, 2019); (iii) “improve the quality and effectiveness of public administration and the predictability of decision-making” (country-specific recommendation 4, 2020).

It is expected that no measure in this component does significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measures and the mitigating steps set out in the recovery and resilience plan in accordance with the DNSH Technical Guidance (2021/C58/01).

J.1. Description of the reforms and investments for non-repayable financial support

Reform 1. Creating the framework for sustainable urban mobility

The objective of the reform is to improve mobility conditions in urban and rural areas, decrease green-house gas emission from transport and to increase road safety in urban areas, through digital and green transportation solutions.

The reform shall be implemented through the entry into force of a legislation for sustainable urban mobility and the implementation of Sustainable Urban Mobility Plans at the subnational level. The legislation shall include measures to stimulate the renewal of the public transport fleet with clean vehicles, increase road safety and secure minimum national quality standards. It binds urban municipalities to tackle air pollution at the city and functional area level through the adoption of a series of transport policies, such as the establishment of low-emission zones and incentives for the use of alternative means of transportation. Finally, it sets guidelines that urban municipalities shall follow when drafting the Sustainable Urban Mobility Plans, and tasks an ad-hoc National Body under the Ministry for Development, Local Works and Administration with providing support as needed.

The implementation of the reform shall be completed by 30 June 2026. Both the legislation and the National Body supporting the drafting of Sustainable Urban Mobility Plans shall be in force by 31 December 2022.

Investment 1 Sustainable urban mobility

The objective of this investment is to increase access to sustainable and safe mobility solutions in urban and rural areas.

The investment shall upgrade transport infrastructure, securing its environmental sustainability through new zero-emissions public transport vehicles, building additional 13 200 charging points for electric vehicles and 1 091km of cycling lanes at local/metropolitan level. Investments shall equally consist of intelligent transport systems and other ICT infrastructure to increase road security, reduce travelling time and traffic congestions. The investments shall contribute to increasing the share of travels using local public transport with zero-emission vehicles (buses, trolleybuses using a zero-emission engine or battery, trams) to 60% in 2025 compared to 45,4% in 2019. Equally, following the implementation of the investments in charging points for electric vehicles, Romania would have a total of at least 30 000 charging points, funded from various sources, including the National Plan for Recovery and Resilience. Investments shall be equally based on compulsory alignment with the Sustainable Urban Mobility Plan/Integrated Sustainable Development/General Urban Plan approved or under development, ensuring coverage with mobility services in the functional and peri-urban area, prioritisation and promotion of public transport in local traffic by planning preferential routes and bus lanes on most frequented/congested arteries, and having a public service contract with economic operators in accordance with the provisions of Regulation (EC) No 1370/2007.

The implementation of the investment shall be completed by 30 June 2026.

J.3. Description of the reforms and investments for the loan

Reform 2: Creating the policy framework for sustainable urban transformation

The objective of the reform is to allow people living in urban areas, including those of marginal/peripheral communities, an increased access to quality services such as mobility, housing and other public services delivered at local level.

The reform defines the framework through which urban centres and peri-urban areas shall coordinate in order to enhance their capacity to deliver quality and integrated services and improve living standards of their citizens. The two main pillars of the reform are the Metropolitan Areas Act and the Romanian Urban Policy Framework. The Act defines functional urban areas and their main responsibilities (namely, mobility, housing and spatial planning); establishes bodies for steering and coordinating policy initiatives and investments at the functional urban level; ensures their fiscal capacity through transparent and predictable budget sources; and allows for joint procurement for provision of goods and services at functional urban level. The Framework underpins the establishment of functional urban areas and further defines exclusive responsibilities at the local level as well as those that are shared with the central level.

The implementation of the reform shall be completed by 30 June 2026. The Metropolitan Areas Act and the Romanian Urban Policy Framework shall be approved and enter into force by 30 June 2022 and by 31 December 2022, respectively.

Reform 3: Creating the policy framework for sustainable rural transformation: establishing administrative consortia in functional rural areas

The objective of the reform is to allow people living in rural areas, including those of marginal/peripheral communities, an increased access to quality services such as mobility, housing and other public services delivered at local level.

The reform aims to integrate policy and service delivery across rural administrative territorial units in order to enhance well-being in less-dense areas⁴⁸. In particular, amendments to the Administrative Code shall allow for the establishment of administrative consortia in functional rural areas which are neighbouring rural administrative units that are economically and socially integrated, and face similar challenges and opportunities for their development (such as proximity to common natural resources, exposure to same structural shocks). The Amendments shall moreover define the functional rural areas judicial regime and responsibilities; establish bodies for steering and coordinating policy initiatives and investments at the functional rural area level; ensure their fiscal capacity through transparent and predictable budget sources; and allow for full digital integration of public services delivered by the administrative units, including the use of joint procurement for the provision of goods and services, at functional rural area level.

The implementation of the reform shall be completed by 30 June 2026. The amendments to the Administrative Code allowing the creation of the administrative consortia in functional rural areas shall enter into force by 31 December 2022.

Reform 4: Improving housing quality

⁴⁸ Territorial administrative units are defined as “rural” according to the “Methodological manual on territorial typologies — 2018 edition” (also known as the DEGURBA methodology) or the enhanced classification of small regions by the OECD (Fadic, M., et al. (2019), “Classifying small (TL3) regions based on metropolitan population, low density and remoteness”, OECD Regional Development Working Papers, No. 2019/06, OECD Publishing, Paris, <https://doi.org/10.1787/b902cc00-en>).

The objective of this reform is to reduce severe housing deprivation for vulnerable categories and groups, especially for persons in marginalised communities in urban and rural areas.

The reform shall be implemented through the entry into force of a legislative act to secure the implementation of the National Housing Strategy and its Action Plan, including through the use of mechanisms such as metropolitan areas and administrative consortia. Equally, these documents shall be accompanied by a mapping of housing needs especially in marginalized communities and groups, including informal settlements in urban and rural areas. The reform shall ensure complementarity with the existing or future Integrated Community Centres investments (i.e. delivering education, social and basic healthcare services) funded under the ESF+ and the future Cohesion Policy, and shall not lead to social segregation.

The implementation of the reform shall be completed by 30 June 2026. The legislative act to secure the implementation of the National Housing Strategy and Action Plan shall be adopted and enter into force by 30 June 2022.

Reform 5: Development of the planning system — Code of Spatial Planning, Urbanism and Construction

The objective of the reform is to improve the overall territorial planning by simplified and digitalised spatial planning documents and procedures, increased access and transparency of spatial and territorial planning documents, and increasing the use of energy efficient and sustainable solutions in construction.

The reform shall be implemented through the entry into force of the Code of Spatial Planning Urban Planning. The Code shall implement the simplification and harmonisation of the way spatial and general urban plans are reported, updated and transposed into the Geographic Information Systems as well as measures to increase energy efficiency and improve air quality, through binding construction standards in all administrative territorial units and in functional urban and rural areas. The Code shall equally include provisions in the updated urban planning documents aiming at a decreased commuting time and distance for population in functional urban and rural areas. A new data platform, as part of the Territorial Observatory, shall centralise standardised and digitalised maps and strategic documents that underlie the urban planning process and provide public access to all plans, as well as the most recent spatial and territorial planning documents.

The implementation of the reform shall be completed by 30 June 2026. The Code of Spatial Planning, Urban Planning and Construction shall enter into force by 31 December 2022 and an operational data platform allowing full digital access to spatial and territorial planning documents, as part of the Territorial Observatory, shall be operational by 30 June 2023.

Investment 2 Construction of housing for youth and for professionals in health and education

The objective of this investment is to increase access to quality housing for youngsters in need and professionals in healthcare and education providing such services in marginalised communities and to marginalised groups.

The investment shall consist of building new housing units for young people from vulnerable communities and groups in line with the provisions of the National Housing Strategy and the Action Plan and shall be accompanied by measures to foster social and economic integration of the targeted groups. Houses shall be equally built for health and educational professionals in urban and rural areas where marginalised communities and groups are living and shortages in providing healthcare and education services have been previously identified. The newly built houses shall comply with the objective of achieving a primary energy demand at least 20% lower than the nearly zero-energy building requirement according to national guidelines, which shall be ensured through energy performance certificates.

The implementation of the investment shall be completed by 30 June 2026.

Investment 3 Moderate rehabilitation of public buildings to improve public service delivery by administrative territorial units

The objective of this investment is to improve the delivery of local public services. The investment finances moderate renovation of public buildings at the local level. It concerns only those public buildings in towns and communes which are intended for the provision of public services to citizens (e.g. town hall buildings, social services buildings). The investment shall consist of renovating 1 306 818 squared metres of surface in eligible public buildings. Renovation is expected to lead to a 30% reduction in primary energy demand, as demonstrated by energy performance certificates.

The implementation of the investment shall be completed by 30 June 2026.

Investment 4 Development/updating in GIS format of spatial planning and urban planning documents

The objective of this investment is to increase digital access to spatial and urban planning documents.

The investment finances the development or the update of spatial planning and urban planning documents, including the sustainable urban mobility plans. All documentation shall be developed in digital format in accordance with the Code of Spatial Planning, Urbanism and Construction and validated by the national supporting body. The documentation shall be uploaded on the Territorial Observatory platform.

The implementation of the investment shall be completed by 30 June 2026.

J.4. Milestones, targets, indicators, and timetable for monitoring and implementation for the loan

K. COMPONENT 11: TOURISM AND CULTURE

The objective of the Tourism and Culture component is to increase social, economic and territorial cohesion and to create new jobs especially in rural areas, namely:

- (1) promoting sustainable socio-economic transformation in rural and disadvantaged areas by developing a network of Regional Destination Management Organisations and supporting local tourism investments;
- (2) supporting sustainable mobility by creating a national Velo network including Eurovelo routes; and
- (3) reducing the gap in access to culture between rural and large urban areas.

The reforms and investments shall contribute to addressing the country-specific recommendations conveyed to Romania in 2019 and 2020, on the need to “focus investment on the green and digital transition, in particular on sustainable transport, digital service infrastructure” (country-specific recommendation 3, 2020) while “taking into account regional disparities” (country-specific recommendation 4, 2019).

It is expected that no measure in this component does significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measures and the mitigating steps set out in the recovery and resilience plan in accordance with the DNSH Technical Guidance (2021/C58/01).

K.1. Description of the reforms and investments for the loan

Reform 1. Operationalisation of Destination Management Organisations (DMOs)

The objective of this reform is to increase the competitiveness of the Romanian tourism sector and promote sustainable socio-economic transformation in rural and disadvantaged areas by adopting the necessary framework for the operationalisation of Destination Management Organisations.

The implementation of this reform shall consist in adopting a legislative framework necessary for the functioning of the Destination Management Organisations and the development of an Action Plan dedicated to the valorisation of cultural heritage in order to increase the competitiveness of the Romanian tourism sector.

The establishment and operationalisation of Destination Management Organisations shall be based on the recommendations of the Organisation for Economic Co-operation and Development (OECD) included in the “Operationalisation of Destination Management Organisations” study.

The legislative framework necessary for the operation of the Destination Management Organisations shall also include a detailed description of the financing mechanism and a clear governance model. The action plan shall be carried out in line with the set of measures proposed in the Destination Management Organisation Development Strategy and shall be in line with the results of the mapping activity.

The Destination Management Organisation shall be a legal entity carrying out the tourist development policy of each specific destination, including the destination marketing policy, in accordance with the legal provisions in force, bringing together a number of other organisations, such as: business operators, public sector institutions, professional and employers’ associations and regulatory bodies. Regional Destination Management

Organisations shall be designed to form an effective network focusing on local competitive advantages and shall work in partnership with the national tourist authority.

The implementation of the reform shall be completed by 31 December 2023.

Investment 1. Promotion of the 12 touristic/ cultural routes

The objective of this investment is to develop the attractiveness of selected tourist destinations by developing 12 thematic tourist routes in disadvantaged, rural areas of Romania and create new jobs in the tourism industry.

The implementation of this investment shall include financial support for the promotion of the 12 touristic routes and the modernisation/rehabilitation of tourist sites with national and international impact included in the 12 routes identified in the optimal destination areas. The 12 thematic routes are: Castles route, Curia route, 'Cula' route, The route of the traditional Romanian gastronomy, Route of fortified churches, Route of wooden churches, The route of the Moldova monasteries, Saint Ladislau's route, The route of the Roman castrum, Fortress route, Restoration of the cultural landscape in the Danube Delta, The route of villages with traditional architecture.

The specific touristic sites shall be at least 225 and be selected following the mapping of optimal destinations for each Destination Management Organisation, based on their capacity to attract international and national tourists and to promote sustainable/environmentally oriented socio-economic transformation in rural and disadvantaged areas.

The implementation of the investment shall be completed by 31 March 2024.

Investment 2. Modernisation/creation of museums and memorials

The objective of this investment is to increase cultural tourism by the development of museums and memorials dedicated to oppression and conflict.

The implementation of this investment shall include the modernisation and creation of the following museums and memorial sites: National Museum of Jewish history and holocaust (Bucharest), Memorial of the 89 revolution (Timișoara), Memorial of the victims (Sighet), The prison of silence (Râmnicu Sărat), Memorial of forced displacement of people and over industrialization (Satu Mare), Museum of horrors of communism (Sfântu Gheorghe), Museum of photographic evidences (Târgu Mureș), Museum of Transilvanian identities (Mutra).

New buildings shall comply with the objective of achieving a primary energy demand at least 20% lower than the nearly zero-energy buildings (NZEB) requirement according to national guidelines, which shall be ensured by means of energy performance certificates.

The implementation of the investment shall be completed by 30 June 2026.

Reform 2. Framework for the operationalisation of cycling routes at national level

The objective of this reform is to contribute to economic development of small towns and rural areas by adopting a legislative, institutional and investment framework for cycling routes and sustainable forms of tourism.

The implementation of this reform shall consist of a regulatory reform to establish the relevant entities, the criteria for cycling routes and the incentives to promote cycling tourism.

The implementation of the reform shall be completed by 31 March 2022.

Investment 3. Establishment and operationalisation of the Velo National Coordination Centre

The objective of this investment is to contribute to sustainable mobility by promoting cycling via a new Velo National Coordination Centre.

The implementation of this investment shall include a study on cycle tourism routes at national level that shall form the basis for the digitalisation of Velo runways and routes and the development of a National eVelo Platform with an integrated digital application for all cycle tourism routes and a dedicated website.

The implementation of the investment shall be completed by 30 September 2022.

Investment 4. Implementation of 3 000km of cycling routes

The objective of this investment is to develop sustainable transport by development of cycling routes infrastructure.

The implementation of this investment shall include the development of 3 000km of new national cycling routes across Romania. The location of the routes shall be as a priority along the main touristic routes.

The implementation of the investment shall be completed by 30 June 2026.

Reform 3. Reforming the funding system for the cultural sector

The objective of this reform is to create a stable, predictable and long-term sustainable legal and administrative framework for the non-public (private/independent) cultural sector and cultural workers by creating data collection tools for future public policies, and start a process that contributes to the socio-educational and cultural development of small rural and urban areas.

The implementation of this reform shall consist of the entry into force of legislation on the funding system for cultural projects and the support to workers in cultural sectors.

The implementation of the reform shall be completed by 31 March 2023.

Investment 5. Increasing access to culture in culturally deprived areas

The objective of this investment is to increase access to culture in culturally disadvantaged municipalities.

The implementation of this investment shall include a pilot funding programme in partnership with local authorities to support annual or multiannual cultural programmes implemented at local level and a pilot programme to finance cultural education projects, the beneficiaries of which will be educational establishments in rural areas and small towns.

The implementation of the investment shall be completed by 30 June 2024.

Investment 6. Development of digital system for cultural funding processes

The objective of this investment is to develop a digital system for the award of public funding in cultural sectors.

The implementation of this investment shall include the development of a digital system that facilitates access to finance for national cultural operators through simplified and digitalised applications; registers all public cultural subsidies already awarded in order to prevent double funding and collects data on cultural expenditure at the level of municipalities to enable an evidence-based decision to be taken in the field of cultural policy while allowing transparent access to non-confidential information on cultural projects.

The implementation of the investment shall be completed by 30 June 2024.

Investment 7. Accelerating the digitalisation of film production and distribution

The objective of this investment is to strengthen the capacity of micro, small and medium-sized enterprises in film production and accelerate the digital transition of film producers and distributors in Romania by increasing digital production, distribution, marketing and promotion capacities, including digital archiving technologies.

The implementation of this investment shall include content development and the business capacity increase of film producers and distributors, combining project financing and financing of the entity.

The implementation of the investment shall be completed by 31 March 2025.

L. COMPONENT 12: HEALTHCARE

The Healthcare component of the Recovery and Resilience Plan shall consist of three reforms and two investments addressing key challenges in the health system. The main ones are a reduction in the rate of avoidable mortality, a reduction in regional, social and rural-urban disparities in access to basic health services, an increase in access to quality health services, the improvement of hospital and prehospital infrastructure, and the optimisation of the health care expenditures and the management of resources.

The component shall contribute to addressing Romania's country-specific recommendation on improving access to and cost-efficiency of healthcare, including through the shift to outpatient care (country-specific recommendation 3, 2019). It also addresses the recommendation on strengthening the resilience of the health system, including in the areas of health workers and medical products, and improve access to health services (country-specific recommendation 1, 2020).

It is expected that no measure in this component does significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measures and the mitigating steps set out in the recovery and resilience plan in accordance with the DNSH Technical Guidance (2021/C58/01).

L.1. Description of the reforms and investments for non-repayable financial support

Reform 1. Increased capacity for the management of public health funds

The objective of this reform is to increase the efficiency of public health spending by implementing a series of legislative changes and by piloting a grants scheme for rewarding the most performant healthcare providers based on objective and measurable criteria.

This reform consists of two parts. The first one shall be implemented by carrying out a pilot programme directed towards stimulating the improvement of the quality and cost-effectiveness of health services by creating, piloting and implementing those financial mechanisms that reward the performance of healthcare providers (through the "Health Service Quality Fund"). For this purpose, the Ministry of Health, in partnership with national agencies and bodies, and benefiting from external expertise, shall develop health service quality indicators, performance-based payment models and digital tools to collect and monitor indicators, shall put in place the necessary legislative framework, shall assess the quality reports, and shall make the payments according to the models developed and the results of the assessments. As such, in order to boost the quality of healthcare services, payments (rewards) disbursed from the "Health Service Quality Fund" shall be granted to the providers with highest quality indicators. The scheme shall cover hospitals, in the first phase, and shall then be extended to other levels of the healthcare system: outpatients and primary care providers, with the view of scaling it across all types of healthcare providers, after the end of pilot programme. The second sub-reform shall consist of the development of a new model framework contract governing the conditions for the provision of healthcare and its implementing rules. The expected effect of these reform is to reduce the overall proportion of the population reporting unmet medical needs.

This reform shall also be dedicated to information and publicity services, including for awareness campaigns, which are related to press releases published in the written and online press, information and publicity materials on the activities and results obtained, online promotion (on the website and on social media channels). The materials communicated shall be elaborated and promoted throughout the implementation of the reform, reporting on the process, including, among others, the adoption of the legislative framework, the main results of the pilot project, the roll out of the scheme to public hospitals, and the extension of the programme to outpatients and primary care providers. Public reporting is a well-established method to promote the quality-based model of providing healthcare.

The implementation of the reform shall be completed by 30 June 2026.

Reform 2. Increased capacity to undertake investments in health infrastructure

The reform aims to increase the administrative capacity of central and local authorities to manage efficiently health infrastructure projects by setting up and rendering operational the National Agency for Development of Health Infrastructure (ANDIS), as a public institution with legal personality and subordinated to the Ministry of Health. At its full institutional capacity, ANDIS shall be able to manage major public health infrastructure projects, as well as to provide technical expertise at the request of local authorities.

The implementation of the reform shall consist of the establishment of ANDIS, its endowment with a headquarters and staff (including the appointment of a President and a Governing Board), staff training activities and consultancy and technical assistance for the projects falling under ANDIS' portfolio.

The implementation of the reform shall be completed by 30 June 2022.

Reform 3. Increased capacity for health management and human resources in health

The reform shall encompass three sub-reforms.

R.3.1 The reform of the health service management

The objective of this sub-reform is to improve the knowledge, skills and competences of the human resources in the management of health services, at all levels of the Romanian health system.

The sub-reform shall be implemented through a legislative change of the main law governing the health sector (Law No. 95 of 2006). A number of Government Decisions shall be adopted in order to uphold the changes in this law. Subsequently, a centre of excellence in the field of health services management shall become operational and accredited training programmes for the concerned human resources in management (which include members of the hospital steering committees, heads of sections, heads of laboratories in health facilities, executive directors, chief doctors, managers) shall be carried out in collaboration with those academic institutions with a leading portfolio in the field of training and development of human resources responsible for the management of health services. Throughout the implementation period of the reform, the Ministry of Health is expected to benefit from technical assistance and consultancy provided by experts.

The implementation of the sub-reform shall be completed by 30 June 2025.

R.3.2 The development of human resources in the area of healthcare

The objective of this sub-reform is to strengthen the capacity of the Romanian health system to educate, recruit, retain and motivate a workforce ready to respond to the current and future health needs of the population.

The sub-reform shall consist of developing a new strategic framework as well as adjusting the legislation regulating the development of human resources in health, and the differentiated recognition of professional merits and rewards of health professionals. Within the same reform are included the construction and equipment of two centres for the development of abilities and activities related to the training of 1000 staff working in public health facilities providing primary, community and outpatient care, hospitals and other public health facilities. After 2026, training of health care professionals shall continue to be financed by the state budget.

The implementation of the sub-reform shall be completed by 30 June 2025.

R.3.3 Increasing integrity, reducing vulnerabilities and risks of corruption in the health system

The objective of this sub-reform is to improve the definition and regulation of conflict of interest in the Romanian health system and to empower the staff to prevent circumstances that may lead to situations of corruption and/or conflict of interest.

The sub-reform shall consist of implementing a new mechanism to prioritise budget allocations made by the Ministry of Health and the National Health Insurance House (CNAS) and of providing training on integrity for 3 000 staff working in health-related areas in the central administration, devolved institutions, management of healthcare units, and staff providing direct care to patients.

This reform shall also be dedicated to information and publicity services, including for awareness campaigns, which are related to press releases published in the written and online press, information and publicity materials on the activities and results obtained, online promotion (on the website and on social media channels). The materials communicated shall be elaborated and promoted throughout the implementation of the reform, reporting on the process and on the main progress achieved, such as the adoption of the legislative framework, the completion and operationalisation of the centre of excellence, the rollout of the training programmes, the construction and equipment of two centres for development of abilities.

The implementation of the sub-reform shall be completed by 30 June 2025.

Investment 1. Development of pre-hospital medical infrastructure

The objective of this investment is to improve the access for people in rural disadvantaged and marginalized areas to basic health care, including prevention and early diagnosis and treatment services, as well as to increase the complexity of health services in primary, outpatient and community care. The investment shall include the following five sub-investments. The marginalized regions/municipalities are those without or with a limited access to primary health care. The classification of marginalized regions or municipalities was carried out by a World Bank team based on the analysis of the degree of deprivation in terms of human capital, formal employment and inadequate living conditions, the risk of poverty and social exclusion and reduced access to services, health and the provision of other fundamental rights for which access is limited or non-existent.

The criteria of marginalization and the degree of marginalization are established at regional level according to the methodologies for calculating the local human development index and the development index presented in the Atlas of marginalized rural areas and local human development in Romania, in the Atlas of marginalized urban areas in Romania and in the Substantiation Study for the National Strategy on Social Inclusion and Poverty Reduction - according to the World Bank.

1.1.1 Practices of family doctors or associations of primary care practices

The sub-investment shall consist of the renovation or equipping of at least 3 000 associations of practices or practices of family doctors. This shall be carried on the basis of an open call and through a centralized procurement system.

The implementation of the sub-investment shall be completed by 30 June 2023.

1.1.2 Mobile medical units

The sub-investment shall consist of the acquisition of 10 medical caravans equipped with medical devices allowing to perform breast and cervical cancer screening activities in areas with limited access to specialised healthcare services. It is expected that this measure does not do significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measure and the mitigating steps set out in the recovery and resilience plan in accordance with the DNSH Technical Guidance (2021/C58/01). In particular, the caravans to be purchased shall be the best-available-technology from an environmental point of view.

The implementation of the sub-investment shall be completed by 30 June 2023.

1.1.3 Outpatient care units

The investment shall consist of the rehabilitation, modernisation, extension (including through construction of new buildings) of at least 30 outpatient care units. The selection shall also take into account the list of projects which are on the reserve list of the call for projects in the Regional Operational Programme (2014-2020) and other projects according to their level of maturity. At least 20 outpatient care units shall be located in less developed regions or municipalities (defined as those regions/municipalities where the GDP/capita < 75% of EU-27 average).

The implementation of the sub-investment shall be completed by 31 December 2024.

1.1.4 Integrated community centres

The sub-investment shall consist of the building/renovation of 200 integrated community centres (integrated community centres are part of the body of community healthcare programmes run by the Ministry of Health, with the main aim of increasing access to quality medical services for the population and particularly for the vulnerable groups), as well as fully equipping them, in accordance with the minimum requirements laid down in Government Decision No 324/2019. Infrastructure and/or buildings shall comply with energy efficiency criteria. The new buildings shall comply with the objective of achieving a primary energy demand at least 20% lower than the nearly zero-energy buildings (NZEB) requirement according to national guidelines, which shall be ensured by means of energy performance certificates.

The implementation of the sub-investment shall be completed by 30 June 2025.

1.1.5 Family planning offices

The investment shall consist of the rehabilitation or equipment of 119 family planning practices with points of care diagnostics for sexually transmitted diseases, ultrasound scanner with ultraportable gynaecological probes, microscope, IT equipment, refrigerator, transportation vehicles (electric or bicycles). The investment shall also cover the cost of training of the medical personnel working in family planning cabinets.

The implementation of the sub-investment shall be completed by 31 December 2025.

Investment 2. Development of public hospital infrastructure

The objective of this investment is to increase patient safety in healthcare facilities, by interventions ensuring fire, structural building, and seismic safety, as well as improving energy performance and preventing healthcare-associated infections. The investment shall include the following four sub-investments and at least EUR 70 million of this investment shall be allocated to IT equipment.

1.2.1 New public hospital infrastructure

The sub-investment consists of partially financing the building of 25 new hospitals or hospital units. Out of the 25 new hospitals or hospital units, 19 buildings shall comply with the nearly zero energy building (NZEB) requirement according to national guidelines and 6 shall comply with the objective of achieving a primary energy demand at least 20% lower than the nearly zero-energy building (NZEB) requirement according to national guidelines, which shall be ensured through energy performance certificates.

The implementation of the sub-investment shall be completed by 30 June 2026.

1.2.2 Medical equipment and devices

The sub-investment consists of equipping the newly built hospitals or hospital units with medical devices (such as equipment for specific and general departments for surgery ward, treatment room, isolation rooms, including for infectious diseases and burnt units, patient rooms, nursing stations, medical staff facilities, medication rooms, clean preparation rooms, ICU rooms, CCU isolation rooms, rehabilitation facilities, waste and storage management, emergency and resuscitation facilities) and medical equipment (such as: beds, decontamination units, IT equipment, crash carts, defibrillators, infusion pumps, physiologic monitoring systems, including central console, physiologic monitoring systems for acute care, ventilators for intensive care units, general purpose scanning systems).

The implementation of the sub-investment shall be completed by 30 June 2026.

1.2.3 Intensive care facilities for new-borns

The sub-investment shall consist of the modernization, extension and provision of new equipment for 25 neonatal intensive care units for the critical patient for early diagnosis, prenatal, neonatal and postnatal treatment. Specifically, the sub-investment shall cover the capacity extension of hospital infrastructure dedicated to neonatal critical patients with 124 additional beds (including related infrastructure and equipment), the equipment of 90 existing beds with adequate medical devices, as well as improving the screening programme by equipping the existing infrastructure with relevant medical devices, the acquisition of 12 mobile neonatal intensive care units and the building and equipping of 8 regional training centres for critical neonatal patients.

The implementation of the sub-investment shall be completed by 31 December 2024.

I.2.4 Equipment and materials to reduce the risk of nosocomial infections

The sub-investment shall consist in equipping at least 25 public hospitals with equipment for the microbiological air control in the operating blocks and intensive care units through specific air-conditioning facilities, as well as facilities for the disinfection of medical personnel.

The implementation of the sub-investment shall be completed by 30 June 2024.

L.2. Milestones, targets, indicators, and timetable for monitoring and implementation for non-repayable financial support

Seq. Num.	Related Measure (Reform or Investment)	Milestone/ Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
					Unit of measure	Base line	Goal	Quarter	Year	
351	Reform 1. Increased capacity for the management of public health funds	Milestone	Entry into force of the ministerial order for the performance and quality indicators to be used for the selection of the medical units benefiting from the Health Quality Fund	Provision in the ministerial order indicating the entry into force of the ministerial order adopting the set of quality of care indicators and the necessary methodology for the selection of beneficiary medical facilities				Q4	2022	The Ministry of Health shall develop and adopt a set of process indicators, outcome indicators and patient-specific indicators to be used for the evaluation of healthcare providers as well as the methodology for performance-based selection of recipient establishments. The set of indicators shall include indicators such as: the proportion of patients with adverse events, improvement in pain scale (Visual Analogue Scale score), hospital acquired infections rate, quality information available to patients.
352	Reform 1. Increased capacity for management of public health funds	Milestone	Entry into force of the Government Decision for a new model framework the conditions for granting medical assistance, medicines and medical devices,	Provision in the Government Decision indicating the entry into force of the Government Decision and of the Joint Order of the Ministry of Health and the National Health Insurance House				Q2	2023	The new framework contract shall aim to: <ul style="list-style-type: none"> - Improve the management of the National Health Insurance Fund - Increase outpatient care services to reduce pressure on the hospital system - Promote the provision of preventive and early diagnosis services, notably at the level of primary care

Seq. Num.	Related Measure (Reform or Investment)	Milestone/ Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
					Unit of measure	Base line	Goal	Quarter	Year	
			assistive devices and technologies within the framework of the health insurance system							<ul style="list-style-type: none"> - Facilitate remote services by medical service providers - Reduce the rural-urban divide in terms of access to medical care by creating incentives for family/specialist doctors to provide services in remote and underserved areas. - Extend the coverage of the services of primary, specialized and community care to include prevention and early diagnosis services <p>The main changes concern contracting procedures and conditions with service providers, financing mechanisms and bundles of services for insured and uninsured persons.</p>
353	Reform 1. Increased capacity for the management of public health funds	Milestone	Entry into force of the legislative amendment required to include budget spending review outcomes in the budgetary process	The budgetary process takes into account the outcomes of the spending review in the area of health completed in 2023 by the Ministry of Finance.				Q1	2024	The Ministry of Health shall implement in its budgetary process the outcome of the spending review in the area of health carried out by the Ministry of Finance. This shall be done starting with the year after the completion of the spending review.

Seq. Num.	Related Measure (Reform or Investment)	Milestone/ Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
					Unit of measure	Base line	Goal	Quarter	Year	
354	Reform 1. Increased capacity for the management of public health funds	Target	Improving the accessibility of healthcare by reducing the percentage of persons reporting unmet medical needs		Percentage	4,9	4,2	Q2	2026	Unmet need for medical examination and care may be due to (1) financial reasons, (2) waiting lists and (3) the need to travel too far. The Eurostat indicator estimating the level of accessibility to health care services takes into account all three reasons. Medical care refers to individual healthcare services (medical examination or treatment excluding dental care) provided by or under direct supervision of medical doctors or equivalent professions according to national healthcare systems. Data are collected from the European Statistics of Income and Living Condition survey and refer to such needs during the previous 12 months. By improving the access to healthcare, the percentage of persons reporting unmet medical needs is expected to decline from 4,9% in 2019 (baseline) to 4,2% in Q2 2026.
355	Reform 2. Increased capacity to	Milestone	Entry into force of the legislative framework	Entry into force of the legislative framework				Q2	2022	The legislative framework shall set out the following functions for the Agency: —Preparing and implementing priority

Seq. Num.	Related Measure (Reform or Investment)	Milestone/ Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
					Unit of measure	Base line	Goal	Quarter	Year	
	undertake investments in health infrastructure		establishing the National Agency for Infrastructure Development in Health (ANDIS)	establishing the National Agency for Infrastructure Development in Health (ANDIS)						<p>public health infrastructure investment projects in a timely manner, in accordance with the specifications and within the framework of the approved budget;</p> <p>—Issuing instructions, recommendations and applicable methodological standards for the preparation, implementation and completion of public health infrastructure investment projects;</p> <ul style="list-style-type: none"> - Providing specialised assistance in the field of investment projects in public health infrastructure to ministries, public hospitals or to other public authorities; - Establishing and implementing the multiannual programme of priority investment projects in public health infrastructure; - Monitoring the implementation of public health infrastructure investment projects; - Setting-up a centre of excellence in the management of public health infrastructure investment projects;

M. COMPONENT 13: SOCIAL REFORMS

This component includes a set of reforms and investments to strengthen the social security in Romania.

The objective of the component is to support the most vulnerable, including workers, children, persons with disabilities, the inactive and the elderly, by increasing access to social services. The reforms supporting the investments include regulatory changes to prevent the separation of children from their families, to address the de-institutionalisation process for persons with disabilities, to start the implementation of the Minimum Inclusion Income, to decrease un-declared work and allow the inactive persons to find employment. Measures shall equally support the reform of the long-term care services for the elderly as well as the establishment of an objective minimum wage setting mechanism. The complementary investments relate to the creation of a network of day centres for children of risk of separation, rehabilitation and renovation of social services of persons with disabilities, the creation of a digital platform to implement the voucher system for domestic workers, and the creation of day care and rehabilitation centres for the elderly.

These investments and reforms shall contribute to address Romania's country-specific recommendations of the past two years to "increase the coverage and quality of social services and complete the minimum inclusion income reform" (country-specific recommendation 3, 2019), "ensure minimum wage setting based on objective criteria, consistent with job creation and competitiveness" (country-specific recommendation 3, 2019) and to "extend social protection measures and access to essential services for all" (country-specific recommendation 2, 2020).

It is expected that no measure in this component does significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measures and the mitigating steps set out in the recovery and resilience plan in accordance with the DNSH Technical Guidance (2021/C58/01).

M.1. Description of the reforms and investments for non-repayable financial support

Reform 1. Creating a new legal framework to prevent the separation of children from their families

The objective of this reform is to prevent the separation of children from their families, especially in vulnerable families. The reform shall be implemented through the entry into force of a new legislative act which shall create a framework to implement measures (including for example counselling and support for parents and children, day centres for children at risk of separation from parents, day centres for children with disabilities) to effectively prevent the separation of the child from the family and supporting the family in raising and caring for the child at risk of separation. The legislative act shall entail: an identified stable source of funding for the measures, a governance mechanism with clear responsibilities assigned for the public authorities at national and local level and a funding disbursement mechanism conditional on the achievement key performance indicators associated to the policy objectives.

The implementation of the reform shall be completed by 30 June 2026.

Reform 2. Reform of the protection system for adults with disabilities

The objective of this reform is to advance the de-institutionalisation process for persons with disabilities and prevent their institutionalisation.

The reform shall be implemented through the entry into force of a legislative act for the approval of the Guide to Accelerating the De-institutionalisation Process of all persons with a disability currently institutionalised so that an “independent living pathway” is defined for each person. The legislative act shall entail an identified stable source of funding for the measures planned in the guideline together with a disbursement mechanism conditional on the achievement of key performance indicators associated to the policy objectives and a governance structure with clear responsibilities assigned for the public authorities at national and local level. The legislative act shall be also based on a full mapping of the individual situation of all persons with a disability and currently institutionalised in Romania with the objective to define an “independent living pathway” for each person, done in compliance with the case management principles by an independent authority/entity.

The reform on the prevention of the institutionalisation process for persons with disabilities shall be implemented through the entry into force of the legislative act enforcing the adopted National Strategy for Preventing Institutionalisation, and the measures for an “independent living pathway” for the largest possible majority of all persons with disabilities.

The implementation of the reform shall be completed by 30 June 2026.

Reform 3. Implementation of the Minimum Inclusion Income (VMI)

The objective of this reform is to improve social assistance and reduce poverty for the most vulnerable, while reducing the administrative burden for the National Paying and Social Inspection Agency, local public administrations, and the beneficiaries.

The reform shall be implemented through entry into force of legislative amendments that shall set out the methodological rules for implementing the legislation on VMI while maintaining at least the same level of adequacy for the benefits and eligibility conditions as foreseen in the Law 196/2016, the current applicable legislation, with the aim to reduce poverty, stimulate employment through activation measures and to increase education attainment. The payment of minimum inclusion income shall be financed by the Romanian state budget. The digital platform to support this reform shall be developed under pillar II –component 7. Digital transformation.

The implementation of the reform shall be completed by 30 June 2025.

Reform 4. Introduction of work cards and formalisation of work in domestic workers

The objective of this reform is to reduce un-declared work, provide incentives to formalise work and to allow inactive persons to find employment.

The reform shall be implemented through the entry into force of a legislative act for the establishment of the labour voucher system to boost formal employment. This voucher system should create incentives to create formal employment for domestic workers who are currently recorded as unemployed or inactive. The reform aims at establishing a system of payment and registration of persons carrying out domestic activities on the basis of work vouchers, purchased by the recipient and subsequently exchanged for money by the household provider, after deduction of the related contributions, thereby acquiring the status of insured person in the social security and health insurance system.

The implementation of the reform shall be completed by 30 March 2026.

Reform 5. Ensure a minimum wage setting

The objective of the reform is to establish a minimum wage setting mechanism that is based on objective criteria and consistent with job creation and competitiveness of the country.

The reform shall be implemented through the entry into force of a legislative act that establishes a new mechanism and a formula to objectively set the minimum wage level in a systematic manner, in consultation with social partners and taking into account the actions of the Union.

The implementation of the reform shall be completed by 30 March 2024.

Investment 1. Creation of a network of day centres for children at risk of separation

The objective of this investment is to prevent the separation of children from their family. Prior to the investment the children and family needs shall be mapped with the available services and infrastructure facilities for children at risk of separation from families, in particular in vulnerable communities. The investment shall consist of the entry into operation of a network of 150 day service centres, at least 10% in communities with a significant Roma population, to prevent the separation of children from their families. Out of the 150 day service centres, 145 shall comply with the nearly zero energy building requirement according to national guidelines. 5 shall comply with the objective of achieving a primary energy demand at least 20% lower than the nearly zero-energy building requirement according to national guidelines, which shall be ensured through energy performance certificates.

The implementation of the investment shall be completed by 31 December 2024.

Investment 2. Rehabilitation, renovation and development of social infrastructure for persons with disabilities

The objective of this investment is to improve the social services provided to persons with disabilities to support their de-institutionalisation. The investments shall make possible the entry into operation of 55 new community services for persons with disabilities (day centres, assistance and support services, and patient neuro-motor recovery service centres) which shall provide activities for at least 4 870 persons with disabilities in 4 years, to secure an independent living. Out of the 55 new community services, 45 shall be new nearly zero-energy buildings (NZEB), according to national guidelines. 10 shall comply with the objective of achieving a primary energy demand at least 20% lower than the nearly zero-energy building requirement according to national guidelines, which shall be ensured through energy performance certificates. Equally, the investment shall allow for the modernisation of another 50 community centres (day centres and neuro-motor recovery centres for persons with disabilities) through a national programme to finance investments such as, rehabilitation, consolidation, modernisation, and the provision of community-based services. Subsequently, 25 day centres and 25 outpatient neuro-mobility recovery service centres shall enter into operation through an open call for public social service provisions that shall meet the eligibility criteria for these investments, including the condition to accommodate at least 1 000 persons with disabilities, per year.

The implementation of the investment shall be completed by 31 December 2025.

Investment 3. Operationalisation of the introduction of work cards for domestic work

The objective of this investment is to operationalise the labour voucher system by ensuring simple and digital access for all users: workers and service beneficiaries.

The investment shall enable the Romanian National Agency for Employment (ANOFM) to deliver and manage a functional digital platform for the vouchers for domestic workers, which is expected to allow, inter alia: to carry out all voucher related transactions digitally (such as buying, encoding working hours), encoding domestic workers activity details (such as number hours, type of domestic activity carried out), and ensure the interoperability with other

relevant databases (such as the Ministry of Finance, Ministry of Labour and Social Protection, Public Employment Service databases).

The implementation of the investment shall be completed by 31 December 2023.

M.3. Description of the reforms and investments for the loan

Reform 6. Improvement of the social economy legislation

The objective of this reform is to mobilise to a higher extent the potential of social economy enterprises to innovate and contribute to the social and environmental challenges.

The reform shall be implemented by amending Law No 219/2015 on the social economy and the implementing rules in view of simplifying the registration procedure of social enterprises, ensuring their effective integration with employment policies, as well as active employment measures, including the provision of measure to improve sustainability of the social economy structures, for example by preferential public procurement regimes for goods and services delivered by social economy enterprises.

The implementation of the reform shall be completed by 30 June 2022.

Reform 7. Reform of long-term care services for older people

The objective of this reform is to improve the quality of the long-term care services for older people.

The reform shall be implemented by entry into force by legislative act of the strategy, including active ageing policies, long-term care medical needs, and community-based services for the elderly. The legislative act shall entail inter alia: an identified stable source of funding for the measures, a governance mechanism with clear responsibilities assigned for the public authorities at national and local level, a funding disbursement mechanism conditional to the achievement of key performance indicators associated to the policy objectives and the revision of minimum quality standards of the long-term care services. The legislative act shall also be based on a full mapping at community level (commune/town/county level) of the potentially dependent elderly population or at risk (e.g. poverty, health, un-accompanied, high degree of dependency) in view of establishing the type of long-term care services needed.

The implementation of the reform shall be completed by 31 December 2024.

Investment 4. Creation of a network of day care and rehabilitating centres for elderly

The objective of the investment is to give access to quality long-term care services for elderly through a network of day care and rehabilitation centres. The investment shall make possible the entry into operation of a network of 71 day service centres. The centres shall provide social assistance and rehabilitation services, and each one shall have at least a mobile team of service providers for the elderly that shall not be able to come to the centre. This shall be based on the mapping to be carried out in line with the National Long-Term-Care Strategy.

The implementation of the investment shall be completed by 30 June 2026.

M.4. Milestones, targets, indicators, and timetable for monitoring and implementation for the loan

N. COMPONENT 14: GOOD GOVERNANCE

The objectives of the component are, through a broad set of reforms and investments, (i) to improve governance with a predictable, informed and participatory decision-making system, (ii) to ensure the delivery of quality public services by a pool of professional and well-trained civil servants that adequately respond to the challenges, needs and expectations of citizens and businesses. This shall strengthen resilience and the capacity to adapt to the green and digital transition.

The specific objectives of the component are as follows:

1. Better coordination, formulation and implementation of government policies, increased transparency and trust in the public sector.
2. Effective human resources management in the public sector.
3. A coherent public sector wage policy, linked to performance and sustainable in the long term (Fair unitary pay).
4. Strengthening the independence of the judiciary, improving access to justice and increasing efficiency in the judiciary.
5. A more efficient national procurement system, including by strengthening the administrative capacity of contracting authorities/entities, within a flexible and coherent legal framework.
6. Improving public policy/decision making processes through stakeholder consultation.
7. Increased resilience of state-owned companies due to operationalisation of corporate governance principles.

The component is comprised of nine reforms and five investments.

The measures included in the component are expected to address a set of challenges highlighted by the country-specific recommendation to increase efficiency of public procurement and ensure full and sustainable implementation of the national public procurement strategy; to improve the quality and predictability of decision-making including by appropriate stakeholder consultations, effective impact assessments and streamlined administrative procedures and adequate involvement of social partners (country specific recommendation 3, country specific recommendation 4, country specific recommendation 5 2019 and country specific recommendation 4, 2020).

It is expected that no measure in this component does significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measures and the mitigating steps set out in the recovery and resilience plan in accordance with the DNSH Technical Guidance (2021/C58/01).

N.1. Description of the reforms and investments for non-repayable financial support

Reform 1.1 Enhancing the predictability and efficiency of decision-making processes by strengthening the capacity for policy coordination and impact analysis at the level of the government and coordinating ministries, as well as by strengthening the tools to increase the quality of public consultations at all levels of the administration

The objective of the reform is to improve the planning of government policies in the short and medium term (by developing institutional strategic planning mechanisms and linking them to budget programming), to strengthen the system of preliminary regulatory impact analysis (through procedural and institutional adjustments), to improve capacities of public policy planning and formulation (through new mechanisms for managing government strategies,

training or exchange of experience, and by introducing the concept of innovative governance), and to strengthen coordination at the Government Centre of policies of a strong horizontal nature and involving a large number of stakeholders (such as the Green Compact).

The following specific actions shall be carried out as part of this reform:

(1) Adoption and entry into force of the methodologies and procedures to improve public policy rationale and planning and administrative simplification (by 31 March 2022). As a result of this, at least 50% of the proposed legislative initiatives, included in the Government Annual Work Plan (GAWP), shall be approved within the planned timeline by 31 March 2026, and 25% of the presentation and motivation tools (i.e. explanatory memorandums/substantiation notes accompanying draft regulations) shall satisfy the set quality criteria (i.e. are assessed at an excellent or satisfactory level) as per the Government methodology adopted in the first annual report on the regulatory impact assessment (adopted in 2019) by 31 December 2024.

(2) Creation and operationalisation of a new strategic management and strategic planning system in all ministries, whereas strategies and strategic plans developed at ministerial level shall follow the provisions of the methodologies adopted under action (1) above and shall be uploaded to the Institutional Strategic Plans (ISP) monitoring platform as it is extended to all ministries (by 30 June 2023). As a result of this, all line ministries shall have planned their budgets per programme and at least three ministries shall have also executed/implemented budgets per programme by 30 June 2025.

(3) Adoption and entry into force of a legislative act operationalising a structure to ensure the implementation of an effective regulatory quality control mechanism by 31 March 2022.

(4) Establishment of the existing baseline of innovation at central government level (line ministries and General Secretariat of the Government) and the completion of an Action Plan for the introduction of innovation mechanisms and the creation of a regulatory environment to enable public administration to innovate (31 December 2022).

(5) Enhancing the quality of public consultations and developing civil society involvement in the decision-making process by strengthening the legislative and procedural framework for the coordination and effective implementation of open government initiatives (Open Government Initiative). This shall be attained through:

(i) Updates of the legal framework, extension of IT platform, capacity building for civil servants, Open Government Strategy adoption. As a result of this, there shall be a 20% increase in the number of draft legislative acts subject to public consultation and involvement of stakeholders at central level by 30 June 2026.

(ii) Trainings organised for civil society organisations to increase their capacity and skills to participate effectively in public consultation processes. As a result of this action, 800 representatives of civil society organisations shall be trained by 31 December 2025.

(6) Adoption and entry into force of the guidelines for appropriate use and enforcement of the Single Register of Interest Transparency (RUTI) aimed at proper implementation of the public register (by 30 September 2022).

(7) Adoption and entry into force of the Methodology for the use of Emergency Ordinances which shall specify the circumstances under which these ordinances

may be used and how their impact shall be assessed (ex post, ex ante) as well as the associated procedures for their preparation and approval (by 30 September 2022).

(8) Adoption and entry into force of the legislative amendments to Law 24/2000 on legislative technique to ensure publication of the full text of the laws after amendments have been made to them, which currently is not being done systematically (by 30 September 2022).

Reform 2 Strengthening coordination at the centre of government through an integrated and coherent approach to climate change and sustainable development initiatives

The objectives of the reform are the following: (i) to ensure efficiency and effectiveness of green measures and policies by operationalising a mechanism for coordinating and implementing the European Green Deal in Romania; and (ii) to reform public administration by promoting and coordinating a coherent public policy for sustainable development at all levels and in all sectors of the state with a focus on digital transformation and increasing the relevance/use of the scientific approach in public sustainable development policies.

This shall be attained through the establishment and operationalisation of an Inter-Institutional Climate Committee with a mandate to prioritise climate action and monitor progress annually by 30 June 2022. As a result of this action, 90% of the priorities set by the Inter-Institutional Climate Change Committee for 2025, in line with the objectives set out in the Integrated Energy and Climate Plan, shall be achieved by 31 March 2026 and 2000 public officials shall be qualified as ‘sustainable development expert’ in public institutions, at central and local level, by 30 September 2025.

Reform 3. Developing performance human resources management in the public sector

The objective of the reform is to modernise the management of the civil service, promoting a new transparent and inclusive recruitment system, using a competence framework appropriate to the realities of the public sector, directly linked to the institutional needs and the needs of the citizens and the business community they serve. These reform measures shall go hand in hand with a strong digitalisation of the public sector and the acquisition of digital skills among civil servants.

The following specific actions shall be carried out as part of this reform:

- (1) Performance of an ex-post analysis of the (pilot) national competition for the selection of two civil service categories in the central administration (by 30 June 2023).
- (2) Performance of at least two national civil servant recruitment competition annually for a minimum of 3 civil service categories/ grades (by 31 December 2023).
- (3) Adoption and entry into force of two legislative acts on the human resources management: (i) one introducing changes in the career management of civil servants to base it on meritocracy, and (ii) another one on management of contract staff in the public administration (by 31 December 2024).
- (4) Operationalisation of the competence frameworks in central public administration, which shall include the preparation and adoption of the legislative act and its effective implementation (by 31 December 2025).

Reform 4. Developing of a fair unitary pay system in the public sector

The objective of the reform is to ensure a fair and fiscally sustainable wage policy by closing the current wage gap in the budgetary system, restoring the hierarchy of functions within and across areas of activity, reviewing the bonus system, and establishing a performance incentive system.

The following specific actions shall be carried out as part of this reform:

- (1) Performance of an overall impact assessment of the Law on Unitarian Pay, including an assessment of the fiscal impact of the new law (by 31 March 2022);
- (2) Adoption and entry into force of the new legal framework on remuneration of civil servants (Law on Unitarian Pay) (by 30 June 2023);

Reform 5. Ensuring the independence of the judiciary, enhancing its quality and efficiency

The objective of the reform is to strengthen the independence of magistrates, making the functioning of judicial institutions more efficient, in accordance with the relevant case-law of the Court of Justice of the European Union and taking into account recommendations made in the CVM reports, the GRECO reports and the opinions of the Venice Commission and the Rule of Law Reports.

The following specific actions shall be carried out as part of this reform:

- (1) Adoption and entry into force of the law approving the strategy for the development of the judiciary 2022-2025 (by 31 March 2022). The strategy shall comprise two pillars: (i) policies to strengthen the independence of the judiciary and strengthen the rule of law; and (ii) policies to strengthen institutional capacity concerning resources, processes and management, and policies on the quality and efficiency of services in the judiciary.
- (2) Adoption and entry into force of the law amending the powers of the National Agency for the Management of Seized Assets (by 31 March 2022).
- (3) Adoption and entry into force of the “Justice laws” (laws on the status of magistrates, judicial organisation, Superior Council of Magistracy) (by 30 June 2023). The new justice laws shall provide among others for the following: (i) strengthening the independence of judges and prosecutors; (ii) admission to the profession and career advancement on meritocratic grounds, in conjunction with the strengthening of the role of the National Institute of Magistracy in organising and conducting examinations and competitions; (iii) the efficient functioning of the courts, the Superior Council of Magistracy as well as the Public Prosecutor’s Office; (iv) the effective accountability of magistrates, but also their protection against any interference and abuse; (v) making judicial inspection more effective, ensuring greater guarantees of independence and impartiality.
- (4) Adoption and entry into force of amendment of the Criminal Code and Criminal Procedure Code in order to align them with the Constitution of Romania, following the decisions of the Constitutional Court (by 31 December 2022).
- (5) Training sessions (300 in total) organised for the judges, prosecutors and court clerks to improve the quality and efficiency of justice system (by 31 December 2025).

Reform 6. Stepping up the fight against corruption

The objective of the reform is to step up the fight against corruption, by adopting the national strategic framework for its prevention and repression, by strengthening the capacity of the institution competent to combat it, namely DNA, by recovering the damage and proceeds of crime, to strengthen integrity in the civil service and ensuring an efficient system for declaring assets and interests, while developing and implementing the new anti-corruption strategy.

The following specific actions shall be carried out as part of this reform:

- (1) Adoption and entry into force of the legislative act approving new National Anti-Corruption Strategy (by 31 December 2021). As a result of this, by 31 December 2025 at least 70% of the measures foreseen in the new anti-corruption strategy shall be implemented and

50% increase of the value of seized assets managed by the National Agency for the Management of Seized Assets shall be attained.

(2) Occupation rate of 85% of National Anti-Corruption Directorate prosecutor positions attained (by 30 June 2023).

(3) Adoption and entry into force of the law transposing the directive on whistle-blowers' protection (by 31 March 2022).

Reform 7. Evaluation and update of legislation on the integrity framework

The objective of this reform is to strengthen integrity in the civil service and to make digitalisation and transparency more efficient by providing the necessary resources for the submission of asset and interest declarations in digital format with a certified electronic signature.

The following specific actions shall be carried out as part of this reform:

(1) Adoption and entry into force of the consolidated laws on integrity (by 31 December 2024).

(2) Review of the codes of ethics and conduct for the Government, in addition to the existing ones for the civil service and adoption and implementation of enforcement measures (by 31 December 2024).

Reform 8. Reforming the national procurement system

The objective of this reform is to improve the efficiency of the public procurement system and to ensure the full and sustainable implementation of the National Public Procurement Strategy, as endorsed by Government Decision No 901/2015.

The following actions shall be performed under this reform:

(1) Adoption and entry into force of the amendment of national legislation on remedies (Law No. 101/2016) in order to streamline the awarding process (by 31 March 2022).

(2) Adoption and entry into force of the updated National Public Procurement Strategy including horizontal measures to support the implementation of the national recovery and resilience plan (by 30 June 2023).

(3) Operationalisation of centralised procurement bodies (CPBs) for local authorities (by 31 December 2025).

(4) Specialised training in the field of public procurement provided to at least 350 persons (both civil servants and contractual staff) (by 31 December 2023).

(5) Interconnection and interoperability with other databases of the Public Procurement Electronic System (SEAP) (by 31 December 2023).

(6) Operationalisation of e-procurement system including e-forms, automated qualification assessment, e-catalogues, e-invoicing, e-payment (by 31 March 2025).

Reform 9: Improve the procedural framework for the implementation of corporate governance principles in state-owned enterprises

The objective of this reform is to improve the corporate governance of all state-owned enterprises in Romania by enforcing OECD standards.

The reform shall be implemented through the entry into force of amendments to Law 11/2016, removing all exceptions to compliance with the corporate governance standards, including for state-owned companies at local level. These amendments shall enforce a separation between

the regulatory and ownership functions, remove any direct or indirect advantage that might derive from State ownership, be it in terms of market rules/regulations, financing, taxation, or public procurement, and ensure that any state-owned enterprise pursue obtaining profitability.

The reform shall also set up and operationalise a task-force at the Centre of the Government to ensure the monitoring of the application of corporate governance standards, having the ultimate responsibility of ensuring a transparent and competitive selection procedure for approving the appointment of administration board members, monitors, and for evaluation and controls. The task force shall publish regular reporting of performance indicators and enforces sanctions for state owned enterprises non-compliant with key performance indicators. A Monitoring Dashboard with financial and non-financial targets and performance indicators for all categories of public companies (including key sectors such as transport, energy, public utilities) shall be developed, yearly published and used centrally for reporting and monitoring progress in achieving performance for all categories state-owned enterprises.

In line with Article 7 (2) of the Recovery and Resilience Regulation, Romania has requested technical support through the instrument on technical assistance for the implementation of reform to improve the framework on corporate governance in state-owned enterprises. Technical assistance is needed with a view to amend the relevant legislation (Law No 11/2016 and Government Decision No 722/2016) and the State's shareholding policy (including consultation of all interested parties), and to create the appropriate institutional framework in order to centralise the State shareholder function under one structure/institution. Technical assistance is also needed for the development of institutional capacity in the area of state-owned enterprise management (increasing the expertise of the corporate governance departments in ministries managing state-owned enterprises), and the capacity for coordinating and monitoring the new taskforce set up at the centre of the government.

The implementation of the reform shall be completed by 30 June 2026. The updated legislation for state-owned companies (including those at local level) shall enter into force by 31 December 2022. The permanent task-force to ensure the monitoring and enforcement of the application of corporate governance standards shall be operational by 31 December 2022. The Monitoring Dashboard shall be operational by 30 June 2023.

Investment 1 Optimising judicial infrastructure to guarantee access to justice and quality of services

The objective of this investment is to improve the efficiency of the judicial system and access to justice.

This shall be attained through the construction of 3 new court building, which shall comply with the objective of achieving a primary energy demand (PED) at least 20% lower than the nearly zero energy building (NZEB) requirement according to national guidelines, which shall be ensured through energy performance certificates. Access to buildings shall be adapted to persons with disabilities and this adaptation shall be accompanied by compliance with fire and technical protection standards, including seismic resilience. Priority shall be given to the locations of judicial authorities in economically less developed parts of Romania.

The implementation of the investment shall be completed by 30 June 2026.

Investment 2 Developing the logistical (non-IT) infrastructure needed to fight corruption and recover the proceeds and damage from crime, including training in these areas

The objective of this investment is to expand the storage capacity of ANABI through the construction/development of 3 new warehouses for the storage of seized property which shall comply with the objective of achieving a primary energy demand (PED) at least 20% lower than the nearly zero energy building (NZEB) requirement according to national guidelines, which shall be ensured through energy performance certificates.

The implementation of the investment shall be completed by 30 September 2025.

Investment 3 Creation of local partnership structures between the local governments and the civil society

The objective of the investment is to improve stability, predictability and support for partnership in public policy formulation aims on the one hand to stimulate permanent working partnerships between public administration and civil society and on the other hand to improve citizens' participation and active involvement in the decision-making process while increasing the digitalisation of the NGO sector as prerequisites for improving the quality and predictability of decision-making with a positive impact on the quality of public services offered to citizens and business.

As a result, at least 50 partnerships between local public administration authorities (LPA) and NGOs shall be established and operational and at least 15 functional collaborative non-governmental sector initiatives shall be made operational.

The implementation of the investment shall be completed by 31 March 2026.

Investment 4. Increasing the capacity of civil society organisations to foster active citizenship, to engage professionally in the planning and implementation of public policies on social rights addressed by the national recovery and resilience plan and to monitor related reforms

Increase the capacity of civil society organisations to foster active citizenship, to engage professionally in the planning and implementation of public policies on social rights addressed by the NRDP and to monitor related reforms.

As a result of this investment, at least 15 functional non-governmental sector collaborative initiatives (networks, coalitions, platforms, groups of organisations including think tanks, analytical and research structures) shall be set up to ensure continuity in the public consultation processes, i.e. monitoring the implementation of at least 15 public policies/national reforms in areas with a social function.

The implementation of the investment shall be completed by 31 March 2026.

Investment 5. Monitoring and implementation of the plan

The objective of this investment is to set up and operationalise the integrated IT system, part of the government cloud and connected with other national and EU systems used for the purpose of the implementation of the recovery and resilience plan.

The investment consists of two phases:

- in the first phase, the system shall be developed and shall enable the collection of data for reporting purposes (as foreseen in the RRF scoreboards), the monitoring of progress towards meeting milestones and targets, the preparation of the management declarations, audit summary and payment applications, communicating the requirements for the stakeholders, monitoring the complementarities with other sources of funding, performing ex-ante evaluation to avoid the risk of double funding, ensuring the ex-ante and ex-post verification of the procurement procedures performed by national recovery and resilience plan beneficiaries and ensuring the timely detection and correction of irregularities, fraud and conflict of interest.

- in the second phase, the interconnection with other systems of management and control of European funds and from the national budget and the integration with the government cloud shall be prepared and operationalised.

The implementation of the investment shall be completed by 31 December 2021, before the first payment request is submitted to the European Commission.

			(MIPE), Ministry of Finance (MoF) and the Audit Authority (AA)	including clear mandate to three institutions						submitted to the European Commission, the management declaration and the audit summary. The same framework shall also entrust MoF with the duties in relation to the signing of the loan agreement and the financing agreement together with MIPE, and also to specify the activities that the audit authority shall perform as part of its mandate for national recovery and resilience plan.

O. COMPONENT 15: EDUCATION

This component of the Romanian Recovery and Resilience Plan consists of 6 sub-components addressing key challenges in the education system. The sub-components are stemming from the ‘Educated Romania’ project, which is the overarching strategy for reforming the education system in Romania. The sub-components are the following:

- i. Early childhood education and care: the development of a unitary, inclusive and quality early-childhood education and care system, improving access to and participation of 0 to 6 year-olds, based on an effective inter-institutional cooperation and cross-sectoral coordination mechanism;
- ii. Early school leaving: the reform of compulsory education by increasing the autonomy of schools to prevent and reduce early school leaving, through social-inclusion programmes and the provision of equal opportunities;
- iii. Vocational education and training and dual education: the creation of a full professional route for higher technical education;
- iv. Digitalisation of education: the digitalisation of the educational process, also through changes in the legal framework, to enable integrated approaches and improving digital skills for both students and teachers;
- v. Infrastructure: upgrading schools and universities infrastructure in urban and rural areas, including by amending and streamlining the regulatory framework to ensure environmentally-friendly safety and quality standards;
- vi. School governance: the reform of the governance of pre-university education and professionalisation of its management, with increased school autonomy, to ensure stability, consistency and competence.

The component includes 6 reforms and 18 investments, as well as an overarching reform for adopting the legislation on the implementation of the “Educated Romania” project.

The Component shall contribute to addressing the country-specific recommendation addressed to Romania on improving the quality and inclusiveness of education, in particular for Roma and other disadvantaged groups, and on improving skills, including digital, notably by increasing the labour market relevance of vocational education and training and higher education (country-specific recommendation 3, 2019). It also shall address the recommendation on strengthening skills and digital learning and ensuring equal access to education (country-specific recommendation 2, 2020).

It is expected that no measure in this component does significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measures and the mitigating steps set out in the recovery and resilience plan in accordance with the DNSH Technical Guidance (2021/C58/01).

O.1. Description of the reforms and investments for non-repayable financial support

Reform 1. Elaboration and adoption of the legislative package for the implementation of the “Educated Romania” project

The objective of this reform is the adoption and entry into force of the legislative package for implementing the “Educated Romania” project, which is the overarching strategy for reforming the education system of Romania. All the subsequent reforms and investments are integral parts of this strategy.

The reform shall consist of the following steps leading to the adoption and entry into force of the legislative package for the implementation of “Educated Romania”: setting-up of an inter-ministerial working group coordinated by the Prime Minister, which shall monitor the implementation of the project; a Government Decision approving the Action Plan for the implementation; and the preparation of the legislative package in close consultation with key stakeholders.

The implementation of the reform shall be completed by 30 September 2023.

- i. Early childhood education and care:

Reform 2. Unitary, inclusive and quality early-childhood education system

The objective of the reform is to improve access to early childhood education and care for children from birth until the start of primary education, with a particular focus on children from socio-economically disadvantaged groups.

The reform includes the adoption of an Inter-sectoral Framework Programme for the development of unitary, inclusive and quality early-childhood education services, with clear responsibilities for the ministries involved (Ministry of Education, Ministry of Labour and Social Protection, Ministry of Health and Ministry of Development, Public Works and Administration), as well as annual operational implementation plans. The Inter-sectoral Framework Programme shall be adopted by a Ministerial Order and enter into force by 31 December 2022.

The reform also includes the adoption of an updated legislative framework for the establishment, organisation and operation of complementary early childhood education services.

This reform is expected to raise the participation rate of 0-3 year-olds in early childhood education services to 19% by 31 December 2025. In addition, the participation rate of 3-6 year-olds in education services is expected to raise to 91% by 31 December 2025.

The implementation of the reform shall be completed by 31 December 2025.

This reform shall be complemented by 3 related investments:

Investment 1. Construction, equipping and operationalisation of 110 crèches

The objective of this investment is to increase the capacity of the early-childhood education system by providing crèches to improve access and participation in standard early-childhood education and care services. The investments involve the construction, equipment and operationalisation of 110 energy-efficient crèches at national level, providing a standard early-childhood education service per every 5 000 to 10 000 inhabitants, for up to 4 500 children.

The 110 crèches with a capacity of between 50 and 110 places (hosting 2, 3 or 5 groups) shall be built by public operators. In particular, 1 large crèche, 2 medium crèches and 107 small crèches are expected to be built. Newly-constructed buildings shall comply with the objective of achieving a primary energy demand at least 20% lower than the nearly zero-energy building requirement according to national guidelines, which shall be ensured through energy performance certificates

This investment shall be achieved through the award of grants to public operators, with territorial distribution, for crèches, early-childhood education and care services.

The implementation of the investment shall be completed by 31 December 2025.

Investment 2. Setting up, equipping and operationalising 412 complementary services for disadvantaged groups

The objective of this investment is to increase the capacity of the early-childhood education system and its quality, to improve participation rates, both at pre-primary and pre-school level, by serving around 20 000 children from disadvantaged backgrounds.

The investment shall include the following actions:

1. Development of the methodology for the grants' award to public and private operators for the establishment and equipment of the 412 complementary services;
2. The step-by-step allocation, of 2 lots of 200 and 212 units/lot respectively, to public and private operators of grants for the establishment, equipment and operationalisation of the 412 complementary services;
3. The completion of the establishment, equipment and operationalisation of the 412 complementary services.

The implementation of the investment shall be completed by 31 March 2024.

Investment 3. Development of framework programme for the continuous training of professionals in early-childhood education services

The objective of this investment is the professionalization of staff working in early-childhood education services under the approaches promoted by the curriculum for early childhood education adopted in 2019 and, also, for the professionalization of staff in service for monitoring the quality of early childhood education services for children under 3,

The investment shall consist of:

1. Design, award and implementation of a technical assistance contract for the preparation, accreditation, conduct and follow-up of 2 continuous training programmes, namely:
 - one training programme for trainers in early-childhood education: implementation of a specific curriculum, with modules for teaching and non-teaching staff, including a digital education module;
 - one training programme for trainers (from three sectors: social, education and health), to monitor the quality of early-childhood education services;
2. Development of the methodology for the award of 42 grants for training providers to carry out the training programmes, using trainers trained under the technical assistance contract;
3. Allocation of the 42 grants for the training of 19 950 staff (teaching and non-teaching staff, 475 per county) working in standard and complementary early-childhood education services, prioritising those in the newly established services.

The implementation of the investment shall be completed by 31 December 2025.

ii. Early school leaving:

Reform 3. Reform of the compulsory education system to prevent and reduce early school leaving

The objectives of this reform are (a) to implement the Early Warning Mechanism in Education to reduce absenteeism, improve evaluation outcomes, achieve a higher participation rate in national examinations and a higher percentage of pupils completing compulsory education, by using a decentralised approach and increasing the schools' autonomy in the use of resources; and (b) to monitor, through the Early Warning Mechanism in Education IT tool, pupils at risk of early-school leaving and support schools in relevant data collection, carrying out individualised work plans and training.

These objectives shall be achieved through the entry into force of a Government Decision for the implementation of the National Programme for Early School Leaving, by 31 December 2021, and through the scaling-up of the Early Warning Mechanism in Education IT tool at national level, through a ministerial order that shall enter into force on 31 December 2022.

The implementation of the reform shall be completed by 31 December 2022.

This reform shall be complemented by 2 related investments:

Investment 4. Supporting educational establishments with high risk of drop-outs

The objective of this investment is to reduce early school leaving by means of using the Early Warning Mechanism in Education methodology and IT tool to allocate financial resources to schools for the support of students for the transition from lower to upper secondary education. The ultimate goal is the reduction in early school leaving.

The investment shall be carried out with the following steps:

1. Allocation of 3-year grants in 2 lots throughout 2022 and 2023 to a minimum of 2 500 schools. The allocation shall be based on a short-listing of institutions at risk of drop-out developed by the Ministry of Education and shall be completed by 30 June 2023.
2. Tracking of implementation through two final targets contemplating a 10% reduction at national level of schools under high priority on the Composite Vulnerability Index for early school leaving at the end of the 3-year grants (30 June 2026), and the digitalisation of 2 500 schools included in the drop-out programme (31 December 2023).

The implementation of the investment shall be completed by 30 June 2026.

Investment 5. Trainings for users of the Romanian Integrated Education Information System (SIIR) and the Early Warning Mechanism (MATE) IT tool and systemic interventions to reduce early school leaving

The objective of this investment is to develop and implement a training for the users in schools of the Romanian Integrated Education Information System (SIIR) and the Early Warning Mechanism IT tool (MATE IT tool). The training modules shall be tailored to student needs and skills (inclusive education), student-centred teaching approaches, improving teaching conditions; providing training for the use of the MATE computer module; developing and implementing awareness campaigns for students and teachers; improving students' socio-emotional skills for completing compulsory education.

45 000 teachers shall have completed the specific training by March 2023.

The implementation of the investment shall be completed by 31 March 2023.

- iii. Vocational education and training (Dual system):

Reform 4. Creation of a full professional route for higher technical education

The objective of this reform is to develop dual education focused on students' needs and aligned with labour market needs, both by increasing the number of fields, qualifications and graduates, and by ensuring a complete educational pathway for students registered under dual secondary, so that they may go up to the third level education programmes (qualification 3-7).

The reform shall consist of:

- Entry into force of the legislative framework with the methodology for organizing the complete dual route with a duration of 4 years, with access to tertiary education starting with the school year 2023-2024.

- Development of the regulation of the new Baccalaureate, including dual education graduates. Following its promotion, graduates shall be able to access university study programs. The unitary baccalaureate shall be applied in Romania starting with June 2027 session.

The legislative framework for organizing the complete dual education route shall enter into force by 30 September 2022. The implementation of the reform shall be tracked through the raise of the share of students enrolled in the professional route, in relation to the total number of high school students, from 17% to 40% by 30 June 2026.

The implementation of the reform shall be completed by 30 June 2026.

This reform shall be complemented by 4 related investments⁴⁹:

Investment 6. Development of 10 regional consortia and the development and equipping of 10 vocational campuses

The objective of this investment is to ensure equal access to quality initial vocational education and training, by developing partnerships with economic operators or other relevant partners to adapt VET to labour market needs.

The investment shall consist of the establishment of 10 regional consortia, each consisting of at least the following types of entities: local public authorities, local businesses, professional and technical schools, technical universities, to support employers to play an active role in the field of vocational training of pupils and students; and the construction, within the above regional consortia, of 10 integrated, upper secondary and university vocational campuses for vocational education and training.

The investment results shall be:

- 10 integrated and operational dual education consortia linked to the requirements of economic operators in the concerned area. The selection process shall be based on a unitary methodology developed by the Ministry of Education, applicable at national level to identify the most appropriate and impactful regional partnership structures. Preferably, each partnership structure shall be located in one distinct development region, in order to ensure an equal geographical distribution at national level. The 10 selected regional professional consortia shall be supported through a grant scheme to ensure optimal training conditions for students and to provide financial support for a duration of 4 years. Priority shall be given to secondary school pupils from disadvantaged backgrounds, including Roma.
- 10 mixed integrated vocational campuses (high schools and technical universities), with the objective to provide a modern physical infrastructure for the mixed integrated vocational housing the regional partnership structures/consortia. The implementation shall take place at local level, and cities and municipalities are expected to participate in calls for the realisation of infrastructure projects in their territory.

Newly constructed buildings shall comply with the objective of achieving a primary energy demand (PED) at least 20% lower than the NZEB requirement, which shall be ensured through energy performance certificates.

In order to ensure that the measure complies with the ‘Do no significant harm’ Technical Guidance (2021/C58/01), the eligibility criteria contained in terms of reference for upcoming calls for projects shall exclude the following list of activities: (i) activities related to fossil

⁴⁹ Investments 13 and 14 are included in Section O.3.

fuels, including downstream use⁵⁰; (ii) activities under the EU Emission Trading System (ETS) achieving projected greenhouse gas emissions that are not lower than the relevant benchmarks⁵¹; (iii) activities related to waste landfills, incinerators⁵² and mechanical biological treatment plants⁵³; and (iv) activities where the long-term disposal of waste may cause harm to the environment. The terms of reference shall additionally require that only activities that comply with relevant EU and national environmental legislation may be selected.

The vocational campuses shall be built by 30 September 2025 and the dual education consortia shall function at full capacity by 31 March 2026. Tracking of implementation shall be ensured by students enrolled in the full dual route, increasing from a baseline number of 1 847 in 2020, to 3 000 students on June 2026. Sustainability of the funding programmes after 2026 shall be ensured through the state budget.

The implementation of the investment shall be completed by 30 June 2026.

Investment 7. Transformation of agricultural high schools into professionalisation centres

The objective of this investment is to support 57 agricultural colleges, which shall be organised in 5 regional centres corresponding to the 5 agricultural universities established in Romania. The funding scheme for the agricultural colleges, with a maximum ceiling of 5 years, shall cover at least the following types of activities:

- Modernise, renovate and extend school laboratories, workshops and IT laboratories, canteens, accommodation for students.
- Purchase biological material, agricultural equipment and machinery for performing agricultural works.
- Teachers training based on a specific agriculture-related curricula developed by the Ministry of Agriculture and Ministry of Education.

Each agricultural school shall be equipped with an IT laboratory, which shall include simulators and software necessary for theoretical and practical teaching/learning activities.

When it comes to renovations, the contracts shall include a minimum requirement of reducing energy consumption for heating by at least 50% compared to the annual energy consumption for heating prior to the renovation of the building, which shall deliver an increase of 30% primary energy savings compared to the pre-renovation state. In this context, at least 90% of the renovation-related costs shall pertain to energy efficiency improvements.

⁵⁰ Except projects under this measure in power and/or heat generation, as well as related transmission and distribution infrastructure, using natural gas, that are compliant with the conditions set out in Annex III of the 'Do no significant harm' Technical Guidance (2021/C58/01).

⁵¹ Where the activity supported achieves projected greenhouse gas emissions that are not significantly lower than the relevant benchmarks an explanation of the reasons why this is not possible should be provided. Benchmarks established for free allocation for activities falling within the scope of the Emissions Trading System, as set out in the Commission Implementing Regulation (EU) 2021/447.

⁵² This exclusion does not apply to actions under this measure in plants exclusively dedicated to treating non-recyclable hazardous waste, and to existing plants, where the actions under this measure are for the purpose of increasing energy efficiency, capturing exhaust gases for storage or use or recovering materials from incineration ashes, provided such actions under this measure do not result in an increase of the plants' waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

⁵³ This exclusion does not apply to actions under this measure in existing mechanical biological treatment plants, where the actions under this measure are for the purpose of increasing energy efficiency or retrofitting to recycling operations of separated waste to compost bio-waste and anaerobic digestion of bio-waste, provided such actions under this measure do not result in an increase of the plants' waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

The contracts shall also require that newly constructed buildings shall comply with the objective of achieving a primary energy demand (PED) at least 20% lower than the NZEB requirement according to national guidelines, which shall be ensured through energy performance certificates.

The implementation of the investment shall be completed by 30 September 2025.

iv. Digitalisation of education:

Reform 5. Adoption of the legislative framework for the digitalisation of education

The reform aims to ensure the necessary legal framework for the development of digital competences for pupils by defining the competency profile for education professionals, revising the compulsory school curriculum and the framework plan for ICT disciplines for all school levels.

The reform shall be implemented by the entry into force of the legislative framework for digitalisation of educational processes and content and for conducting online assessments. Moreover, through this reform minimum and optimal standards for ensuring the quality of online educational activities shall be set. The reform is expected to align the educational system to DigComp European framework for digital competences for students, including by updating the curriculum, and developing digital teaching materials. Lastly, the reform shall operationalise the links between the teacher's competences profile and the curriculum for initial vocational training, continuing vocational training and the one for skills training.

The implementation of the reform shall be completed by 30 June 2024.

This reform shall be complemented by 4 related investments⁵⁴:

Investment 8. In-service training programme for teaching staff

The objective of this investment is to develop digital pedagogy skills for teachers including those related to the collection and efficient use of available tools and resources. The investment targets all the specific activities ranging from teaching, assessment, communication with parents, creation and exchange of digital content and resources.

The investment shall be implemented through the development of thematic training courses, for the development of digital literacy and digital pedagogy competences in particular for teachers in rural areas and other disadvantaged environments. The DigComp European framework for digital competences and internationally recognised digital skills standards (ECDL) shall be taken into account for the design of the training programme. It is expected that 100 000 teachers shall participate to the training programmes. The digital skills training shall be complemented by a platform for collection of multimedia lessons to serve as good practice models for each curriculum area/learning discipline, for different levels of education. 50 000 teachers shall benefit from the exchange through the dedicated platform. A framework to monitor and assess the practical application of acquired skills, to ensure the assessment of digital skills and to initiate corrective actions shall be created to ensure the long-lasting effect of the training programme.

The implementation of the investment shall be completed by 30 September 2025.

Investment 9. Ensuring digital technology equipment and resources for schools

The objective of this investment is to ensure the necessary infrastructure and technological resources for pre-university schools with a focus on disadvantaged areas (especially rural

⁵⁴ Investments 12 and 13 are included in Section O.3.

areas), enabling pupils' access to technology through IT laboratories and dedicated equipment.

The investment shall consist in grants for modernisation of at least 5 200 informatics laboratories, the development of over 1 100 technological hubs (as smart labs) and for ensuring the infrastructure and digital equipment for over 3 600 schools not covered by any other funding programmes. Smart labs shall enable pupils' digital and technological literacy, teacher education for both basic and advanced digital skills and competences needed in the labour market, while using new technologies 4.0 and developing applied creativity through 3D printing and 3D design software.

The implementation of the investment shall be completed by 31 March 2025.

v. Infrastructure⁵⁵:

Reform 6. Updated regulatory framework to ensure environmentally-friendly design, construction and endowment standards in the pre-university education system

The objectives of this reform are (a) to increase the quality and safety of learning environments, including regulation on teaching material, furniture, and equipment of laboratory equipment and technological workshops; and (b) to develop and adopt the legal framework for fostering the transition to green buildings in schools.

In the context of the transition to green and smart buildings, Romanian authorities shall update the legislation on the design, endowment and operation of schools, including regulation on teaching material, furniture and equipment of laboratory and science laboratories and shall develop a Methodology for the operation and organisation of green schools.

The implementation of the reform shall be completed by 30 June 2022.

This reform shall be accompanied by 3 investments in school related infrastructure:

Investment 10. Green-schools network development and purchase of green minibuses

The objective of this investment is to ensure the sustainability of pre-university schools through the transition to green schools and green mobility (electric minibuses). To ensure the transition towards a sustainable education system, the Ministry of Education shall start developing a network of sustainable, environmentally-friendly schools. 300 000 m² of school area shall benefit from structural changes to ensure sustainability (thermal insulation, solar panels, green space planning, selective collection) and 46 400 m² of green new pre-university school area shall be built. The methodology for selecting the Green Schools may consider criteria such as: availability of the school; number of pupils; equitable geographical distribution of awards; equitable rural-urban distribution of awards; level of pollution of the area; previous experience in project implementation and in carrying out environmental projects/activities.

Newly constructed buildings shall comply with the objective of achieving a primary energy demand (PED) at least 20% lower than the NZEB requirement according to national guidelines, which shall be ensured through energy performance certificates.

For renovations, the contracts shall include a minimum requirement of reducing energy consumption for heating by at least 50% compared to the annual energy consumption for heating prior to the renovation of the building, which shall deliver an increase of 30% primary

⁵⁵ Investment 17 is included in Section O.3.

energy savings compared to the pre-renovation state In this context, at least 90% of the costs shall pertain to energy efficiency improvements.

The 3 200 school minibuses are intended for the transport of pupils from isolated localities in rural areas. The Ministry of Education shall carry out an analysis at national level, with the involvement of local public authorities, to identify situations in which transportation of pupils to schools in other localities shall be required. This investment also complements reform 2 on preventing early school leaving, by ensuring mobility means for pupils in areas with low population, facilitating their access to quality education.

The electric minibuses shall be purchased and in use by 30 June 2023 and the green buildings shall be completed by 31 December 2025.

The implementation of the investment shall be completed by 31 December 2025.

Investment 11. Provision of facilities for pre-university classrooms and school laboratories/workshops

The objective of this investment is to provide the necessary facilities to meet quality standards in classrooms and in school laboratories/workshops, including the provision of specialised teaching facilities and equipment for disadvantaged pupils and students with special educational needs.

Provision of the necessary facilities for classrooms and school laboratories shall be carried out on a decentralised basis at school level, county school inspectorates and local public authorities. 75 000 classrooms and 10 000 school science laboratories/ shall be equipped.

Investments shall be prioritised for those educational establishments with no investment in classroom and laboratory equipment in the last 10 years.

The implementation of the investment shall be completed by 30 June 2024.

Investment 12. Support for rural school consortia

This investment is addressed to students from villages and small municipalities with the view of improving their access to quality education within modern rural-school campuses.

3 rural school consortia shall be created to strengthen the rural educational environment by ensuring optimal teaching conditions and respecting the principle of social fairness.

The three consortia shall be financed through a grant scheme managed by the Ministry of Investment and European Projects, which shall select the three Local Action Groups or associations of Local Action Groups that meet at least two criteria: (a) demonstrate the demographic decline of the microregion over a period of minimum 7 years; (b) may present a firm agreement of local public authorities to the rural school campus project.

Subsequently, 3 modern campuses with a capacity of 300-1 500 places shall be developed. The campuses shall be provided with modern educational facilities, workshops and laboratories, after-school facilities, sports rooms and pitches, facilities for non-formal activities, kitchen and accommodation facilities for pupils and teachers, and facilities for teachers. Campuses shall also have a fleet to provide daily transport and school trips for pupils.

Newly constructed buildings shall comply with the objective of achieving a primary energy demand (PED) at least 20% lower than the NZEB requirement according to national guidelines, which shall be ensured through energy performance certificates.

The implementation of the investment shall be completed by 30 June 2026.

vi. School governance:

Reform 7. Reform of the governance of the pre-university education system and professionalization of management

The objectives of this reform are for schools to benefit from more efficient management and greater autonomy. The governance reform shall increase the capacity at school level to implement all reforms proposed for education.

The Ministry of Education shall sign a technical assistance contract to carry out an analysis of the governance in the pre-university education system, including recommendations and a plan for restructuring the management of the system, in a framework of increased autonomy of schools.

The plan shall also set out a pilot plan focusing on curriculum architecture frameworks in 60 schools, to test the impact of systemic changes in order to adjust, correct and adapt them to needs before scaling them up.

The implementation of the reform shall be completed by 31 March 2023.

This reform shall be complemented by one investment⁵⁶.

⁵⁶ Investment 18 is included in Section O.3.

O.2. Milestones, targets, indicators, and timetable for monitoring and implementation for non-repayable financial support

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target

The pilot programme involving the 60 schools shall consider school curricula, governance and management and identify areas where the management and quality of teaching/learning may be improved.</p>

O.3. Description of the reforms and investments for the loan

vii. Vocational education and training (Dual system):

Investment 13. Equipping of IT laboratories in vocational education and training (VET) schools

The objective of the investment is to support the digital transformation of schools belonging to the VET network and facilitate e-learning. It includes investments in digital infrastructures for teaching and digital teaching tools for 909 VET schools.

The investment also includes the purchase of classroom IT equipment and covers underlying infrastructure equipment necessary to use the digital teaching equipment. The implementation of the investments shall take place through the County School Inspectorate or through local authorities or schools which are expected to launch calls for the provision of IT equipment and laboratories within the VET education units.

The implementation of the investment shall be completed by 30 September 2023.

Investment 14. Equipping of practice workshops in VET schools

The objective of this investment is to equip school workshops within VET education units, including dual training units (and excluding those with an agricultural profile, which are subject of Investment 7).

Through the funding scheme, each of the 909 VET schools shall benefit from a grant of a maximum amount of EUR 100 000 in order to equip the practice workshops according to their specialization and concrete needs. One-third of the investment shall be dedicated to equipping the workshops with digital equipment.

Procurement shall be done through the County School Inspectorates or through the administrative territorial units/schools.

The implementation of the investment shall be completed by 30 September 2023.

viii. Digitalisation of education:

Investment 15. Online School: Assessment platform and content development

This investment aims to provide an integrated approach to teaching activities online or in special situations by ensuring the complementarity of online hours with learning platforms, digital manuals and supporting materials needed for a complete and complex process. Therefore, a digital ecosystem for the development of digital skills at school level shall be created as well as an underpinning framework for remote assessment and testing.

The investment shall be implemented through a competitive call for projects for the development of the Open Educational Resources. The investment shall finance: i) the expansion of the current digital platform for textbooks by adding teaching support for all disciplines and all classes of secondary education, ii) the creation of digital educational content for three different levels of knowledge deepening (remedial, accessible, performance), iii) the development of inclusive educational resources for pupils with disabilities, athletes, hospitalised pupils and iv) the development of a platform for assessment based on European best practices.

The implementation of the investment shall be completed by 31 March 2025.

Investment 16. Digitisation of universities and their preparation for the digital professions of the future

The objective of this investment is to improve the communication between universities and students and to create the conditions for teamwork in the digital environment, to automatise the internal administrative processes in universities, to improve the educational content system management and to create an RDI infrastructure for addressing advanced technologies.

The investment shall be implemented through two actions:

- i. The digitalisation of the National Council of Rectors (CNR) which shall be achieved through the operationalisation of an integrated national platform which shall connect 11 university centres with the aim of transforming universities into regional hubs for economic development, skills required by the labour market, bridging the gap between the economic environment and local authorities. CNR's capacity to represent Romanian universities at national and international level shall be increased through the application/ development/ deployment of digital technologies in the academic space using principles such as Good Practice - Smart Academic Life and the Digital Applications Smart Governance, Smart People, and Smart Influence. The concept of a smart campus integrates new learning models, smart resource sharing and the use of buildings and transport. In terms of smart resource sharing, best practices concern the sharing of IT storage capacity between universities, the free provision of educational resources, and the exchange of information. The concept of smart campus shall be used for higher education through IT. A smart campus shall be expressed in four areas: learning, sharing, buildings and transport, where all these themes may be both material and immaterial. In addition, CNR's digitalisation shall also be achieved through the operationalisation of a single interactive digital platform for the design, development, integration, acquisition and management of databases at national level. These databases shall comprise: Educational and research resources of Romanian universities, students, graduates, institutional agreements of Romanian universities with universities abroad, collaborations of Romanian universities in alliances/networks of universities, contributions of Romanian universities to European innovation capacity, collaborations with the socio-economic environment at regional, national and international level, interconnected systems allowing access, storage, sharing, re-use and integration with European systems (e.g. European Open Science Cloud — EOSC).
- ii. Award of grants to 60 universities for several types of investments:
 - operationalisation of University Digital Centres
 - digital competence training programmes
 - development of students' entrepreneurial skills for the digital sector
 - career guidance programmes for students with a view to choosing emerging ICT occupations
 - training programmes for new teaching/assessment skills in a hybrid system
 - advanced digital skills development for 1 000 undergraduate and master's students
 - training for developing professional and digital skills of bachelor, master and doctoral students through participation in training programmes, linked to the European Digital Competence Framework; developing the digital skills of teaching and research staff through participation in research and practice projects, linked to the European Framework for Teachers' Digital Competence; developing advanced digital skills of specialists in the IT area for emerging technologies — Quantum Computing, Artificial Intelligence, Blockchain, Internet of Things; conducting upskilling training programmes via Digital Innovation Hubs.

The implementation of the investment shall be completed by 31 December 2025.

ix. Infrastructure:

Investment 17. Ensuring university infrastructure (homes, canteens, recreation facilities)

The objective of this investment is the construction/upgrading of 3 types of infrastructures in university campuses, in line with safety and quality standards, to ensure the social/inclusive dimension of higher education.

The investment shall cover:

- The construction of 5 020 and extension/modernisation of 14 500 recreation and reading places in university campuses, to be finalised by 31 March 2024;
- The construction of 3 500 and extension/modernisation of 3 125 canteens in university campuses, to be finalised by 30 June 2024;
- Construction of 4 600 and extension/modernisation of 14 530 accommodation buildings in university campuses, for students from disadvantaged socio-economic backgrounds, with disabilities, some ethnic minorities or single-parent families, etc. who shall be given priority in obtaining a place on newly built university campuses. The works shall be finalised by 30 September 2024.

A final target indicates that at least 40% of the new and modernised facilities shall be directed at students from disadvantaged backgrounds, by 30 September 2025.

Newly constructed buildings shall comply with the objective of achieving a primary energy demand (PED) at least 20% lower than the NZEB requirement according to national guidelines, which shall be ensured through energy performance certificates.

When it comes to renovations, the contracts shall include a minimum requirement of reducing energy consumption for heating by at least 50% compared to the annual energy consumption for heating prior to the renovation of the building, which shall deliver an increase of 30% primary energy savings compared to the pre-renovation state. In this context, at least 90% of the costs shall pertain to energy efficiency improvements.

The implementation of the investment shall be completed by 30 September 2025.

x. School governance:

Investment 18. Training and coaching programme for school managers and inspectors

The objective of this investment is to develop an updated training and coaching programme for managers and inspectors to professionalise educational management. The training programme shall be designed based on recommendations made by experts who shall carry out a functional analysis of the governance of the education system and of European best practices.

Training for school managers (6 176 directors and 2 924 deputy directors) and school inspectors (900), for a period of one and a half years, with the aim to promote institutional, financial and human resource leadership and management, administration and legislation to help develop the capacity of their educational institution to increase students' performance. The training and coaching programme, with mentoring and control functions, shall specifically aim at creating the skills needed to manage the education system in a decentralised environment through accredited training providers with experts in Human Resources.

The implementation of the investment shall be completed by 31 March 2026.

O.4. Milestones, targets, indicators, and timetable for monitoring and implementation for the loan

Sequential number	Related Measure (Reform or Investment)	Milestone/ Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
					Unit of measure	Base line	Goal	Quarter	Year	
496	Investment 13. Equipping of IT laboratories in vocational education and training (VET) schools	Target	VET educational schools equipped with computer laboratories		Number	0	909	Q3	2023	909 VET schools shall be equipped with digital infrastructures and tools for teaching. The investment includes the purchase of classroom equipment (such as projectors, video-recording systems, sound systems, cameras and audio equipment to record lessons, software equipment to archive teaching digital resources) and covers underlying infrastructure equipment (such as electro-installations, LAN and wi-fi networks) necessary to use the digital teaching equipment.
497	Investment 14. Equipping of practice workshops in VET schools	Target	VET educational units equipped with functional practice laboratories		Number	0	909	Q3	2023	909 VET educational units equipped with functional practice laboratories. Local authorities shall launch support schemes to equip school workshops within VET education units, including dual training units and excluding those with an agricultural profile, through county councils and mayors. Through the funding scheme, each VET school

										programme shall be designed on the basis of the recommendations made by experts who shall carry out the functional analysis of the governance of the education system and of European best practices.

1.2. **Estimated total cost of Recovery and resilience plan**

The estimated total cost of the recovery and resilience plan of Romania is EUR 29 181 842 750.

2. **SECTION 2: FINANCIAL SUPPORT**

2.1. **Financial contribution**

The instalments referred to in Article 2(2) shall be organised in the following manner:

2.1.1. *First Instalment (non-repayable support):*

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
146	C7.R2 Transition to the EU-2025 connectivity targets and stimulation of the private investment for the deployment of very high-capacity networks	M	Entry into force of the 5G network security law
69	C4.R1 Sustainable transport, decarbonisation and road safety / Railway infrastructure development and rail traffic management	M	Adoption of the strategy for the development of railway infrastructure 2021-2025 and application of the action plan
113	C6.R1 Electricity market reform, replacement of coal in the energy mix and support for a legislative and regulatory framework for private investment in renewable electricity production	T	Decommissioning of coal-fired power-production capacity
142	C7.R1 Development of a unitary framework for defining the architecture of a government cloud system	M	Task-force to implement and monitor Digital Transformation reforms and investments established and operational
150	C7.R3 Ensuring cybersecurity of public and private entities owning critical value infrastructure	M	Adoption of the National Cybersecurity Strategy 2021-2026
211	C8.R6 Reform of the public pension system	M	Contract technical assistance provided by an entity that shall be selected according to the national public procurement legislation
212	C8.R6 Reform of the public pension system	M	Entry into force of a minister's order setting up a monitoring committee in charge of reviewing, with the support of the technical assistance

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
			provider the pension system and the policy interventions in the pension system
220	C8.I2 Improving tax and tax administration processes, including through the implementation of integrated risk management	T	Number of cash registers connected to the National Agency for Fiscal Administration IT system
366	C12.I1 Development of pre-hospital medical infrastructure	M	Adoption of criteria for prioritising investments in integrated community centres
426	C14.R6 Stepping up the fight against corruption	M	Entry into force of the legislative act approving new National Anti-Corruption Strategy
450	C14.I5 Monitoring and implementation of the plan	M	Audit and Controls: information for monitoring implementation of recovery and resilience plan
451	C14.I5 Monitoring and implementation of the plan	M	Entry into force of a Government Ordinance enacting the legal mandate of the Ministry of Investments and European Project (MIPE), Ministry of Finance (MoF) and the Audit Authority (AA)
462	C15.R3 Reform of the compulsory education system to prevent and reduce early school leaving	M	Entry into force of the Government Decision establishing the implementation of the National Programme to reduce early school leaving
464	C15.I4 Supporting educational establishments with high risk of drop-outs	M	Open call for projects for the support of students for the transition from lower to upper secondary education, on the basis of 5 indicators defined in the Early Warning Mechanism in Education
		Instalment Amount	EUR 2 037 146 414

2.1.2. *Second Instalment (non-repayable support):*

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
124	C6.I1 New capacities for electricity generation from renewable sources	M	Opening a call for tender for projects for the production of energy from renewable sources (wind and solar)
143	C7.R1 Development of a unitary framework for defining the architecture of a government cloud system	M	Completed analysis for the options for the government cloud architecture
191	C8.R1 Reform of the National Agency for Fiscal Administration (ANAF) through digitalisation	M	Entry into force of the legal framework for the compulsory enrolment of legal persons taxpayers in SPV (Virtual Private Space)
195	C8.R1 Reform of the National Agency for Fiscal Administration (ANAF) through digitalisation	M	Operationalization/approval of the Joint Action Plan between the National Agency for Fiscal Administration and Labour Inspection to prevent and limit the phenomenon of grey/black work evasion
213	C8.R6 Reform of the public pension system	M	Entry into force of the amendments to the regulatory framework to ensure the sustainability of Pillar 2 pensions
387	C13.R4 Introduction of work cards and formalisation of work in domestic workers	M	Entry into force of legislation, and its implementing rules, for the domestic workers voucher system
401	C14.R1 Enhancing the predictability and efficiency of decision-making processes by strengthening the capacity for policy coordination and impact analysis at the level of the government and coordinating ministries, as well as by strengthening the tools to increase the quality of public consultations at all levels of the administration	M	Entry into force of the methodologies and procedures to improve public policy rationale and planning and administrative simplification
404	C14.R1 Enhancing the predictability and efficiency of decision-making processes by strengthening the	M	Entry into force of a legislative act operationalising a structure to ensure the implementation of an effective regulatory quality control

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
	capacity for policy coordination and impact analysis at the level of the government and coordinating ministries, as well as by strengthening the tools to increase the quality of public consultations at all levels of the administration		mechanism
421	C14.R5 Ensuring the independence of the judiciary, enhancing its quality and efficiency	M	Entry into force of the law approving the strategy for the development of the judiciary 2022-2025
430	C14.R6 Stepping up the fight against corruption	M	Entry into force of the law transposing the directive on whistle-blowers' protection
433	C14.R8 Reforming the national procurement system	M	Entry into force of the amendment of national legislation on remedies (Law No. 101/2016)
465	C15.I4 Supporting educational establishments with high risk of drop-outs	T	Educational establishments awarded with the grant scheme (Lot 1)
477	C15.R5 Adoption of the legislative framework for the digitalisation of education	M	Entry into force of the Ministerial Order (MO) to ensure standards for equipping schools with technological equipment and resources for educational purposes online and to ensure a sustainable impact of the proposed investments
494	C15.R7 Reform of the governance of the pre-university education system and professionalisation of management	M	Signature of the technical assistance contract for the development of the Governance Reform Action Plan, including the training and coaching programme for managers and inspectors
65	C4.R1 Sustainable transport, decarbonisation and road safety / Road safety	M	Adoption of the National Road Safety Strategy
114	C6.R1 Electricity market reform, replacement of coal in the energy mix and support for a legislative and regulatory framework for private investment in renewable electricity production	M	Entry into force of the Decarbonisation law adopting the coal/lignite phase-out calendar
144	C7.R1	M	Entry into force of the law for the

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
	Development of a unitary framework for defining the architecture of a government cloud system		governance of cloud services for the government area
145	C7.R1 Development of a unitary framework for defining the architecture of a government cloud system	M	Entry into force of the interoperability law
153	C7.I1 Deployment of the Government Cloud Infrastructure	M	Signature of the contract to implement the investment based on the call for tenders procedure to implement the investment
147	C7.R2 Transition to EU 2025 connectivity targets and stimulate private investment for the deployment of very high capacity networks	M	Publication of the call for tender for the authorisation of telecommunications operators to grant 5G licences
200	C8.R3 Improving the budgetary programming mechanism	M	Entry into force of the government decision for the approval of the methodology for drawing up, monitoring and reporting of the budgetary programmes
355	C12.R2 Increased capacity to undertake investments in health infrastructure	M	Entry into force of the legislative framework establishing the National Agency for Infrastructure Development in Health (ANDIS)
356	C12.R3 Increased capacity for health management and human resources in health	M	Entry into force of the legislative framework for the Increased capacity for health management and human resources in health
357	C12.R3 Increased capacity for health management and human resources in health	M	Entry into force of legislation for the strategic framework for the development of human resources in health
413	C14.R2 Strengthening coordination at the centre of government through an integrated and coherent approach to climate change and sustainable development initiatives	M	Operationalisation of an Inter-Institutional Climate Committee
422	C14.R5 Ensuring the independence of the judiciary, enhancing its quality and efficiency	M	Entry into force of the law amending the powers of the National Agency for the Management of Seized Assets

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
456	C15-I1 Construction, equipping and operationalisation of 110 crèches	M	Signature of contracts with public operators (municipalities) for the construction, equipment and operationalisation of 110 crèches
478	C15.R5 Adoption of the legislative framework for the digitalisation of education	M	Entry into force of the law setting out the profile of the future teacher on digital competence and how to assess digital competence in school examinations
485	C15.R6 Updated regulatory framework to ensure environmentally friendly design, construction and endowment standards in the pre-university education system	M	Entry into force of amendments to the legislative framework to increase the quality of learning environments
		Instalment Amount	EUR 2 147 491 242

2.1.3. Third Instalment (non-repayable support):

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
22	C2.R1 Reform of forest management and governance systems through the development of a new National Forest Strategy and subsequent legislation	M	Adoption of the National Forest Strategy 2020-2030
23	C2.R1 Reform of forest management and governance systems through the development of a new National Forest Strategy and subsequent legislation	M	Entry into force of amended Ministerial Ordinances laying down binding rules for afforestation and reforestation foreseen in the National Forest Strategy 2020-2030
148	C7.R2 Transition to the EU-2025 connectivity targets and stimulation of the private investment for the deployment of very high-capacity networks	M	Recommendations from the EU connectivity toolbox are implemented
149	C7.R2 Transition to the EU 2025	M	Assignment of the rights of use of radio spectrum

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
	connectivity targets and stimulation of the private investment for the deployment of very high capacity networks		
152	C7.R4 Increasing digital competence for public service and digital education throughout life for citizens	M	Entry into force of the ministerial order of the Minister of Labour and the National Institute of Statistics President for the definition of new digital occupations in the Classification of Occupations (COR)
384	C13.R3 Implementation of the Minimum Inclusion Income (VMI)	M	Entry into force of the law approving the implementing rules for the application of VMI
410	C14.R1 Enhancing the predictability and efficiency of decision-making processes by strengthening the capacity for policy coordination and impact analysis at the level of the government and coordinating ministries, as well as by strengthening the tools to increase the quality of public consultations at all levels of the administration	M	Entry into force of guidelines for appropriate use and enforcement of the Single Register of Interest Transparency (RUTI)
411	C14.R1 Enhancing the predictability and efficiency of decision-making processes by strengthening the capacity for policy coordination and impact analysis at the level of the government and coordinating ministries, as well as by strengthening the tools to increase the quality of public consultations at all levels of the administration	M	Entry into force of the Methodology for the use of Emergency Ordinances
412	C14.R1 Enhancing the predictability and efficiency of decision-making processes by strengthening the capacity for policy coordination and impact analysis at the level of the government and coordinating ministries, as well as by	M	Entry into force of the legislative amendments to ensure publication of the full text of the laws after amendments

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
	strengthening the tools to increase the quality of public consultations at all levels of the administration		
470	C15.R4 Creation of a full professional route for higher technical education	M	Entry into force of the Government Decision approving the Methodology for organizing the complete dual route and the new qualifications resulting from the complete dual route
489	C15.I11 Provision of facilities for pre-university classrooms and school laboratories/workshops	M	Opening a call for tender for fitting classrooms with furniture
490	C15.I11 Provision of facilities for pre-university classrooms and school laboratories/workshops	M	Opening a call for tender for equipping science laboratories/cabinets
66	C4.R1. Sustainable transport, decarbonisation and road safety / Road safety	M	Entry into force of the road safety law - legislation on monitoring, enforcement and sanctions on road safety offences
72	C4.I1. Modernisation and renewal of railways infrastructure	M	Signature of contracts for 50% of the works related to modernisation, upgrade and renewal of railways infrastructure
115	C6.R1 Electricity market reform, replacement of coal in the energy mix and support for a legislative and regulatory framework for private investment in renewable electricity production	T	Decommissioning of lignite-fired power-production capacity
121	C6.R3 Improving corporate governance of state-owned enterprises in the sector	M	Improving corporate governance of State-owned companies in the energy sector
151	C7.R3 Ensuring cybersecurity of public and private entities owning critical value infrastructure	M	Entry into force of the law on Defence and Cyber Security of Romania
192	C8.R1 Reform of the National Agency for Fiscal Administration (ANAF) through digitalisation	T	Additional legal persons taxpayers enrolled in SPV
193	C8.R1	M	Entry into force of the applicable

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
	Reform of the National Agency for Fiscal Administration (ANAF) through digitalisation		legal framework defining the risk criteria for the classification of taxpayers. The legal framework shall be approved through an Order of the ANAF President
194	C8.R1 Reform of the National Agency for Fiscal Administration (ANAF) through digitalisation	M	Entry into force of the amended legal framework in the field of activity of tax inspection bodies
199	C8.R3 Improving the budgetary programming mechanism	M	Entry into force of the amended regulatory framework to ensure multi-annual budgetary planning for the significant public investment projects and have an ex-post evaluation of expenditure reviews made by the Fiscal Council
205	C8.R4 Review of the tax framework	M	Analysis of Romania's tax system with the objective to produce recommendations to ensure that the tax system contributes to promote and preserve sustainable economic growth
206	C8.R4 Review of the tax framework	M	Entry into force of amendments to the Fiscal Code gradually reducing the scope of the special tax regime for micro-enterprises
215	C8.R6 Reform of the public pension system	M	Entry into force of the legislative framework for reducing expenditure on special pensions
221	C8.I2 Improving tax and tax administration processes, including through the implementation of integrated risk management	T	Number of cash registers connected to the National Agency for Fiscal Administration IT system
222	C8.I2 Improving tax and tax administration processes, including through the implementation of integrated risk management	T	Share of the number of desk audits reported on the total audits carried out by the tax administration — 30%
230	C8.I4 Implementation of electronic customs	T	Upgraded hardware and software infrastructure
288	C10.R1 Creating the framework for	M	Entry into force of legislation in the field of sustainable urban mobility

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
	sustainable urban mobility		
289	C10.R1 Creating the framework for sustainable urban mobility	M	Entry into force of the ministerial order establishing a structure for the provision of technical assistance for the development of Sustainable Urban Mobility Plans (SUMP) established and operational
294	C10.I1 Sustainable urban mobility	M	Signature of contracts for the renewal of public transport fleets (procurement of clean vehicles)
298	C10.I1 Sustainable urban mobility	M	Signature of contracts for the provision of ITS/other ICT infrastructure
301	C10.I1 Sustainable urban mobility	M	Signature of contracts for building electric vehicle recharging points
304	C10.I1 Sustainable urban mobility	M	Signature of contracts for investments in cycling infrastructure at local/metropolitan level
351	C12.R1 Increased capacity for the management of public health funds	M	Entry into force of the ministerial order for the performance and quality indicators to be used for the selection of the medical units benefiting from the Health Quality Fund
358	C12.R3 Increased capacity for health management and human resources in health	M	Development of human resources in health
378	C13. R1 Creating a new legal framework to prevent the separation of children from their families	M	Entry into force of a legislative act necessary to prevent the separation of children from the family and support for vulnerable families
380	C13. R2 Reform of the protection system for adults with disabilities	M	Entry into force of the legislative act for the implementation and operationalisation of the Guide to Accelerating the De-institutionalisation Process
381	C13. R2 Reform of the protection system for adults with disabilities	M	Entry into force of legislation to support the implementation of the adopted national strategy for the prevention of institutionalisation
424	C14.R5 Ensuring the independence of the	M	Amendment of the Criminal Code and Criminal Procedure Code

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
	judiciary, enhancing its quality and efficiency		
439	C14.R9 Improve the procedural framework for the implementation of corporate governance principles in state-owned enterprises	M	Entry into force of updated legislation for state-owned companies
440	C14.R9 Improve the procedural framework for the implementation of corporate governance principles in state-owned enterprises	M	Operationalisation of the task force at the Centre of the Government for Corporate Governance Policy Coordination and Monitoring
449	C14.I4 Increasing the capacity of civil society organisations to foster active citizenship, to engage professionally in the planning and implementation of public policies on social rights addressed by the national recovery and resilience plan and to monitor related reforms	M	Entry into force of social dialogue legislation, providing for meaningful and timely social dialogue and collective bargaining, in line with the ILO Recommendations
453	C15.R2 Unitary, inclusive and quality early-childhood education system	M	- Entry into force of the Ministerial Order (MO) adopting the Cross-sectoral Framework Programme - Entry into force of the MO regulating the establishment, organisation and operation of complementary early-childhood education services
463	C15.R3 Reform of the compulsory education system to prevent and reduce early school leaving	M	Entry into force of the Ministerial Order (MO) for the use of MATE tool at national level
		Instalment Amount	EUR 2 047 491 242

2.1.4. *Fourth Instalment (non-repayable support):*

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
207	C8.R4 Review of the tax framework	M	Entry into force of - Amendments to the Fiscal Code (Law nr.227/2015), to reduce and/or eliminate other tax incentives with the objective to simplify the tax system, make it more effective, transparent and fair by 2024 - Legislation to expand the green taxation
214	C8.R6 Reform of the public pension system	M	Entry into force of the new law on the pension system, replacing the provisions of Law No 127/2019
458	C15.I2 Setting up, equipping and operationalising 412 complementary services for disadvantaged groups	M	Signature of contracts for setting up, equipping and operationalising complementary services for disadvantaged groups
469	C15.I5 Trainings for users of the Romanian Integrated Education Information System (SIIR) and the Early Warning Mechanism (MATE) IT tool <u>and systemic interventions to reduce early school leaving</u>	T	Users of the Romanian Integrated Education Information System (SIIR) and the MATE IT tool trained
495	C15.R7 Reform of the governance of the pre-university education system and professionalisation of management	M	Publication and implementation of a Governance Reform Action Plan, including the training and coaching programme for managers and inspectors
24	C2.R1 Reform of forest management and governance systems through the development of a new National Forest Strategy and subsequent legislation	M	Entry into force of the legislative acts amending and supplementing the existing legislation on forests
122	C6.R2 Improving corporate governance of state-owned enterprises in the energy sector	M	Listing of at least 15% shares of Hidroelectrica completed
59	C4.R1 Sustainable transport, decarbonisation and road safety / Road decarbonisation in line with “polluter pays” principle	M	Entry into force of the law for the implementation of a new distance-based charging system for heavy duty vehicles (trucks), and higher ownership taxes for most polluting passengers vehicles

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
			(cars/buses/coaches) based on the 'polluter pays' principle and green taxation principle
71	C4.R1 Sustainable transport, decarbonisation and road safety / Shipping strategy	M	Adoption of the Shipping strategy
76	C4.I2 Railways rolling stock	M	Signature of contracts following open and competitive tenders
116	C6.R1 Electricity market reform, replacement of coal in the energy mix and support for a legislative and regulatory framework for private investment in renewable electricity production	M	Entry into force of the New Energy Law
158	C7.I3 Development of eHealth and telemedicine system	T	Public health institutions digitalised
163	C7.I4 Digitalisation of the judiciary	M	Virtualization and centralization of business applications operationalised
172	C7. I7 Implementation of the eForms electronic forms in public procurement	M	Implementation of electronic national forms in public procurement procedures in line with EU legislation
201	C8.R3 Improving the budgetary programming mechanism	M	Completion of the spending review in health and education sectors
202	C8.R3 Improving the budgetary programming mechanism	M	Adoption of a multi-annual strategy and calendar for a systematic expenditure review across all sectors
219	C8.I2 Improving tax and tax administration processes, including through the implementation of integrated risk management	T	Staff training on the risk management system
227	C8.I3 Ensuring the capacity to respond to current and future information challenges, including in the context of the pandemic, through the digital transformation of Ministry of	M	Modernisation of hardware and software infrastructure and of the support infrastructure for the provision of electronic services to taxpayers

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
	Finance/National Agency for Fiscal Administration		
228	C8.I3 Ensuring the capacity to respond to current and future information challenges, including in the context of the pandemic, through the digital transformation of Ministry of Finance/National Agency for Fiscal Administration	M	Increased Cyber security of the Ministry of Finance's and ANAF computer system
229	C8.I3 Ensuring the capacity to respond to current and future information challenges, including in the context of the pandemic, through the digital transformation of Ministry of Finance/National Agency for Fiscal Administration	T	80% of IT hardware and software infrastructure is not more than 4 years old
352	C12.R1 Increased capacity for the management of public health funds	M	Entry into force of the Government Decision for a new model framework contract governing the conditions for granting medical assistance, medicines and medical devices, assistive devices and technologies within the framework of the health insurance system
367	C12.I1 Development of pre-hospital medical infrastructure	T	Practices of family doctors or associations of primary care practices equipped or renovated, prioritising practices located in marginalised regions and municipalities
368	C12.I1 Development of pre-hospital medical infrastructure	T	Mobile medical units equipped for breast and cervical cancer screening
393	C13. I1 Creation of a network of day centres for children at risk of separation	M	Delivery of a mapping of needs, available services and infrastructure facilities for children at risk of separation from families, in particular in vulnerable communities
402	C14.R1 Enhancing the predictability and efficiency of decision-making processes by strengthening the	M	A new strategic management and strategic planning system is operational in all ministries

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
	capacity for policy coordination and impact analysis at the level of the government and coordinating ministries, as well as by strengthening the tools to increase the quality of public consultations at all levels of the administration		
416	C14.R3 Developing performance human resources management in the public sector	M	Ex-post analysis of the (pilot) national competition for the selection of two civil service categories in the central administration
420	C14.R4 Developing of a fair unitary pay system in the public sector	M	Entry into force of the new legal framework on remuneration of civil servants (Law on Unitarian Pay)
423	C14.R5 Ensuring the independence of the judiciary, enhancing its quality and efficiency	M	Entry into force of the “Justice laws” (laws on the status of magistrates, judicial organisation, Superior Council of Magistracy)
429	C14.R6 Stepping up the fight against corruption	T	Occupation rate of 85% of National Anti-Corruption Directorate prosecutor positions attained
434	C14.R8 Reforming the national procurement system	M	Entry into force of the Public Procurement Strategy including horizontal measures to support the implementation of the national recovery and resilience plan
441	C14.R9 Improve the procedural framework for the implementation of corporate governance principles in state-owned enterprises	M	Publication of the Monitoring Dashboard with financial and non-financial targets and performance indicators for all categories of public companies (including key sectors such as transport, energy, public utilities)
466	C15.I4 Supporting educational establishments with high risk of drop-outs	T	Educational establishments awarded with the grant scheme (Lot 2)
486	C15.I10 Green-schools network development and purchase of green minibuses	T	Electric minibuses purchased and in use
		Instalment Amount	EUR 1 833 123 426

2.1.5. *Fifth Instalment (non-repayable support):*

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
123	C6.R3 Green budgeting	M	Finalising and applying a green budgetary planning methodology
452	C15.R1 Elaboration and adoption of the legislative package for the implementation of the Project "Educated Romania	M	Entry into force of the legislative package for the implementation of the 'Educated Romania' project
25	C2.I1 Afforestation and reforestation national campaign, including urban forests	T	New areas of afforested or reforested land
27	C2.I1 Afforestation and reforestation national campaign, including urban forests	T	New areas of urban forests created
73	C4.I1 Modernisation and renewal of railways infrastructure	M	Signature of contracts for 100% of the works related to modernisation, upgrade and renewal of railways infrastructure
117	C6.R1 Electricity market reform, replacement of coal in the energy mix and support for a legislative and regulatory framework for private investment in renewable electricity production	M	Signature of contracts for Difference for renewable sources
203	C8.R3 Improving the budgetary programming mechanism	M	The draft budget includes the results of spending analyses in the areas of health and education
216	C8.I1 Facilitating taxpayers' compliance through the development of digital services	M	Digital services and critical electronic systems are operational
231	C8.I4 Implementation of electronic customs	M	Award of contract for new IT systems for customs
234	C8.I5 Improving the budgetary programming mechanism	M	Update of the IT application BUGET_NG.
235	C8.I6 Economic modelling instrument (Pension Reform Options Simulation Toolkit) to improve institutional	M	Economic modelling tool (Pension Reform Options Simulation Toolkit model) operational

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
	capacity to forecast pension expenditures		
236	C8.I6 Economic modelling instrument (Pension Reform Options Simulation Toolkit) to improve institutional capacity to forecast pension expenditures	T	Extending the team from 1 to 8 experts and improving the capacity of medium and long term structural pension reform by providing 8 people with a training to use the Pension Reform Options Simulations toolkit model
239	C8.I9 Supporting the process of assessing pension files	M	All pension files recalculated
359	C12.R3 Increased capacity for health management and human resources in health	M	Entry into force of an order of the Minister of Health setting up a framework of differentiated recognition of professional merits and reward of health professionals
364	C12.R3 Increased capacity for health management and human resources in health	M	Entry into force of the joint order of the Ministry of Health and the National Health Insurance House (CNAS) for a mechanism to prioritise budget allocations made by the Ministry of Health and the National Health Insurance House (CNAS)
397	C13.I3 Operationalisation of the introduction of work cards for domestic workers	M	Entry into operation of a functional digital platform for the use of vouchers for domestic workers
417	C14.R3 Developing performance human resources management in the public sector	M	Completion of at least two national civil servant recruitment competition annually for a minimum of 3 civil service categories/grades
436	C14.R8 Reforming the national procurement system	T	Specialised training in the field of public procurement provided
437	C14.R8 Reforming the national procurement system	M	The Public Procurement Electronic System (SEAP) system is interconnected and interoperable with other databases
442	C14.R9 Improve the procedural framework for the implementation of corporate governance principles in state-owned	T	Reduction of interim/temporary management board appointments by 50% for state-owned companies at central level

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
	enterprises		
444	C14.R9 Improve the procedural framework for the implementation of corporate governance principles in state-owned enterprises	T	Reduction of interim/temporary management board appointments by 10% for state-owned companies at local level
467	C15.I4 Supporting educational establishments with high risk of drop-outs	T	Education establishments included in the drop-out programme with digitalised classrooms
		Instalment Amount	EUR 1 797 491 242

2.1.6. *ixth Instalment (non-repayable support):*

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
353	C12.R1 Increased capacity for the management of public health funds	Milestone	Entry into force of the legislative amendment required to include budget spending review outcomes in the budgetary process
459	C15.I2 Setting up, equipping and operationalising 412 complementary services for disadvantaged groups	T	Complementary services set up, equipped and operational
60	C4.R1 Sustainable transport, decarbonisation and road safety / Road decarbonisation in line with “polluter pays” principle	M	Entry into force of the law to boost the use of clean vehicles and fleet renewal programmes by domestic users, private companies and public institutions
392	C13.R5 Ensure minimum wage setting	M	Entry into force of the regulation governing the new system for minimum wage setting
360	C12.R3 Increased capacity for health management and human resources in health	T	Building and fully equipping 2 new skill development centres for public healthcare staff
385	C13.R3 Implementation of the Minimum Inclusion Income (VMI)	T	Number of additional eligible family recipients of the improved scheme
374	C12.I1 Development of pre-hospital medical infrastructure	T	Increase in preventive consultations

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
375	C12.I2 Development of public hospital infrastructure	T	Public hospitals benefiting from equipment and materials to reduce the risk of infections
125	C6.I1 New capacities for electricity generation from renewable sources	T	Additional capacity installed from renewable sources (wind and solar)
460	C15.I3 Development of framework programme for the continuous training of professionals in early-childhood education services	T	Trainers in the curricular and monitoring fields trained
479	C15.R5 Adoption of the legislative framework for the digitalisation of education	M	Entry into force of the law setting out the National Digital Skills Reference Framework for pre-university education
491	C15.I11 Provision of facilities for pre-university classrooms and school laboratories/workshops	T	Pre-university classrooms fitted with furniture
492	C15.I11 Provision of facilities for pre-university classrooms and school laboratories/workshops	T	Laboratories/ cabinets equipped
204	C8.R3 Improving the budgetary programming mechanism	M	Entry into force of the law for tasking the Fiscal Council with a regular impact assessment of spending reviews and the preparation of an implementation report
218	C8.I1 Facilitating taxpayers' compliance through the development of digital services	M	Online platform for auction of real estate and mobile property with significant value (according to the asset type) operationalised
		Instalment Amount	EUR 1 114 735 960

2.1.7. *Seventh Instalment (non-repayable support):*

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
29	C2.I2 Development of modern production capacities of forest reproduction material	T	New and renovated tree nurseries operational (established or rehabilitated)
482	C15.I9 Ensuring digital technology equipment and resources for schools	T	Schools with new technological resources to equip IT laboratories
67	C4.R1 Sustainable transport, decarbonisation and road safety / Road safety	T	Installed and functional equipment to increase speed enforcement and compliance with road safety rules
74	C4.I1 Modernisation and renewal of railways infrastructure	T	Completion of the works for at least 50% of the total railways infrastructure investments
154	C7.I1 Deployment of the Government Cloud Infrastructure	T	Public institutions connected through the government cloud
159	C7.I3 Development of eHealth and telemedicine system	M	Telemedicine system deployed
167	C7.I5 Digitalisation in the field of the environment	M	Increased capacity to supervise, control and monitor forests through an integrated IT system
169	C7.I6 Digitalisation in employment and social protection	M	Entry into operation of REGES online system
173	C7.I8 Qualified electronic identity card and digital signature	T	Citizens for whom an e-ID card is issued
175	C7.I9 Digitisation of the non-governmental organisations sector	T	Completed projects for NGOs digitalisation
182	C7.I14 Increase of the resilience and cybersecurity of Internet Service Provider infrastructure services provided to public authorities in Romania	T	Hubs that shall allow access to Internet Service Provider (ISP) services for central and local public-interest institutions and entities
209	C8.R5 Establishment and operationalisation of the National Development Bank	M	Operationalisation of the National Development Bank
217	C8.I1 Facilitating taxpayers' compliance	T	Services to corporate tax payers available online

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
	through the development of digital services		
233	C8.I4 Implementation of electronic customs	T	Percentage of customs clearance activity, exchange of information between economic operators and customs authorities, exchange of information between customs authorities in the Member States performed electronically
238	C8.I8 Operationalisation of the National Development Bank	M	Purchase of software (licences) and hardware (laptops), IT services for staff, training for the staff of the National Development Bank and for the Ministry of Finance staff
240	C8.I10 Operational efficiency and advanced e-services through digitalisation of the pension system	M	IT system in the National Public Pensions Agency operational
295	C10.I1 Sustainable urban mobility	T	Additional zero-emission vehicles (buses, trolleybuses using a zero-emission engine or battery, trams and minibuses) (number of vehicles)
299	C10.I1 Sustainable urban mobility	T	Administrative Territorial Units with developed/ expanded systems operational— Intelligent Transport Systems and e-ticketing/ other ICT infrastructures
302	C10.I1 Sustainable urban mobility	T	Additional recharging points for electric vehicles
305	C10.I1 Sustainable urban mobility	T	Operational cycling runways (km) at local/metropolitan level
365	C12.R3 Increased capacity for health management and human resources in health	M	Operationalisation of the transparenta.ms.ro portal on the use of public resources
369	C12.I1 Development of pre-hospital medical infrastructure	T	Newly built/renovated and equipped facilities providing outpatient care
376	C12.I2 Development of public hospital infrastructure	T	New-born intensive care units equipped, including with new-born ambulances (for the regional centres)
388	C13.R4 Introduction of work cards and	T	Beneficiaries (hiring domestic workers)

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
	formalisation of work in domestic workers		
390	C13.R4 Introduction of work cards and formalisation of work in domestic workers	T	Domestic workers/providers previously recorded as unemployed or inactive provide services by means of work cards
394	C13.I1 Creation of a network of day centres for children at risk of separation	T	Day centres to prevent the separation of children from the family
395	C13.I2 Rehabilitation, renovation and development of social infrastructure for persons with disabilities	T	Modernised community services for persons with disabilities
405	C14.R1 Enhancing the predictability and efficiency of decision-making processes by strengthening the capacity for policy coordination and impact analysis at the level of the government and coordinating ministries, as well as by strengthening the tools to increase the quality of public consultations at all levels of the administration	M	Operational IT Platform to monitor the innovation in public administration
408	C14.R1 Enhancing the predictability and efficiency of decision-making processes by strengthening the capacity for policy coordination and impact analysis at the level of the government and coordinating ministries, as well as by strengthening the tools to increase the quality of public consultations at all levels of the administration	T	25% of the presentation and motivation tools satisfy the set quality criteria (i.e. are assessed at an excellent or satisfactory level) as per the Government methodology
418	C14.R3 Developing performance human resources management in the public sector	M	Entry into force of two legislative acts on the human resources management
431	C14.R7 Evaluation and update of legislation on the integrity framework	M	Entry into force of the consolidated laws on integrity
432	C14.R7 Evaluation and update of legislation on the integrity framework	M	Approved revised version of the codes of ethics and conduct for the Government, in addition to the

			existing ones for the civil service and adoption and implementation of enforcement measures
483	C15.I9 Ensuring digital technology equipment and resources for schools	T	Schools with technology infrastructure and equipment
		Instalment Amount	EUR 1 034 850 903

2.1.8. *Eighth Instalment (non-repayable support):*

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
208	C8.R4 Review of the tax framework	M	Entry into force of amendments to the Fiscal Code (Law nr.227/2015) gradually reducing tax incentives for personnel employed in the construction sector
438	C14.R8 Reforming the national procurement system	M	Operational e-procurement system
484	C15.I9 Ensuring digital technology equipment and resources for schools	T	Smart Labs purchased for secondary and high school education units
118	C6.I1 Electricity market reform, replacement of coal in the energy mix and support for a legislative and regulatory framework for private investment in renewable electricity production	M	Signature of contracts for Difference for renewable sources
156	C7.I2 Cloud development and migration	T	Governmental digital service applications migrated into Infrastructure-as-a-Service - IaaS/Platform-as-a-Service -PaaS/
160	C7.I3 Development of eHealth and telemedicine system	M	New PIA (Health insurance IT platform) is operational
161	C7.I3 Development of eHealth and telemedicine system	T	Digitalisation of 200 public health facilities
176	C7.I9 Digitisation of the non-governmental	M	Resource Centre for the Digital Transformation of the NGOs

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
	organisations sector		
361	C12.R3 Increased capacity for health management and human resources in health	T	Persons having participated in training on health service management
362	C12.R3 Increased capacity for health management and human resources in health	T	Persons having participated in trainings on human resources management in health institutions
363	C12.R3 Increased capacity for health management and human resources in health	T	Health professionals having participated in integrity training programmes
370	C12.I1 Development of pre-hospital medical infrastructure	T	Newly built/renovated and equipped integrated community centres, including appropriately staffed
371	C12.I1 Development of pre-hospital medical infrastructure	T	Underserved communities, including Roma, have access to community healthcare
373	C12.I1 Development of pre-hospital medical infrastructure	T	Increase access to primary care
386	C13.R3 Implementation of the Minimum Inclusion Income (VMI)	T	Recipient of Minimum Inclusion Income receives at least one activation measure
403	C14.R1 Enhancing the predictability and efficiency of decision-making processes by strengthening the capacity for policy coordination and impact analysis at the level of the government and coordinating ministries, as well as by strengthening the tools to increase the quality of public consultations at all levels of the administration	T	At least 3 ministries planned and implemented budgets per programme
		Instalment Amount	EUR 895 629 540

2.1.9. Ninth Instalment (non-repayable support):

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
162	C7.I3 Development of eHealth and telemedicine system	T	Healthcare providers connected to the new PIA platform
179	C7.I12 Ensuring cybersecurity protection for both public and private ITC infrastructures with critical value for national security, using smart technologies	T	Entities with secured IT&C infrastructures
415	C14.R2 Strengthening coordination at the centre of government through an integrated and coherent approach to climate change and sustainable development initiatives	T	Public officials qualified as 'sustainable development expert' in public institutions at central and local level
446	C14.I2 Developing the logistical (non-IT) infrastructure needed to fight corruption and recover the proceeds and damage from crime, including training in these areas	T	Warehouses for the storage of seized property made operational
472	C15.I6 Development of 10 regional consortia and the development and equipping of 10 vocational campuses	T	10 newly built integrated vocational campuses
475	C15.I7 Transformation of agricultural high schools into professionalisation centres	T	57 agricultural schools supported through grants
476	C15.I7 Transformation of agricultural high schools into professionalisation centres	T	Number of pupils registered in agricultural secondary schools
480	C15.I8 In-service training programme for teaching staff	T	Teachers trained for online teaching by improving specific digital pedagogy skills
481	C15.I8 In-service training programme for teaching staff	T	Teachers publishing open educational materials on the edu.cred platform for exchange of practices
61	C4.R1 Sustainable transport, decarbonisation and road safety / Road decarbonisation in line with	T	New clean vehicles procured by public entities, at least 3% above the thresholds of the Clean Vehicles Directive

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
	“polluter pays” principle		
70	C4.R1 Sustainable transport, decarbonisation and road safety / Railways infrastructure development and rail traffic management	M	Publication and implementation of the European Railway Traffic Management System (ERTMS) national action plan
119	C6.R1 Electricity market reform, replacement of coal in the energy mix and support for a legislative and regulatory framework for private investment in renewable electricity production	T	Decommissioning of lignite-fired power production capacity
155	C7.I1 Deployment of the Government Cloud Infrastructure	T	Tier III and Tier IV data centres by design, infrastructure and technologies for cloud services
164	C7.I4 Digitalisation of the judiciary	M	Operationalisation of ECRIS V (electronic case record and information system) completed
170	C7.I6 Digitalisation in employment and social protection	T	Implementation of digital services in the field of employment and social protection
177	C7.I10 Digital transformation in civil service management	M	Interactive and collaborative platforms for standardised human resources management in central public administration are established and operationalised
178	C7.I11 Implementation of a scheme to support the use of communication services through different types of instruments for beneficiaries, with a focus on white areas	T	Villages in white areas connected to very high-speed internet
180	C7.I12 Ensuring cybersecurity protection for both public and private ITC infrastructures with critical value for national security, using smart technologies	M	Cyberint national center strengthened
186	C7.I17 Funding schemes for libraries to become digital skills hubs	T	Libraries converted in digital hubs
196	C8.R1 Reform of the National Agency for Fiscal Administration (ANAF)	T	Increase the share of revenues collected by the tax administration by at least 2.5 percentage points of

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
	through digitalisation		GDP
198	C8.R2 Modernisation of the customs system and implementation of electronic customs	M	Entry into force of the amendments to the existing legal framework to improve the functioning of the Customs administration
223	C8.I2 Improving tax and tax administration processes, including through the implementation of integrated risk management	T	Share of the number of desk audits reported on the total audits carried out by the tax administration — 60%
224	C8.I2 Improving tax and tax administration processes, including through the implementation of integrated risk management	T	Increase the number of audits by 10%
225	C8.I2 Improving tax and tax administration processes, including through the implementation of integrated risk management	M	Fully operational electronic risk register
226	C8.I2 Improving tax and tax administration processes, including through the implementation of integrated risk management	M	Big Data/Analytics platform set-up and operational
232	C8.I4 Implementation of electronic customs	T	IT systems for customs operationalised
237	C8.I7 Technical support for the revision of the taxation framework	M	IT system enabling the implementation of an automatic property valuation model operational
372	C12.I1 Development of pre-hospital medical infrastructure	T	Family planning cabinets equipped or equipped and renovated
396	C13.I2 Rehabilitation, renovation and development of social infrastructure for persons with disabilities	T	New community services for persons with disabilities
406	C14.R1 Enhancing the predictability and efficiency of decision-making processes by strengthening the capacity for policy coordination and impact analysis at the level of the government and coordinating ministries, as well as by	T	800 representatives of civil society organizations trained to increase the administrative capacity and digitization of their structures

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
	strengthening the tools to increase the quality of public consultations at all levels of the administration		
419	C14.R3. Developing performance human resources management in the public sector	M	Competence frameworks in central public administration operational
425	C14.R5. Ensuring the independence of the judiciary, enhancing its quality and efficiency	T	At least 6000 civil servants in the justice sector (judges, prosecutors and court clerks) having attended the trainings to improve the quality and efficiency of justice system
427	C14.R6. Stepping up the fight against corruption	T	An increase of the value of seized assets managed by the National Agency for the Management of Seized Assets
428	C14.R6. Stepping up the fight against corruption	T	Completion of at least 70% of the measures foreseen in the new anti-corruption strategy
435	C14.R8. Reforming the national procurement system	T	Operational centralised procurement bodies (CPBs) for local authorities
454	C15.2. Unitary, inclusive and quality early-childhood education system	T	Participation rate of 0-3 year-olds in early childhood education services
455	C15.R2. Unitary, inclusive and quality early-childhood education system	T	Participation rate of 3-6 year-olds in early childhood education services
457	C15.I1. Construction, equipping and operationalisation of 110 crèches	T	Newly built, equipped and operationalised crèches
461	C15.I3. Development of framework programme for the continuous training of professionals in early childhood education services	T	Trained personnel, working in standard and complementary early-childhood education services, prioritising those in the newly established services
487	C15.I10. Green-schools network development and purchase of green minibuses	T	Pre-university school area rehabilitated to become Green Schools
488	C15.I10. Green-schools network development and purchase of green minibuses	T	New Green School area built and operational
		Instalment Amount	EUR 791 460 724

2.1.10. Tenth Instalment (non-repayable support):

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
63	C4.R1 Sustainable transport, decarbonisation and road safety / Road decarbonisation in line with “polluter pays” principle	T	Increasing the number of zero-emission vehicles
68	C4.R1 Sustainable transport, decarbonisation and road safety / Road safety	T	Reducing the number of road accident victims (seriously injured and deceased people) by 25% compared to the 2019 baseline
181	C7.I13 Development of security systems for the protection of government spectrum	T	Reception sites operationalised at national level
292	C10.R1 Creating the framework for sustainable urban mobility	T	Reduction by 25% in the number of people killed or seriously injured as a result of road accidents in urban municipalities compared to reference year 2019
391	C13.R4 Introduction of work cards and formalisation of work in domestic workers	T	Domestic workers/providers previously recorded as unemployed or inactive provide services by means of work cards
409	C14.R1 Enhancing the predictability and efficiency of decision-making processes by strengthening the capacity for policy coordination and impact analysis at the level of the government and coordinating ministries, as well as by strengthening the tools to increase the quality of public consultations at all levels of the administration	T	At least 50% of the proposed legislative initiatives, included in the Government Annual Work Plan (GAWP), approved within the set deadline
414	C14.R2 Strengthening coordination at the centre of government through an integrated and coherent approach to climate change and sustainable development initiatives	T	The achievement of 90% of the priorities set by the Inter-Institutional Climate Change Committee for 2025
447	C14.I3 Creation of local partnership structures between the local governments and the civil society	T	Partnerships between local public administration authorities (LPA) and NGOs established and operational
448	C14.I4	T	Functional collaborative non-

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
	Increasing the capacity of civil society organisations to foster active citizenship, to engage professionally in the planning and implementation of public policies on social rights addressed by the national recovery and resilience plan and to monitor related reforms		governmental sector initiatives operational
473	C15.I6 Development of 10 regional consortia and the development and equipping of 10 vocational campuses	T	Integrated, completed and operational dual education consortia linked to the requirements of economic operators in the concerned area
26	C2.I1 Afforestation and reforestation national campaign, including urban forests	T	New areas of afforested or reforested land
28	C2.I1 Afforestation and reforestation national campaign, including urban forests	T	New areas of urban forests created
62	C4.R1 Sustainable transport, decarbonisation and road safety / Road decarbonisation in line with “polluter pays” principle	T	Scrapped polluting motor vehicles (below EURO 3)
64	C4.R1 Sustainable transport, decarbonisation and road safety / Road decarbonisation in line with “polluter pays” principle	T	Electric recharging points installed at national level
75	C4.I1 Modernisation and renewal of railways infrastructure	T	Kilometres of new/upgraded operational railway infrastructure
77	C4.I2 Railways rolling stock	T	New electric rolling stock in operation
120	C6.R1 Electricity market reform, replacement of coal in the energy mix and support for a legislative and regulatory framework for private investment in renewable electricity production	T	Additional renewables capacity commissioned
157	C7.I2 Cloud development and migration	T	Governmental digital service applications migrated into

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
			Infrastructure-as-a-Service - IaaS/Platform-as-a-Service -PaaS
165	C7.I4 Digitalisation of the judiciary	M	Central public authorities in the judicial field digitalised
166	C7.I4 Digitalisation of the judiciary	M	Data centre operational
168	C7.I5 Digitalisation in the field of the environment	T	Digitalised public environmental services
171	C7.I6 Digitalisation in employment and social protection	T	Number of employees participating in trainings on digital skills
174	C7. I8 Qualified electronic identity card and digital signature	T	Citizens for whom an e-ID card is issued
183	C7.I15 Creation of new cybersecurity skills for the society and the economy	T	Trainers participating in cyber security training
184	C7.I15 Creation of new cybersecurity skills for the society and the economy	T	Entities receiving the Government toolkit and services to increase the level of cyber security maturity
185	C7.I16 Advanced digital skills training programme for civil servants	T	Digitally trained civil servants
187	C7.I17 Funding schemes for libraries to become digital skills hubs	T	Citizens who have received training for digital competences development
197	C8.R1 Reform of the National Agency for Fiscal Administration (ANAF) through digitalisation	T	Reduction of the VAT gap by 5 percentage points
210	C8.R5 Establishment and operationalisation of the National Development Bank	M	Notification to the European Commission of the completion of the National Development Bank's Pillar Assessment to implement EU funds
290	C10.R1 Creating the framework for sustainable urban mobility	M	Signature of all public transport service contracts expiring between 2021 and 2026 for 40 counties
291	C10.R1 Creating the framework for sustainable urban mobility	T	Reducing air pollutant emissions
293	C.10.R1 Creating the framework for sustainable urban mobility	T	20% increase in yearly total passenger volume using local public transport in 2026 compared

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
			to 2019
296	C10.I1 Sustainable urban mobility	T	Additional zero-emission vehicles (buses, trolleybuses using a zero-emission engine or battery, trams and minibuses) (number of vehicles)

300	C10.I1 Sustainable urban mobility	T	Administrative Territorial Units with developed/ expanded systems operational — Intelligent transport systems and e-ticketing/ other ICT infrastructures)
303	C10.I1 Sustainable urban mobility	T	Additional number of recharging points for electric vehicles
306	C10.I1 Sustainable urban mobility	T	Operational cycling runways at local/metropolitan level (km)
354	C12.R1 Increased capacity for the management of public health funds	T	Improving the accessibility of healthcare by reducing the percentage of persons reporting unmet medical needs
377	C12.I2 Development of public hospital infrastructure	T	Construction of and/or equipping new public health units/hospitals
379	C13.R1 Creating a new legal framework to provide adequate solutions to support families living in poverty with dependent children so that they can be kept in the family	T	Reducing the number of children separated from the family and falling into the social protection system
382	C13.R2 Reform of the protection system for adults with disabilities	T	Institutionalised persons with disabilities receiving personalised support to deinstitutionalise and implement their “independent living pathway”
383	C13.R2 Reform of the protection system for adults with disabilities	T	Reduction in the total number of institutionalised persons with disabilities (compared to 31.12.2020 data)

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
389	C13.R4 Introduction of work cards and formalisation of work in domestic workers	T	Beneficiaries (hiring domestic workers)
407	C14.R1 Enhancing the predictability and efficiency of decision-making processes by strengthening the capacity for policy coordination and impact analysis at the level of the government and coordinating ministries, as well as by strengthening the tools to increase the quality of public consultations at all levels of the administration	T	Process of public consultation and involvement of interested stakeholders improved through 20% increase in the number of draft legislative acts subject to public consultation and involvement of stakeholders at central level
443	C14.R9 Improve the procedural framework for the implementation of corporate governance principles in state-owned enterprises	T	Central state-owned companies listed/ leased/ restructured in the field of energy and transport
445	C14.I1 Optimising judicial infrastructure to guarantee access to justice and quality of services	T	Premises of courts built according to green standards
468	C15.I4 Supporting educational establishments with high risk of drop-outs	T	Reduction of the number of schools with high risk of drop outs
471	C15.R4 Creation of a full professional route for higher technical education	T	Share of students enrolled in the professional route, in relation to the population of students enrolled in secondary education
474	C15.I6 Development of 10 regional consortia and the development and equipping of 10 vocational campuses	T	Students enrolled in the full dual route
493	C15.I12 Support for rural school consortia	T	Completion of rural school consortia construction works and endowment
		Instalment Amount	EUR 540 269 059

2.2. Loan

The instalments referred to in Article 3(2) shall be organised in the following manner:

2.2.1. First Instalment (loan support):

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
78	C4.R2 Performance-based quality management in transport - Improving institutional capacity and corporate governance	M	Entry into force of the Law no. 50/2021 for the approval of the Emergency Ordinance no. 55/2016 on the reorganization of the National Company of Highways and National Roads in Romania - S.A. (C.N.A.I.R.) and the establishment of the National Road Investment Company - S.A. (C.N.I.R.)
1	C1.R1 Strengthening the regulatory framework for the sustainable management of the water and wastewater sector and accelerating public access to quality services under European directives	M	Entry into force of the amendments to the Law No 241/2006 on water supply and sewerage
247	C9.I2.1 Financial instruments for the private sector - Portfolio guarantee for resilience	M	Signature of the contribution agreement between the European Commission and the Romanian Government
250	C9.I2.2 Financial instruments for the private sector - Climate Action Portfolio Guarantee	M	Signature of the contribution agreement between the European Commission and the Romanian Government
253	C9.I2.3 Financial instruments for the private sector - Recovery Venture Capital Fund	M	Signature of the financing agreement between the European Investment Fund and the Romanian Government for the creation of the Recovery Risk Capital Fund ("the Fund") and adoption of the investment policy of the Fund
259	C9.I2.5 Financial instruments for the private sector - Energy efficiency investment in the residential and buildings sector	M	Signature of the contribution agreement between the European Commission and the Romanian Government
270	C9.R2 Streamline governance of research, development and innovation	M	Policy Support Facility (PSF) Reform Implementation Unit established and operational
		Instalment Amount	EUR 907 669 494

2.2.2. *Second Instalment (loan support):*

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
2	C1.R1 Strengthening the regulatory framework for sustainable management of water and waste water sector and accelerating people's access to quality services under European directives	M	Entry into force of the law approving the national programme First Connection to Water and Sanitation
95	C5.I1 Establishment of a renovation wave fund to finance works to improve the existing building stock	M	Establishing a national support scheme for energy efficiency renovation and integrated renovation (seismic consolidation and energy efficiency) of multifamily residential buildings
96	C5.I1 Establishment of a renovation wave fund to finance works to improve the existing building stock	M	Establishing a national support scheme for energy efficiency renovation and integrated renovation (seismic consolidation and energy efficiency) for public buildings)
189	C7.I19 Schemes to upskill/reskill employees in firms	M	Launch of the call for 'Grant Support for Digital Skills'
256	C9.I2.4 Financial instruments for the private sector - Fund for digitisation, climate action, and other areas of interest	M	Establishment of the financial instrument ("the Fund"), and adoption of the investment policy of the Fund
262	C9.I3.1 Private sector aid schemes - Aid scheme for the digitalisation of SMEs	M	Selection of the scheme administrator
326	C11.R1 Operationalisation of Destination Management Organisations (DMOs)	M	All the optimum destination areas for regional Destination Management Organisations (DMOs) in Romania mapped
327	C11.R1 Operationalisation of Destination Management Organisations (DMOs)	M	Action plan for the use of cultural heritage to increase the competitiveness of the Romanian tourism sector
331	C11.I1 Promotion of the 12 touristic/	T	Sites that shall be included in the cultural routes

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
	cultural routes		
338	C11.R2 Framework for the operationalisation of cycling routes at national level	M	Entry into force of the regulatory framework on cycling tourism
30	C2.R2 Reform of the management system for protected natural areas through coherent and effective implementation of the European Biodiversity Strategy	M	Entry into force of the legislative act setting up the inter-institutional committee to analyse the legal framework applicable to sectors with an impact on biodiversity
97	C5.I1 Establishment of a renovation wave fund to finance works to improve the existing building stock	M	Calls for proposals for the energy efficiency renovation and integrated renovation (seismic consolidation and energy efficiency) for residential buildings
98	C5.I1 Establishment of a renovation wave fund to finance works to improve the existing building stock	M	Call for proposals for the energy efficiency renovation and integrated renovation (seismic consolidation and energy efficiency) (public buildings)
129	C6.I2 Distribution infrastructure of renewable gases (using natural gas in combination with green hydrogen as a transitional measure), as well as green hydrogen production capacities and/or its use for electricity storage	M	Signature of contracts for the construction of at least 100 MW of new electrolyzers capacity
133	C6.I3 Development of flexible and high-efficient gas-fired combined heat and power generation (CHP) in district heating to achieve deep decarbonisation	M	Signature of contracts for high-efficient gas cogeneration and district heating projects
140	C6.I5 Ensuring energy efficiency in the industrial sector	M	Opening of a call for tender for energy efficiency investments for the industry
266	C9.I4 Cross border and multi-country projects – Low Power Processors and Semiconductor Chips	M	Entry into force of the Government Decision allocating the necessary funding of EUR 500 million to provide support to the scale-up of the national capabilities up to the first industrial development and the participation in a multi-country

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
			project
307	C10.R2 Creating the policy framework for sustainable urban transformation — Romania's Urban Policy	M	Entry into force of the Metropolitan Areas Act
312	C10.R4 Improving housing quality	M	Entry into force of legislative act for the implementation of the National Housing Strategy and Action Plan to decrease severe housing deprivation
339	C11.R2 Framework for the operationalisation of cycling routes at national level	M	National Coordination Centre Velo Routes established and operational
398	C13.R6 Improvement of the social economy legislation	M	Entry into force of the amendment of Law No 219/2015 on the social economy and the implementing rules
500	C15.I16. Digitisation of universities and preparation for the digital professions of the future	M	Signature of contracts for grants for innovative technology centres in universities
		Instalment Amount	EUR 1 080 198 230

2.2.3. Third Instalment (loan support):

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
43	C3.R1 Improving waste management governance to accelerate the transition to the circular economy	M	The adoption of the National Circular Economy Strategy
46	C3.R1 Improving waste management governance to accelerate the transition to the circular economy	M	Entry into force of the legislative acts necessary for an operationalisation of a unitary waste management in accordance with the National Waste Management Plan
127	C6.R5 Reducing the energy intensity of the	M	Entry into force of the legislative framework introducing measures to

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
	economy by developing a sustainable mechanism to boost energy efficiency in industry and increase resilience		facilitate investment in energy efficiency in the industry
135	C6.I4 Industrial chain of production and/or assembly and/or recycling of batteries, cells and photovoltaic panels (including ancillary equipment), production of raw materials used in the associated industry, and new electricity storage capacities	M	Signature of contracts for investments in the battery production chain, photovoltaic cells and panels
136	C6.I4 Industrial chain of production and/or assembly and/or recycling of batteries, cells and photovoltaic panels (including ancillary equipment), production of raw materials used in the associated industry, and new electricity storage capacities	M	Signature of contracts under the Battery Storage Support Scheme
241	C9.R1 Legislative transparency, de-bureaucratisation and procedural simplification for business	M	Entry into force of legislative amendments to streamline, simplify and fully digitise business related procedures
242	C9.R1 Legislative transparency, de-bureaucratisation and procedural simplification for business	M	Entry into force of legislative amendments to simplify and make the conduct of the SME test transparent and applicable
328	C11.R1 Operationalisation of Destination Management Organisations (DMOs)	M	Entry into force of the legislative framework by Government Decision which shall include a clear description of the financing mechanism to support the development of the network of DMOs and a clear governance model
332	C11.I1 Promotion of the 12 touristic/cultural routes	M	Signature of the contracts for the promotion of the 12 routes
340	C11.R2 Framework for the operationalisation	M	Comprehensive study on the territorial distribution of national

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
	of cycling routes at national level		cycling routes
341	C11.I3 Establishment and operationalisation of the Velo National Coordination Centre	M	Integrated National eVelo Platform and smartphone application
344	C11.R3 Reforming the funding system for the cultural sector	M	Entry into force of the law on the funding system for the cultural sector
3	C1.R1 Strengthening the regulatory framework for the sustainable management of the water and waste water sector and accelerating people's access to quality services under European directives	M	Implementation agreements signed with the local authorities participating in the First Connection to Water and Sanitation Programme
79	C4.R2 Performance-based quality management in transport - Improving institutional capacity and corporate governance	M	Selection and appointment of members of the Board of Directors of C.N.A.I.R., C.N.I.R, C.F.R., Metrorex, C.F.R. Călători.
86	C4.I4 Development of the underground transport network in the municipalities of Bucharest and Cluj-Napoca	M	Signature of contracts for 50% of the works, following open and competitive tenders and relevant permits obtained
90	C5.R1 Simplified and updated regulatory framework to support the implementation of investments in the transition to green and resilient buildings	M	Entry into force of the amendments to the existing legislative framework on the multiannual national programme for improving the energy performance of residential buildings (Government Emergency Ordinance No 18/2009)
91	C5.R1 Simplified and updated regulatory framework to support the implementation of investments in the transition to green and resilient buildings	M	The technical regulatory framework on investments for the transition to green and digital buildings is operational
93	C5.R2 Strategic, legislative and procedural framework to support seismic resilience of the buildings stock	M	Adoption and implementation of the National Seismic Risk Reduction strategy for the seismic retrofitting the existing building

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
			stock
94	C5.R2 Strategic, legislative and procedural framework to support seismic resilience of the buildings stock	M	Entry into force of the legislative framework for seismic risk reduction of buildings
99	C5.I1 Establishment of a renovation wave fund to finance works to improve the existing building stock	M	Signature of contracts for the energy efficiency renovation and integrated renovation (seismic consolidation and energy efficiency) for residential buildings
100	C5.I1 Establishment of a renovation wave fund to finance works to improve the existing building stock	M	Signature of contracts for the energy efficiency renovation and integrated renovation (seismic consolidation and energy efficiency) for public buildings
243	C9.R1 Legislative transparency, de-bureaucratisation and procedural simplification for business	M	Entry into force of the law “Single Industrial Licence”
264	C9.I3.2 Private sector aid schemes - De minimis scheme to assist Romanian firms in listing on the stock exchange	M	Selection of the scheme administrator
267	C9.I4 Cross border and multi-country projects – Low Power Processors and Semiconductor Chips	T	Entities selected for participation in the project
268	C9.I4 Cross border and multi-country projects – Low Power Processors and Semiconductor Chips	T	Entities in consortia participating to calls for projects by the Joint Undertaking of Essential Digital Technologies (KDT JU)
278	C9.R5 Support to integrate the research, development and innovation organisations in Romania in the European Research Area	M	Entry into force of a law that encourages, facilitates and regulates the voluntary and functional integration and merger of research institutions in Romania
280	C9.I5 Establishment and operationalisation of Competence Centres	M	Establishment of 5 Centres of Competence
308	C10.R2 Creating the policy framework for sustainable urban transformation	M	Entry into force of the Government Decision establishing the Romanian Urban Policy Framework
310	C10.R3	M	Entry into force of the legislative

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
	Creating the policy framework for sustainable rural transformation: establishing administrative consortia in functional rural areas		act amending the Administrative Code and establishing of administrative consortia in neighbouring rural or predominantly rural administrative territorial units, existing as functional rural areas
317	C10.I2 Construction of housing for youth and for professionals in health and education	M	Signature of all public contracts for building housing for young people coming from vulnerable communities and groups, emergency housing and for health and education professionals in urban or rural areas
320	C10.I3 Moderate rehabilitation of public buildings to improve public service delivery by administrative territorial units	M	Signature of contracts for the moderate renovation of public buildings
323	C10.I4 Development/updating in GIS format of spatial planning and urban planning documents	M	Signature of contracts for the development/updating of spatial planning, urban planning and sustainable urban mobility plans documentation
342	C11.I4 Implementation of 3 000km of cycling routes	M	Signature of the contracts for cycling routes
399	C13.R7 Reform of long-term care services for older people	M	Entry into force of a law for the adoption and implementation of the National Long-Term-Care Strategy
501	C15.I16 Digitisation of universities and preparation for the digital professions of the future	M	Signature of contracts for a grant scheme for the digitalisation of the National Council of Rectors
		Instalment Amount	EUR 1 095 638 920

2.2.4. *Fourth Instalment (loan support):*

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
41	C2.I5 Investments in integrated risk reduction systems from torrential flash floods in forest basins exposed to such phenomena	M	Adoption of project designs
108	C5.I3 Strengthening the professional capacity of professionals and workers in the renovation sector by developing trainings on energy efficiency construction	T	Establishment of certification schemes in the field of energy performance of buildings
126	C6.R4 Developing a favourable legislative and regulatory framework for future technologies, in particular hydrogen and storage solutions	M	Entry into force of the amendments to the legislative framework, implementing the National Hydrogen Strategy
334	C11.I1 Promotion of the 12 touristic/cultural routes	M	Signature of the contracts for the restoration/ renovation works for the sites included in the 12 cultural routes
336	C11.I2 Modernisation/creation of museums and memorials	M	Signature of the contracts for the building works of the museums
345	C11.R3 Reforming the funding system for the cultural sector	M	Entry into force of the law on the statute of cultural workers
346	C11.I5 Increasing access to culture in culturally deprived areas	M	Signature of the financing contracts
16	C1.I4.2 Rehabilitation of existing accumulations that require emergency interventions for safe operation	M	Adoption of project design by Government Decision/Ministerial Order, as applicable
80	C4.R2 Performance-based quality management in transport - Improving institutional capacity and corporate governance	M	Implementation of the main recommendations to increase the financial and operational performance of C.N.A.I.R., C.N.I.R., C.F.R., C.F.R. Calatori and Metrorex
248	C9.I2.1 Financial instruments for the private	T	Finance or investment operations amounting to at least 50% of the

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
	sector - Portfolio guarantee for resilience		total amount of resources allocated to the instrument approved by the InvestEU Investment Committee
251	C9.I2.2 Financial instruments for the private sector - Climate Action Portfolio Guarantee	T	Finance or investment operations amounting to at least 50% of the total amount of resources allocated to the instrument, approved by the InvestEU Investment Committee
260	C9.I2.5 Financial instruments for the private sector - Energy efficiency investment in the residential and buildings sector	T	Finance or investment operations amounting to at least 50% of the total amount of finance or investment targeted, approved by the InvestEU Investment Committee
273	C9.R2 Streamline governance of research, development and innovation	M	Entry into force of a Government Ordinance establishing a single body that encompasses the existing councils, ensures inter-ministerial coordination and reaches out to the private sector established and operational
286	C9.I10 Establishment and financial support of a national network of eight regional career guidance centres as part of the European Research Area Talent Platform	M	A network of public universities which are hosting and making operational 8 centres for research career orientation
315	C10.R5 Development of the planning system — Code of Spatial Planning, Urbanism and Construction	M	Entry into force of the Code of Spatial Planning, Urban Planning and Construction
316	C10.R5 Development of the planning system — Code of Spatial Planning, Urbanism and Construction	M	Entry into operation of the interoperable urban digital data platform (as part of the Territorial Observatory)
		Instalment Amount	EUR 1 352 726 966

2.2.5. *Fifth Instalment (loan support):*

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
18	C1.I5 Appropriate endowment of river basin administrations for flood monitoring, prevention and emergency response	T	River Basin Administrations equipped with machinery for rough access and intervention, amphibious access and transport of mobile bags/dikes in hard-to-reach areas, drones equipped with LIDAR/Flir/photogrammetry sensors, geo-electroresistive/georadar technologies of dyke bodies as well as hardware and software infrastructure
44	C3.R1 Improving waste management governance to accelerate the transition to the circular economy	M	The adoption of the Action Plan for the National Circular Economy Strategy
348	C11.I6 Development of a digital system for cultural funding processes	M	Platforms and digital systems operationalised
349	C11.I7 Accelerating the digitisation of film production and distribution	M	Signature of the financing contracts
496	C15.I13 Equipping of IT laboratories in vocational education and training (VET) schools	T	VET educational schools equipped with computer laboratories
497	C15.I14 Equipping of practice workshops in VET schools	T	VET educational units equipped with functional practice laboratories
9	C1.I2 Collection of waste water in agglomerations of less than 2 000 inhabitants that prevent the achievement of good status of water bodies and/or affect protected natural areas	T	Individual or other appropriate systems built and operational in agglomerations of less than 2 000 population equivalents
34	C2.I3.2 Identification of potential areas for strict protection in natural terrestrial and marine habitats in order to implement the EU Biodiversity Strategy for 2030	M	Entry into force of the legislative act for the designation of strictly protected areas (identified in Natura 2000 protected areas with existing management plans or including primary and old-growth

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
			forests)
82	C4.I3 Development of sustainable road infrastructure on TEN-T network, road charging, traffic management and road safety	M	Signature of contracts for 100% of the works, following open and competitive tenders and relevant permits obtained, with EIA (Environmental Impact Assessment) and Appropriate Assessment (part of the Habitats Directive) opinions issued and incorporated in the design of the investments
87	C4.I4 Development of the underground transport network in the municipalities of Bucharest and Cluj-Napoca	M	Signature of contracts for 100% of the works, following open and competitive tenders and relevant permits obtained
109	C5.I3 Strengthening the professional capacity of professionals and workers in the renovation sector by developing trainings on energy efficiency construction	T	At least 8000 specialist and workers with a certification for the completion of energy efficiency related trainings
128	C6.R6 Increasing competitiveness and decarbonisation of the heating — cooling sector	M	Entry into force of the legislative framework introducing measures to decarbonise the heating and cooling sector
130	C6.I2 Distribution infrastructure of renewable gases (using natural gas in combination with green hydrogen as a transitional measure), as well as green hydrogen production capacities and/or its use for electricity storage	M	Signature of contract for the construction of a hydrogen ready distribution network in the Oltenia region
246	C9.I1 Digital platforms on legislative transparency, de-bureaucratisation and procedural simplification for business.	M	Digital platforms set-up, connected to a single electronic point of contact and fully operational
269	C9.I4 Cross border and multi-country projects – Low Power Processors and Semiconductor Chips	T	Contracts signed by the participating companies
274	C9.R3	M	Entry into force of legislation on

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
	Reform of research career		the researcher's career and status
283	C9.I7 Strengthening excellence and supporting Romania's participation in partnerships and missions in Horizon Europe	T	Number of research financing contracts signed
284	C9.I8 Development of a programme to attract the highly specialised human resource from abroad in research, development and innovation activities	T	Projects led by international researchers financed
285	C9.I9 Support for the holders of certificates of excellence received in the Marie Skłodowska Curie Individual Fellowship Award	T	Marie Skłodowska Curie recipients of Seal of Excellence
329	C11.R1 Operationalisation of Destination Management Organisations (DMOs)	T	DMOs established
		Instalment Amount	EUR 1 404 167 655

2.2.6. *Sixth Instalment (loan support):*

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
276	C9.R4 Enhanced cooperation between business and research	M	Entry into force of legislative amendments for a favourable environment for public and private investment in research, development and innovation
333	C11.I1 Promotion of the 12 touristic/cultural routes	M	Opening of the 12 cultural routes
498	C15.I15 Online School: Assessment platform and content development	M	Online Student Assessment ePlatform is operational
503	C15.I17 Ensuring university infrastructure	T	Recreation and reading places constructed or upgraded and in use

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
	(homes, canteens, recreation facilities)		
11	C1.I2 Collection of waste water in agglomerations of less than 2 000 population equivalent which prevent the achievement of good status of water bodies and/or affect natural protected areas	T	Built and operational sewage network in agglomerations below 2 000 population equivalents
249	C9.I2.1 Financial instruments for the private sector - Portfolio guarantee for resilience	T	Finance or investment operations amounting to 100% of the resources allocated to the instrument approved by the InvestEU Investment Committee.
252	C9.I2.2 Financial instruments for the private sector - Climate Action Portfolio Guarantee	T	Finance or investment operations amounting to 100% of the total amount of resources allocated to the instrument, approved by the InvestEU Investment Committee.
261	C9.I2.5 Financial instruments for the private sector - Energy efficiency investment in the residential and buildings sector	T	Finance or investment operations amounting to 100% of the total amount of finance or investment targeted, approved by the InvestEU Investment Committee.
263	C9.I3.1 Private sector aid schemes - Aid scheme for the digitalisation of SMEs	T	Number of financing contracts signed
347	C11.I5 Increasing access to culture in culturally deprived areas	T	Small localities with increased access to culture
504	C15.I17 Ensuring university infrastructure (homes, canteens and recreation facilities)	T	Canteens constructed or upgraded and in use
		Instalment Amount	EUR 2 646 042 066

2.2.7. *Seventh Instalment (loan support):*

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
4	C1.R2 Reconfiguration of ANAR's current economic mechanism to ensure the modernisation and maintenance of the national water management system and the proper implementation of the Water Framework Directive and the Floods Directive	M	Entry into force of the law introducing amendments to Water Law No 107/1996
5	C1.I1 Expansion of water and sewerage systems in agglomerations of more than 2 000 population equivalents, prioritised by the Accelerated Plan for Compliance with European Directives	T	Built and operational water distribution networks
7	C1.I1 Expansion of water and sewerage systems in agglomerations of more than 2 000 population equivalents, prioritised by the Accelerated Plan for Compliance with European Directives	T	Sewage networks built and operational
39	C2.I4.4 Implementation of a monitoring system for wild sturgeons along the Lower Danube	M	Network for monitoring, communication and transmission of wild sturgeon data operational
48	C3.I1a Establishment of voluntary collection centres	T	Voluntary collection centres established and operational
50	C3.I1b Construction of digitised eco-islands for separate collection of waste at local level	T	Digitised eco-islands for separate collection of waste, established and operational
101	C5.I1 Establishment of a Renovation Wave fund to finance works to improve the energy efficiency of the existing building stock	T	Completed energy renovation of multi-family residential buildings
104	C5.I1 Establishment of a Renovation Wave fund to finance works to improve the	T	Completed energy renovation of public buildings

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
	energy efficiency of the existing building stock		
505	C15.I17 Ensuring university infrastructure (homes, canteens and recreation facilities)	T	Newly created or upgraded in-use accommodation places
14	C1.I4.1 Rehabilitation of existing lines of defence in accordance with the Floods Directive and the National Strategy for Floods Risk Management	T	Rehabilitated flood defence lines in line with the Floods Directive and the National Strategy for Flood Risk Management
52	C3.I1c Integrated centres for urban agglomerations concerning separate collection	T	Integrated waste collection centres established and in operation in urban agglomerations
56	C3.I3a Monitoring and Control Equipment for the National Environmental Guard	T	National Environmental Guard County Commissioners equipped with digital equipment for waste management monitoring and control activities
83	C4.I3 Development of sustainable road infrastructure on TEN-T network, road charging, traffic management and road safety	M	Construction of new roads, 50% of works completed
88	C4.I4 Development of the underground transport network in the municipalities of Bucharest and Cluj-Napoca	M	Construction of 50% of the metro lines investments in Bucharest and Cluj-Napoca
107	C5.I2 Implementation of National Building Register	M	National Digital Building Register established and operational
110	C5.I4 Circular economy and increased energy efficiency of historic buildings	M	A laboratory for testing new materials and technological solutions for historical buildings is operational
111	C5.I4 Circular economy and increased energy efficiency of historic buildings	M	A pilot centre within the National Heritage Institute for the collection and re-use of historical building materials is operational

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
254	C9.I2.3 Financial instruments for the private sector - Recovery Venture Capital Fund	M	Finance or investment operations amounting to 50% of the total amount of finance or investment targeted approved by the Investment Committee
257	C9.I2.4 Financial instruments for the private sector - Fund for digitisation, climate action, and other areas of interest	T	At least 30% of the targeted beneficiaries supported
321	C10.I3 Moderate rehabilitation of public buildings to improve public service delivery by administrative territorial units	T	Surface in square metres of public buildings refurbished
324	C10.I4 Development/updating in GIS format of spatial planning and urban planning documents	T	Spatial planning, urban planning and sustainable urban mobility plans finalised and taken over in the Territorial Observatory platform
		Instalment Amount	EUR 2 625 927 123

2.2.8. *Eight Instalment (loan support):*

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
32	C2.I3.1 Update of approved management plans	T	Nature protected areas with updated management plans entered into force
350	C11.I7 Accelerating the digitisation of film production and distribution	T	Film producers and distributors with increased digital competences
499	C15.I15 Online School: Assessment platform and content development	T	Open Educational Resources (OER) developed (teaching materials)
31	C2.R2 Reform of the management system for protected natural areas through coherent and effective implementation of the European Biodiversity Strategy	M	Entry into force of the legislative act modifying the legal framework applicable to sectors with an impact on biodiversity

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
58	C3.I3b Air quality, radioactivity and noise monitoring equipment for the National Environmental Protection Agency	T	Operationalisation of air quality, radioactivity and noise monitoring equipment
93	C5.R1 Simplified and updated regulatory framework to support the implementation of investments in the transition to green and resilient buildings	T	Reduction of timing for the issuance of building permits
265	C9.I3.2 Private sector aid schemes - De minimis scheme to assist Romanian firms in listing on the stock exchange	T	Number of signed financing contracts that shall allow listing on the Bucharest stock exchange
		Instalment Amount	EUR 1 463 482 557

2.2.9. *Ninth Instalment (loan support):*

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
506	C15.I17 Ensuring university infrastructure (homes, canteens and recreation facilities)	T	At least 40% of the new and modernised facilities directed at students from disadvantaged backgrounds
19	C1.I6 Implementation of the water cadastre	M	Water cadastre developed and operationalised
20	C1.I7 Extension of the national observation network of the National Integrated Meteorological System (SIMIN)	T	Purchased and operational meteorological stations
35	C2.I3.2 Identification of potential areas for strict protection in natural terrestrial and marine habitats in order to implement the EU Biodiversity Strategy for 2030	M	Entry into force of the legislative act for the designation of strictly protected areas (identified in Natura 2000 protected areas without existing management plans and in other areas)
57	C3.I3a Monitoring and Control Equipment	T	400 control missions using the monitoring and control equipment

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
	for the National Environmental Guard		
81	C4.R2 Performance-based quality management in transport - Improving institutional capacity and corporate governance	T	Improved railways performance in terms of trains punctuality
102	C5.I1 Establishment of a Renovation Wave fund to finance works to improve the energy efficiency of the existing building stock	T	Completed energy renovation of multi-family residential buildings
105	C5.I1 Establishment of a Renovation Wave fund to finance works to improve the energy efficiency of the existing building stock	T	Completed energy renovation of public buildings
112	C5.I4 Circular economy and increased energy efficiency of historic buildings	T	At least 200 professionals with a certification for the completion of trainings on interventions and energy efficiency on historic buildings
131	C6.I2 Distribution infrastructure of renewable gases (using natural gas in combination with green hydrogen as a transitional measure), as well as green hydrogen production capacities and/or its use for electricity storage	T	Production of green hydrogen
137	C6.I4 Industrial chain of production and/or assembly and/or recycling of batteries, cells and photovoltaic panels (including ancillary equipment), production of raw materials used in the associated industry, and new electricity storage capacities	T	Battery production and/or assembly and/or recycling plants commissioned
138	C6.I4 Industrial chain of production and/or assembly and/or recycling of batteries, cells and photovoltaic panels (including ancillary	T	Photovoltaic cells and panels capacity commissioned

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
	equipment), production of raw materials used in the associated industry, and new electricity storage capacities		
139	C6.I4 Industrial chain of production and/or assembly and/or recycling of batteries, cells and photovoltaic panels (including ancillary equipment), production of raw materials used in the associated industry, and new electricity storage capacities	T	Electricity storage capacity installed
141	C6.I5 Create an incentive scheme for energy efficiency in industry and increase resilience in industry	T	Completed energy efficiency project
188	C7.I18 Digital transformation and Robotic Process Automation in public administration	T	Robotic Process Automation (RPA) and promotion of Artificial Intelligence (AI) implemented in public administration
190	C7.I19 Schemes to upskill/reskill employees in firms	T	SMEs financed for training their staff in digital skills
244	C9.R1 Legislative transparency, de-bureaucratisation and procedural simplification for business	T	Reducing the average time needed to perform business environment related regulatory requirements
245	C9.R1 Legislative transparency, de-bureaucratisation and procedural simplification for business	T	Legislative acts/modification related to SMEs for which the test was applied
275	C9.R3 Reform of the research career	T	Institutions that adhered to the European Charter for Researchers and Code for the Recruitment of Researchers initiated the process of design, implementation and assessment of Action Plans
281	C9.I5 Establishment and operationalisation of Competence Centres	T	Budget attracted by the Centres of Competence from private sector research, development and innovation projects

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
502	C15.I16 Digitisation of universities and preparation for the digital professions of the future	T	Universities supported by new innovative technology centres to create the new skills of the future
		Instalment Amount	EUR 1 248 073 477

2.2.10. Tenth Instalment (loan support):

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
15	C1.I4.1 Rehabilitation of existing lines of defence in accordance with the Floods Directive and the National Strategy for Floods Risk Management	T	Rehabilitated flood defence lines in line with the Floods Directive and the National Strategy for Flood Risk Management
17	C1.I4.2 Rehabilitation of existing accumulations that require emergency interventions for safe operation	T	Existing dams rehabilitated
45	C3.R1 Improving waste management governance to accelerate the transition to the circular economy	M	Implementation of actions of the National Circular Economy Strategy and Action Plan assigned to the public authorities
330	C11.R1 Operationalisation of Destination Management Organisations (DMOs)	T	Increased share of foreign tourists attracted in the counties that are part of the regional DMOs
507	C15.I18 Training and coaching programme for school managers and inspectors	T	Directors, deputy directors and inspectors with completed training and coaching programme
6	C1.I1 Expansion of water and sewerage systems in agglomerations of more than 2 000 population equivalents, prioritised by the Accelerated Plan for Compliance with European Directives	T	Built and operational water distribution networks

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
8	C1.I1 Expansion of water and sewerage systems in agglomerations of more than 2 000 population equivalent, prioritised by the Accelerated Plan for Compliance with European Directives	T	Built and operational sewage networks built and operational in agglomerations prioritised by the Accelerated Plan for Compliance with the European Directives.
10	C1.I2 Collection of waste water in agglomerations of less than 2 000 population equivalent that prevent the achievement of good status of water bodies and/or affect protected natural areas	T	Individual or other appropriate systems built and operational in agglomerations of less than 2 000 population equivalent
12	C1.I2 Collection of waste water in agglomerations of less than 2 000 population equivalent that prevent the achievement of good status of water bodies and/or affect protected natural areas	T	Built and operational sewerage networks in agglomerations below 2 000 population equivalent
13	C1.I3 Supporting the connection of the low-income population to existing water and sewerage networks	T	Households connected to water and sewerage networks through the National Programme First Connection to Water and Sanitation
21	C1.I7 Extension of the national observation network of the National Integrated Meteorological System (SIMIN)	M	Operational information and communication technology system for the integration of the additional meteorological and agro-meteorological stations in the National Integrated Meteorological System (SIMIN)
33	C2.I3.1 Update of approved management plans	T	Nature protected areas with updated management plans entered into force
36	C2.I4.1 Removal of obstacles in watercourses in order to facilitate the restoration of connectivity of dependent habitats and species	T	Riparian habitats with restored connectivity
37	C2.I4.2 Reconstruction of grassland habitats in protected natural areas	T	Grassland habitats ecologically restored

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
38	C2.I4.3 Decolourisation of the Danube Delta lakes in the Danube Delta in order to reduce eutrophication and maintain biological diversity	T	Lake areas that have benefitted from the removal of aquatic plants
40	C2.I4.5 Reconfiguration of the public access and visit infrastructure for the Danube Delta in order to reduce the pressure of tourism on habitats and species	T	Visiting centres constructed to alleviate the pressure of tourism on habitats
42	C2.I5 Integrated flood risk mitigation systems in forest river basins	M	Completion of modernisation works for flood protection
47	C3.R1 Improving waste management governance to accelerate the transition to the circular economy	T	Contribution with 4,5% to the 50% national recycling and preparation for reuse target by 2025
49	C3.I1a Establishment of voluntary collection centres	T	Voluntary collection centres established and operational
51	C3.I1.b Construction of digitised eco-islands for separate collection of waste at local level	T	Digitised eco-islands for separate collection of waste, established and operational
53	C3.I1c Integrated centres for urban agglomerations concerning separate collection	T	Integrated waste collection centres established and in operation in urban agglomerations
54	C3.I1d Construction of waste recycling facilities to meet the recycling targets of the circular economy package	T	Waste recycling facilities constructed and in operation
55	C3.I2 Development of infrastructure for manure and other compostable agricultural waste management	T	Integrated systems for the collection of compostable agricultural waste, established and operational
84	C4.I3. Development of sustainable road infrastructure on TEN-T network, road charging, traffic management and road safety	T	Construction of new roads, completed (with TEN-T standards)

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
85	C4.I3 Development of sustainable road infrastructure on TEN-T network, road charging, traffic management and road safety	T	Road safety black/hot spots removed
89	C4.I4 Development of the underground transport network in the municipalities of Bucharest and Cluj-Napoca	T	Kilometers of new metro lines in Bucharest and Cluj-Napoca completed
103	C5.I1 Establishment of a Renovation Wave fund to finance works to improve the energy efficiency of the existing building stock	T	Completed energy renovation of multi-family residential buildings
106	C5.I1 Establishment of a Renovation Wave fund to finance works to improve the energy efficiency of the existing building stock	T	Completed energy renovation of public buildings
132	C6.I2 Distribution infrastructure of renewable gases (using natural gas in combination with green hydrogen as a transitional measure), as well as green hydrogen production capacities and/or its use for electricity storage	T	Hydrogen enabled distribution network, completed and in operation in the Oltenia region
134	C6.I3 Development of flexible and high-efficient gas-fired combined heat and power generation (CHP) in district heating to achieve deep decarbonisation	T	High-efficient cogeneration plants and district heating
255	C9.I2.3 Financial instruments for the private sector - Recovery Venture Capital Fund	M	Finance or investment operations amounting to 100% of the total amount of finance or investment targeted approved by the Investment Committee
258	C9.I2.4 Financial instruments for the private sector - Fund for digitisation, climate action, and other areas of interest	T	100% of the targeted beneficiaries supported

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
271	C9.R2 Streamline governance of research, development and innovation	T	Share of recommendations in Policy Support Facility adopted by the end of 2026
272	C9.R2 Streamline governance of research, development and innovation	M	Entry into force a permanent system to design, implement, monitor and evaluate research, development and innovation policy
277	C9.R4 Enhanced cooperation between business and research	M	40% of publicly funded research, development and innovation projects have at least one business entity involved as a partner
279	C9.R5 Support to integrate the research, development and innovation organisations in Romania in the European Research Area	T	Percentage of research organisations sharing research infrastructure and facilities
282	C9.I6 Horizon Europe mentoring programmes	T	Vouchers granted as part of the Horizon Europe mentoring program
287	C9.I10 Establishment and financial support of a national network of eight regional career guidance centres as part of the European Research Area Talent Platform	T	Researchers who have benefited from the services of career guidance centres
309	C10.R2 Creating the policy framework for sustainable urban transformation	T	Increase in quality of life in urban areas
311	C10.R2 Creating the policy framework for sustainable rural transformation: establishing administrative consortia in functional rural areas	T	Decrease in poverty and social exclusion in rural areas
313	C10.R3 Improving housing quality for better well-being	T	Reduced percentage of housing overcrowding
314	C10.R3 Improving housing quality for better well-being	T	Reduced percentage of population living in informal settlements
318	C10.I1 Construction of Youth Housing/ Housing units for Health and Education Professionals	T	Housing units built for young people coming from vulnerable communities / groups

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
319	C10.I1 Construction of Youth Housing/ Housing units for Health and Education Professionals	T	Housing units built for professionals in health and education
322	C10.I3 Moderate rehabilitation of public buildings to improve public service delivery by administrative territorial units	T	Surface in square metres of public buildings refurbished
325	C10.I4 Development/updating in GIS format of spatial planning and urban planning documents	T	Spatial planning, urban planning and sustainable urban mobility plans finalised and taken over in the Territorial Observatory platform
335	C11.I1 Promotion of the 12 touristic/cultural routes	T	Newly restored sites opened
337	C11.I2. Modernisation/creation of museums and memorials	T	Newly built and renovated museums opened
343	C11.I4 Implementation of 3 000km of cycling routes	T	Kilometres m of cycling routes built and accessible for cycling
400	C13.I4 Creation of a network of day care and rehabilitating centres for elderly (no residential component)	T	Operationalisation of day care and rehabilitating centres for the elderly
		Instalment Amount	EUR 1 118 226 512

3. SECTION 3: ADDITIONAL ARRANGEMENTS

3.1. Arrangements for monitoring and implementation of the recovery and resilience plan

The monitoring and implementation of the recovery and resilience plan of Romania shall take place in accordance with the following arrangements:

- At central level, the coordination is ensured by the Inter-ministerial Committee for the Coordination of the Plan, responsible for examining progress in the implementation of the Plan, in close cooperation with the Ministry of Investments and European Projects (MIPE). MIPE was appointed the national coordinator for the preparation, negotiation and approval of the Plan, assisted by the Ministry of Finance (for tasks related to signing the loan agreement and the financing agreement), with the establishment of a specialized structure.
- MIPE is also in charge of the control and monitoring of the plan, including the monitoring of the achievement of the milestones and targets, as well as ensuring the prevention, detection and correction of serious irregularities. Finally, the same Ministry is also in charge for drawing-up and signing the payment claims and management declarations.
- The implementation of the Plan shall be ensured by line ministries and their subordinated structures, through conclusion of financing agreements with MIPE.

3.2. Arrangements for providing full access by the Commission to the underlying data

In order to provide full access to the Commission to the underlying relevant data, Romania shall have in place the following arrangements:

MIPE, as the national coordinator of the plan, shall be responsible for the overall coordination, control and monitoring of the plan. In particular, it shall act as a coordinating body for monitoring progress on milestones and targets, whereas audits shall be the responsibility of the Audit Authority. MIPE shall coordinate the reporting of milestones and targets, all relevant indicators, but also qualitative financial information and other data, such as on final recipients. The data encoding shall take place in the IT system of MIPE.

In accordance with Article 24(2) of Regulation (EU) 2021/241, upon completion of the relevant agreed milestones and targets in Section 2.1 of this Annex, Romania shall submit to the Commission a duly justified request for payment of the financial contribution and, where relevant, of the loan. Romania shall ensure that, upon request, the Commission has full access to the underlying relevant data that supports the due justification of the request for payment, both for the assessment of the request for payment in accordance with Article 24(3) of Regulation (EU) 2021/241 and for audit and control purposes.
